- APPENDIX 'D' JAMAICA POLICE CO-OPERATIVE CREDIT UNION LIMITED UPDATE

PART I - ADMINISTRATION AND NOTIFICATIONS

3RD MAY, 2018

SERIAL NO. 3700

Sub. No. 1 JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY, POLICY AND STANDARD OPERATING PROCEDURES

1. BACKGROUND

- 1.1 The dynamic nature and scope of crime and criminal organization has challenged the Jamaica Constabulary Force (JCF) to develop and put into greater use a multiplicity of strategies aimed at increasing its preventative and responsive capabilities. At the same time, technological evolution has positioned the Force to leverage a mix of cutting edge technologies and information management systems in order to manage the changing criminal landscape.
- 1.2 One such effort is to incorporate the use of Unmanned Aerial System (UAS) in the JCF crime management architecture. The adoption and effective use of UAS allow for increased spatial awareness, thus increasing civilian and officer safety when utilized in surveillance, on-going/evolving incidents, search and rescue and other operations where law enforcement's 'birds eye view' is paramount.

2. PURPOSE

- 2.1 This document outlines the JCF's strategy for the use of Unmanned Aerial Systems. More specifically, it:
 - 2.1.1 establishes the JCF **Unmanned Aerial System Unit (UASU)**;
 - 2.1.2 outlines the JCF's policy on Unmanned Aerial System; and
 - 2.1.3 outlines the standard operating procedures for the management and use of Unmanned Aerial System in the JCF.

3. SCOPE

- 3.1 This policy and standard operating procedures apply to all sworn and unsworn members of the JCF and its auxiliary.

4. ABBREVIATIONS AND ACRONYMS

CCU	Constabulary Communications Network
GOJ	Government of Jamaica
ICTD	Information and Communications Technology Division
IOC	Inspectorate of Constabulary
JCAA	Jamaica Civil Aviation Authority
JCF	Jamaica Constabulary Force
JDF	Jamaica Defence Force
Kml	Keyhole Markup Language
Kmz	Keyhole Markup Language Zipped
MNS	Ministry of National Security
NOTAM	Notice to Airmen
PRDB	Planning, Research and Development Branch
SAR	Search and Rescue
SMA	Spectrum Management Authority
UAS	Unmanned Aerial System
UASU	Unmanned Aerial System Unit
UAV	Unmanned Aerial Vehicle

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

**JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY,
POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)**

5. DEFINITIONS

- 5.1 NOTAM** – Notice to Airmen. A notice released by an aviation authority to alert pilots of potential hazards on a flight route, or at a location that could affect the safety of the flight.
- 5.2 Pilot** – A member who is trained, certified and responsible for deployment of UAS
- 5.3 Spotter** – An assistant to the pilot who is responsible for monitoring the operational area to ensure that there are no hazards that may endanger the flight or people not part of the UAS flight operation team.
- 5.4 UAS** – Unmanned Aerial System – Comprises 1) Unmanned Aerial Vehicles (drones), 2) autonomous or human-operated control system, and 3) command and control system.
- 5.5 UAV** – Unmanned Aerial Vehicle – also called drone is a vessel which is flown without a pilot-in-command on-board, and is either remotely and fully controlled from another place (ground, another aircraft, space) or programmed and fully autonomous.

6. POLICY STATEMENT

- 6.1** The JCF acknowledges that its legitimacy and continued relevance rest heavily on its ability and willingness to innovate and put into greater use new technologies that increase its preventative and responsive capabilities in the management of crime.
- 6.2** The JCF recognises that the use of UAS in crime and security management has significant benefits since it offers superior spatial awareness capabilities, minimizing danger to members and civilians while acting as a significant force multiplier.
- 6.3** The JCF reiterates its commitment to modernization through technology and as such, it is the policy that:
- 6.3.1** the **Unmanned Aerial System Unit (UASU)** is hereby established and mandated to manage the operation of all unmanned aerial vehicles (UAVs) and related systems/technologies;
- 6.3.2** deployment of UAV shall be in compliance with local and international laws (including those concerning human rights), relevant GOJ policies, manufacturer(s) guide, and in accordance with international best known practices;
- 6.3.3** deployment of UAVs shall be limited to situations in which the benefits derive from its use outweigh the potential risks; these include:
- a) surveillance of high risk areas/targets
 - b) specified police operations
 - c) surveillance of assets and critical infrastructure
 - d) search and rescue (SAR) operations;
- 6.3.4** UAV will not under normal circumstances be weaponized and/or convey any payload other than that which is necessary for surveillance and/or monitoring;
- 6.3.5** all communication systems shall be in compliance with the specified spectral band stipulated by the Spectrum Management Authority (SMA) for law enforcement UAV/UAS use; and
- 6.3.6** only trained and certified members are allowed to operate UAS.

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

**JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY,
POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)**

7. GENERAL GUIDELINES

7.1 Acquisition, Maintenance and Disposal of UAS

7.1.1 The JCF will use only approved UAS acquired through the GOJ *Procurement Guidelines*.

7.1.2 Scheduled/preventative maintenance/repair of UAS shall be in accordance with the guidelines, terms or conditions, etc., stipulated by the manufacturer. This is important in order to 1) ensure the optimal functioning and durability of the equipment, 2) minimize the potential for accidents and 3) protect the GOJ's recourse to the manufacturer/supplier in respect of all warranty provisions and entitlements.

7.1.3 Disposal of UAS shall be effected via *Asset Disposal Guidelines* mandated by the Ministry of Finance with authorization of the Ministry of National Security (MNS).

7.2 Relevant legislation and policies

7.2.1 The management of UAS shall incorporate best known practices as advanced by the Jamaica Civil Aviation Authority (JCAA) through the *Flight Safety Notification General Guidance (FSN-GN-2015-01 R2) for the safe operations of Unmanned Aerial Vehicles (UAV) in Jamaican airspace, revised and published April 14, 2016*, the Civil Aviation Act (2004), the Civil Aviation Regulations (2012), Annex 2 to the Convention on International Civil Aviation in Chicago (1944), and the International Civil Aviation Organization (ICAO) Circular - CIR 328/AN/190 (official publication).

7.2.2 This policy is in keeping with the GOJ *Policy on Unmanned Aerial Systems (Drone and Drone Support System Policy) Intended for Use in Jamaican Airspace*, dated January 1, 2018, the *Ministry of National Security Guidelines for the Unmanned Aerial Systems by the Jamaica Constabulary Force in Jamaica's National Airspace*, August, 2017 and the United Nations Department of Peacekeeping Operations' *Standard Operating Procedure for Monitoring and Surveillance Technology in Field Missions*, established in 2010.

7.3 Management of Data

7.3.1 Storage/Retention of Data

7.3.1.1 Retention and handling of recordings from the UAS shall be in keeping with the Evidence (Amendment) Act, 2015, the JCF's Use of Digital Media in Criminal Investigations Policy promulgated in Force Orders No. 3357, Part 1, Sub No. 1 dated October 6, 2011, the JCF Digital Photography SOP, and the JCF's Handling of Exhibits Policy.

7.3.2 Request for Release of Data

7.3.2.1 Request for recordings from UAS must be coordinated through the Constabulary Communications Network (CCU).

7.3.2.2 All access to UAS recordings must be authorized by the Commissioner of Police or his designee.

7.3.2.3 Except where stipulated by law, release of UAS recordings to the public must be after all investigations have been completed, and with due regard to the safety of member(s) involved and the privacy of unconnected persons.

7.3.2.4 Where a decision is taken to release UAS recordings to the public, the footage must be

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY, POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)

edited in order to conceal the identity of the police, suspects, victims and/or any bystander, as also to preserve the dignity, respect and human rights of persons.

7.3.2.5 Release of UAS recordings must be coordinated through the CCU.

7.3.3 Disposal of Data

7.3.3.1 Where the data has no immediate or potential evidential or law enforcement value or there is no likelihood of court action, the file (footage) may be deleted after one year on the written instruction of the Commissioner of Police or his designee.

8. SPECIFIC ROLES AND RESPONSIBILITIES

8.1 The Organizational Structure, Role and Responsibilities of UASU

8.1.1 Overall management of the Jamaica Constabulary Force Unmanned Aerial System Unit (UASU) resides with the Deputy Commissioner, Operations Portfolio. The Deputy Commissioner Operations Portfolio will hold the various heads of the Area Unmanned Aerial Systems Unit (UASU) accountable for the use and management of all UAS in their respective areas.

8.1.2 The Heads of the Area UASU shall take reasonable steps to ensure the security, continuous accountability and proper use of UAS, and manage the UASU in a manner that promotes safety of equipment, safety of other users of the airspace and the general citizenry, and the observation of human rights.

8.1.3 The Head of the Area UASU shall have responsibility for:

- a) maintaining a ***UAS Area Registry*** for the accurate inventory of all UAS;
- b) maintaining a ***UAS Dispatched Register*** for the accurate record of ALL movement of UAS;
- c) maintaining a ***NOTAM Registry*** for the accurate record of all notification to the Jamaica Civil Aviation Authority (JCAA) and the Jamaica Defence Force (JDF);
- d) ensuring that all UAS are serviced and maintained in accordance with manufacturers' guidelines;
- e) ensuring that UAVs are airworthy;
- f) authorizing the deployment of UAS;
- g) ensuring that UAS are used in accordance with guidelines;
- h) ensuring that only trained UAS pilots are allowed to use the device;
- i) documenting the use of all UAS under its command;
- j) implementing measures to ensure accountability for the proper handling, operation, storage and safekeeping of equipment;
- k) conducting of routine audit and inspection of UAS;
- l) facilitating external MNS/GOV audits and inspections;
- m) ensuring compliance with all relevant laws, policies and guidelines and Standard Operating Procedures; and
- n) ensuring that disciplinary actions are taken against misuse of UAS.

8.1.4 The ***UAS Area Registry*** shall have the following headings: consecutive number, make and type, serial/model number, unique identifier, number and types of sensors, number and types of associated systems, number of carrying cases, names of trained pilots, number of hours flown, date last serviced, date for next scheduled service, number of batteries and remarks.

[Top of Page](#) [Top of Section](#) [Back to Contents](#)

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

**JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY,
POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)**

- 8.1.5 The *UAS Dispatched Register* shall have the following headings: consecutive number, name and model of UAV, serial number of UAV, number and types of sensors, number of batteries, regulation number and name of person issuing, regulation number and name of person receiving, signature of person receiving, date and time received and remarks.
- 8.1.6 The *NOTAM Register* shall have the following headings: Consecutive number, day, date and time notice issued, name and rank of persons issuing notice, name and position/rank of person in receiving notice and remarks.
- 8.1.7 All registers shall be official records of the JCF and may be summoned for evidentiary purposes. The registers are to be preserved/maintained in accordance with Force policies.

Organizational Chart UASU

8.2 The Role and Responsibilities of the Operation Commander

The Operation Commander has overall responsibility for the operation. He/she is responsible to:

- 8.2.1.1 supply timely information to the Head of the UASU on the location, time, duration and any change(s) as it relates to the deployment of the UAS. This information is for onward transmission to the JCAA and the JDF of the JCF's intention to operate UAS in the national airspace;
- 8.2.1.2 determine what is needed for the operation, brief pilot of flight goals and verify results after landing; and
- 8.2.1.3 provide feedback to the pilot during flights.

8.3 The Role and Responsibilities of the Pilot

- 8.3.1 The pilot has the authority on whether or not it is safe for the UAV to take off having taken into account factors such as; weather condition, potential for equipment failure, obstacles/hazards amongst others.

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY, POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)

8.3.2 If the pilot determines that it is not safe to operate the UAS, he/she shall immediately inform the Operation Commander. The Operation Commander will make the final decision having weighed the risk of operating in the unsafe conditions against the objective of the mission. The pilot is responsible for:

- 8.3.2.1 determining if the UAV is airworthy and capable of conducting the proposed operations;
- 8.3.2.2 determining if the airspace allows the proposed operation;
- 8.3.2.3 determining if the Operation Commander's goals are possible under the conditions presented;
- 8.3.2.4 briefing the other members of the flight crew about the mission; and
- 8.3.2.5 conducting operations of the UAS within all JCAA guidelines.

8.4 The Role and Responsibilities of the Spotter

8.4.1 The spotter shall always be a certified pilot and be prepared to take over flight operations if the pilot is not able to complete the mission.

8.4.2 The spotter must remain within direct voice distance of the pilot and has responsibilities for:

- 8.4.2.1 monitoring of the operational area to ensure that there are no hazards that may endanger the flight or people who are not a part of the UAS flight operations team;
- 8.4.2.2 alerting the pilot immediately if any aircraft comes into the operational area, or if any person or vehicle comes near the operation; and
- 8.4.2.3 ensuring that the pilot remains free of interference to safely conduct the flight.

8.5 The Role and Responsibilities of ICTD

8.5.1 The ICTD will be responsible for:

- 8.5.1.1 recommending the types, specification and capabilities of all UAS to be used in the JCF;
- 8.5.1.2 ensuring that all UAS island wide are in good working condition;
- 8.5.1.3 provisioning UAS;
- 8.5.1.4 assigning unique identifier marks on each UAV and related equipment;
- 8.5.1.5 disabling stolen, lost and/or any UAS that cannot be accounted for;
- 8.5.1.6 submitting annual budget for the acquisition and maintenance of appropriate and adequate UAS;
- 8.5.1.7 providing mechanism for the retrieval, storage and admissibility of data as evidence;
- 8.5.1.8 ensuring that all communication systems are in compliance with the specified spectral band stipulated by the SMA for law enforcement UAV/UAS use;
- 8.5.1.9 recommending the decommissioning and/or disposal of UAS;
- 8.5.1.10 Coordinating servicing/maintenance/repair of UAS; and
- 8.5.1.11 establishing and maintaining a *UAS Central Register*.

8.5.2 The *UAS Central Register* shall have the following headings: consecutive number, make and type, serial/model number, unique identifier, number and type of sensors, number and type of associated systems, number of carrying cases, date acquired, area assigned, names of trained pilots, number of hours flown, date last serviced, next scheduled service and remarks.

8.6 The Role and Responsibilities of the PRDB

8.6.1 The Planning, Research & Development Branch (PRDB) shall research and recommend best known practices in the management of UAS in law enforcement. Areas for research may include but not limited to:

- 8.6.1.1 changes in safety regulations in the aviation industry;
- 8.6.1.2 changes in laws, GOJ policies;

[Top of Page](#) [Top of Section](#) [Back to Contents](#)

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY, POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)

- 8.6.1.3 new approaches in law enforcement;
- 8.6.1.4 cases in the protection of human rights; and
- 8.6.1.5 emerging threats in the industry.
- 8.6.2 Additionally, the PRDB shall maintain data on all reports of misuse, accidents, safety or human rights violations, system failure, loss of equipment and others. These may include but not limited to reports from citizens, the JCAA, the JDF, SMA, other airmen or members of the JCF.
- 8.6.3 The role of the PRDB with respect to these reports is to 1) provide official data on reported incidents and 2) to conduct research and recommend changes in strategy, policy or standard operation procedure.

8.7 The Role and Responsibilities of the IOC

8.7.1 Maintenance of Standard

- 8.7.2 The Inspectorate of Constabulary (IOC) shall have responsibility for the maintenance of standards in the operation of UAS in the JCF.

8.7.3 Complaint/Report Management

- 8.7.4 The IOC will investigate and take appropriate actions in respect to all reports of misuse, accidents, near misses, safety violation, human rights violations, system failure, loss of equipment and others. These may include but not limited to complaints from citizens, the JCAA, the JDF, SMA, other airmen or members of the JCF.

8.7.5 Special Panel for Investigation

- 8.7.6 Where there are reports/complaints such as loss or damage to equipment or property, injury to person, accident or near accident with another vessel, or any serious incident, the IOC shall institute a Special Panel for Investigation. This Special Panel for Investigation may comprise experts from the JCAA, SMA, JDF or a representative of the authorized training entity.
- 8.7.7 The report of the Special Panel for Investigation may be used as the basis for administrative action(s).

9. OPERATIONAL PROCEDURE

9.1 Notification to Jamaica Civil Aviation Authority and the Jamaica Defence Force

- 9.1.1 A major underlying principle of the operation of UAS is safety. This means safety for the vessel, other users of the airspace as well as those on the ground. The principle underlying operations of UAS in the JCF is that safety should never be compromised. It is the responsibility of the pilot to communicate to the Operation Commander whether or not it is safe to fly.
- 9.1.2 Prior to deployment, once the UAV will exceed 650 feet, the Operation Commander shall direct the Head of the UASU to issue a formal notice to the JCAA and the JDF of their intention to operate UAS in the national airspace. This notification is in keeping with the JCAA's *Flight Safety Notification* General Guidance in relation to the operation of UAVs (FSN-GN-2015-01 R1 dated April 20, 2016).
- 9.1.3 The notification to the JCAA and the JDF **must** include:
 - 9.1.3.1 the area of the operation of the UAS;
 - 9.1.3.2 the commencement time of the operation of the UAS; and
 - 9.1.3.3 the projected duration of the operation of the UAS.
- 9.1.4 Any change in the location, time or duration of the flight must be promptly communicated to the Head of the UASU who will in turn further inform the JCAA and the JDF.

[Top of Page](#) [Top of Section](#) [Back to Contents](#)

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY, POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)

- 9.1.5 Once use of the airspace is concluded, the Operation Commander shall inform the Head of the UASU, who shall formally notify the JCAA and the JDF.
- 9.1.6 Once the notification has been issued, the JCAA will publish the NOTAM via the Aeronautical Information System. The NOTAM informs all parties that an aircraft will be operating in a specific airspace for a specific period of time.
- 9.2 Pre-Trip**
 - 9.2.1 Prior to flight, the pilot must gather information about the proposed flight area to ensure the safety of the operation. The pilot must possess the Keyhole Markup Language/Keyhole Markup language Zipped (kml/kmz) file of the location where the aerial operation is to be conducted. Creating a kml/kmz file is critical for submitting the flight advisory to the JCAA and for accountability and tracking purposes.
- 9.3 Pre-Trip Inspection**
 - 9.3.1 The pilot should then conduct a pre-trip inspection of the UAS. A pre-trip inspection includes checking battery charge level, checking various mounting hardware, and checking the camera/sensors and storage media to ensure it is sufficient for the task. The Pre-Trip Inspection must be conducted in accordance with the *JCF UAS Operations Procedure Guidelines*.
- 9.4 Pre-Flight Checks**
 - 9.4.1 Pre-flight checks are immediately before any flight. The pre-flight checklist repeats some of the pre-trip checklist such as inspecting the UAV and some of the control surfaces. Pre-trip and pre-flight inspections help to ensure airworthiness. This will serve as an early warning sign for both maintenance and mechanical issues, which could substantially affect flight operations. Pre-flight Checks must be conducted in accordance with the *JCF UAS Operations Procedure Guidelines*.
- 9.5 Flight**
 - 9.5.1 During flight, the pilot should; 1) continuously scan for airborne traffic or other obstacles, 2) check battery levels constantly and return UAV before it reaches 30 percent of the remaining capacity; and 3) constantly check flight parameters (such as altitude, speed, angle) to ensure that they remain within restrictions and operational goals. Flight checks must be conducted in accordance with the *JCF UAS Operations Procedure Guidelines*.
- 9.6 Post-Flight**
 - 9.6.1 This comprises; 1) the spotter shutting down the UAV, 2) shutting down the controller, 3) inspecting the aircraft, and 4) completing the maintenance, battery and flight logs. Post-flight checklist must be conducted in accordance with the *JCF UAS Operations Procedure Guidelines*.
- 9.7 Emergency**
 - 9.7.1 In most emergency situations, the general protocol is to land as soon as is safely possible. This may include landing in areas that were not pre-determined landing zones. The pilot must endeavour to conduct a safe, controlled landing where the unit can be retrieved.

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

**JAMAICA CONSTABULARY FORCE UNMANNED AERIAL SYSTEMS STRATEGY,
POLICY AND STANDARD OPERATING PROCEDURES (CONT'D)**

9.7.2 During automated flight, if there are concerns that the UAS is not flying the mission planned or that control characteristics are abnormal, the pilot shall take manual control of the UAS and return it to the landing zone if possible. Pilots are required to follow the emergency procedure as outlined in the *JCF UAS Operations Procedure Guidelines*.

10. GENERAL

10.1 Training and Certification

10.1.1 The JCF is responsible for maintaining a cadre of trained and certified personnel for the management of the UAS. The JCF will undertake the following:

10.1.1.1 Restrict use of and access to the UAS to only trained and certified personnel; and

10.1.1.2 Ensure maintenance of institutional knowledge of the management of UAS.

10.2 Security and Storage of UAS

10.2.1 During periods when the UAS is not in use, it shall be placed in secured carrying cases and stored at the respective UASU.

10.2.2 The designated supervisor for each shift shall be responsible for safe custody of UAS.

10.3 Accountability of UAS

10.3.1 A master inventory of the Force's stock of UAS will be maintained at the ICTD.

10.3.2 The *UAS Register* shall record the issuing and receipt of each UAS

10.3.3 The Station Diary shall record the movement of UAS.

10.3.4 If a UAS or any part is lost or damaged, member must immediately notify his/her supervisor and document the incident in writing.

10.3.5 It shall be the responsibility of the assigned member to ensure that the UAS is operated and maintained according to the manufacturer's instructions and this policy.

10.3.6 Member shall be held liable for any deliberate, negligent and/or careless handling of UAS which results in lost, damage to unit or property, or injury to personnel.

10.4 Damaged, Destroyed, Lost, or Stolen UAS

10.4.1 In the event of damage, destruction, theft or loss of any UAS, the pilot to whom it was issued shall, immediately or within reasonable time report the circumstances to his/her immediate supervisor.

10.4.2 The supervisor shall initiate an investigation in the matter and forward a report to the Commanding Officer within 24 hours.

10.4.3 The Commanding Officer shall then forward a report to the Commissioner of Police and the JCAA within 48 hours.

This policy shall be reviewed biennially or as may become necessary.

Attached to these Orders as [Appendix 'A'](#) is the Jamaica Constabulary Force Unmanned Aerial System Operations Procedure Guidelines.

Sub. No. 2 GRADUATION EXERCISE - TRAINEE CONSTABLES

A passing-out parade and awards ceremony will be held at the National Police College of Jamaica, Harman Barracks Campus, on Friday, May 11, 2018, commencing 10:30 a.m.

The Parade will be held in the presence of the Honourable Dr. Horace Chang, Minister of National Security and Major General Antony Anderson, ADC, JP, MDA, B. Eng. (Hons.), psc, Commissioner of Police.

[Top of Page](#) [Back to Contents](#)

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

GRADUATION EXERCISE - TRAINEE CONSTABLES (CONT'D)

The Honourable Minister will be the Reviewing Officer. He will inspect the parade and take the General Salute.

Officers, Inspectors and other ranks of the Jamaica Constabulary Force and Rural Police are invited to attend with their spouses.

DRESS:	Officers and Inspectors	No. 2 Terelyne
	Other Ranks	Shirt Sleeve

Members of the civil staff and relatives of the graduants are also invited.

All persons attending should be seated by 10:40am.

Sub. No. 3 **SELECTION PROCEDURE FOR PROMOTION 2018 - CORPORAL QUALIFYING SYLLABUS**

Attached to these Orders as [Appendix 'B'](#) is the syllabus and relevant instructions for the written stages of the selection procedure members are to use to guide their preparations for the upcoming Corporal Qualifying Examinations. The syllabus and instructions for the Sergeant Qualifying and the Inspector Qualifying will be published in next week's Force Orders.

Sub. No. 4 **REMINDER - SELECTION PROCEDURE FOR PROMOTION TO THE RANKS OF CORPORAL TO INSPECTOR - 2018**

Force Orders No. 3699, Part I, Sub. No. 2 dated 2018-04-26, is hereby republished, for general information and strict compliance.

The procedure for selecting suitably qualified members for promotion to the ranks of Corporal to Inspector will commence in April 2018. The dates and venues for the written stages will be promulgated at a later date.

Members may begin preparations using recent policies. However, updated syllabi will be made available soon.

The opening and closing dates of the Examination Register (the Register) for applicants from the rank of Constable to Sergeant will be:

Opening Date: 8:00 a.m. Monday, April 30, 2018

Closing Date: 12:00 midnight Friday, May 25, 2018

The register shall be constructed with seven columns under the following headings:

1. Consecutive number
2. Name and rank of applicant
3. Time and date entry is made in Register
4. Signature of applicant
5. Date of submission of application form
6. Signature of person to whom application form is submitted
7. Remarks

NB: Successful members from the 2014 procedures who were not promoted may elect to retain their score, or to re-do. Where a member elects to re-do, the grade attained is the one that will be used in the Selection Procedure 2018.

FORCE ORDERS (CONT'D)

SERIAL NO. 3700

REMINDER - SELECTION PROCEDURE FOR PROMOTION TO THE RANKS OF CORPORAL TO INSPECTOR - 2018 (CONT'D)

GUIDELINES FOR ELIGIBILITY - CORPORAL, SERGEANT AND INSPECTOR QUALIFYING

Years of Service

Participation in the selection procedure for promotion will be as under:

Corporal Qualifying: This is open to Constables with no fewer than four years of service at the closing date of the Register.

Sergeant Qualifying: This is open to Corporals with no fewer than two years in the rank at the closing date of the Register. A Corporal with an accredited Bachelor's Degree may apply to sit the Sergeant Qualifying Examination regardless of the number of years in the rank.

Inspector Qualifying: This is open to Sergeants with at least two years of service in the rank at the closing date of the Register.

Discipline

Orderly Room Matters

- a) Applications of members convicted at an Orderly Room within one year prior to the closing of the register, will not be approved.
- b) Applications of members who have three or more Orderly Room convictions over the last 2 years prior to the closing of the register will not be approved.

Court of Enquiry

- a) Where a Court of Enquiry matter has commenced but the hearing has not been concluded, the member's application to participate in the Selection Procedure for Promotion will not be approved.
- b) Where a matter is pending against a member, the member's application will not be approved.
- c) Where a member is appealing a Court of Enquiry conviction, the member's application will not be approved.
- d) Members convicted at a Court of Enquiry within three years prior to the close of register, will not be permitted to participate in the process.

Criminal Matters

- a) Where a member is criminally charged, the member's application to participate in the Selection Procedure for Promotion will not be approved.
- b) Where any criminal investigation has been completed and the matter is awaiting the ruling of the Director of Public Prosecutions, the member involved will not be allowed to participate in any Selection Procedure for Promotion.
- c) Members on interdiction/suspension arising from criminal charges will not be permitted to participate in Selection Procedure for Promotion.
- d) Members with any conviction from a criminal court MAY not be approved for participation.
- e) Members who do not submit proof of compliance with the Corruption Prevention Act for the last three (3) years (2017, 2016 and 2015) will not be approved.

Sub. No. 5

REMINDER - INVITATION FOR APPLICATIONS TO THE INFORMATION AND COMMUNICATIONS TECHNOLOGY DIVISION TO FILL THE POST OF PROGRAMMER

Force Orders No. 3698, Part I, Sub. No. 2 dated 2018-04-17, is hereby republished for general information.

JOB DESCRIPTION

The Jamaica Constabulary Force Information and Communications Technology Division (ICTD), invites applications from suitably qualified officers in the organization to fill the available post of Programmer.

Reports To : System Analyst/Software Engineer

Job Purpose

The Programmer will mainly be focused on the areas of designing, researching, developing and then testing different software. The Programmer will work closely with System Analysts and Engineers. Additionally, the Programmer will write, test, debug and improve applications developed within the Jamaica Constabulary Force (JCF).

Key Outputs

1. New programmes developed, tested and implemented.
2. Programmes maintained and modified.
3. Operational instructions written.

Key Responsibilities

1. Analyze end-user needs and design, develop and test software to satisfy user requirements.
2. Assist in the design and development of user interfaces for applications.
3. Design methodologies and tool sets.
4. Integrates applications by designing database architecture and server scripting.
5. Creates multimedia applications by using authoring tools.
6. Troubleshoot development and production problems across multiple environments and operating platforms.
7. Assist in developing documentation and assistance tools.
8. Develop, modify and test code as well as analyze, correct and document errors as reported.
9. Participate in the development and design of software user interface.
10. Participate in system installation and assist in monitoring system operation to ensure specifications are met.

12551 W/Cpl. S.L. Gohagen TSD Portland

2018-05-17

11993 Cons. S. Barrett Westmoreland Trelawny

NB: All transfers must be taken up on the effective date. Regular members must be dressed in uniform and CIB personnel in work business suit. Each member must be escorted by a sub-officer and handed over to the receiving sub-officer along with a copy of the transfer return. These new members must be introduced to the Divisional Commander or his/her representative for a welcome brief.

Cancellation

Reference Force Orders No. 3686, Part II, Sub. No. 3(10) dated 2018-01-25, the **transfer** appearing for No. 12954 D/Cpl. J.J. Bailey from **Kingston 'W'** to **MID** is cancelled.

FORCE ORDERS (CONT'D)

3RD MAY, 2018

SERIAL NO. 3700

12. Punishment: Court of Enquiry

Trelawny	16601	Sgt. C.D. Holder	Charge 1
----------	-------	------------------	----------

Being a member of the Jamaica Constabulary Force conducted yourself contrary to the discipline, good order and guidance of the Force, in that you brought the office of Constable and the Jamaica Constabulary Force into disrepute when you wrote the words "You are a Monster" on a 2014 CIBC desk calendar, property of Senior Resident Magistrate which was thereafter left on a desk in Court Room # 2 at the Montego Bay RM Court about 8:15am on Tuesday, December 9, 2014 in the parish of St. James, which caused the Magistrate to express emotional unease.
Severely Reprimanded. (A19/H1715)

13. Commendation

The undermentioned are commended for zeal, energy and initiative displayed considerably beyond average in the performance of duty for **Recovery of Firearm and Ammunition and Arrest of the Accused** on 2016-08-13:-

St. Andrew 'N'	8779	Cpl. D.D. Fullerton	)
St. Andrew 'N'	10534	Cons. A.F. Jones	)
St. Andrew 'N'	14054	Cons. K.D. Bailey	) F21/1 Area 5
St. Andrew 'N'	16484	D/Cons. K.L. Barnes	)
St. Andrew 'N'	18975	Cons. D.D. Murray	)

17. Courses of Instruction

Business and Computer Studies (Business Studies)

The undermentioned pursued a course in Business and Computer Studies (Business Studies) at the University of Technology Jamaica, 237 Old Hope Road, Kingston 6, from September, 2012 to August, 2017 and was awarded the Bachelor of Education Degree:-

PSD	14488	Cons. C.A. Felix, B.Ed.
-----	-------	-------------------------

Music

The undermentioned pursued a course in Music at the Edna Manley College of the Visual and Performing Arts, 1 Arthur Wint Drive, Kingston 5, from September, 2012 to June, 2016 and was awarded the Bachelor of Music Performance Degree with Honours:-

Band	17931	Cons. A.M. Comrie, B.M. (Hons.)
------	-------	---------------------------------

Security Administration and Management

The undermentioned pursued a course in Security Administration and Management at the Caribbean Maritime University, Palisadoes Park, Norman Manley Highway, Kingston, from September 2013 to May 2017 and was awarded the Bachelor of Science Degree with Second Class Honours (Lower Division):-

NIB	8536	D/Sgt. A.A. Palmer, B.Sc. (Hons.)
-----	------	-----------------------------------

Economics (Major), Statistics (Major)

The undermentioned pursued a course in Economics (Major), Statistics (Major) at the University of the West Indies, Mona, Kingston 6, from September, 2012 to July, 2017 and was awarded the Bachelor of Science Degree with Second Class Honours (Upper Division):-

St. Andrew 'S'	14266	Cons. C.O. Cranston, B.Sc. (Hons.)
----------------	-------	------------------------------------

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

1. RISK PREVENTION/MANAGEMENT

- 1.1 AUTHORIZED USE ONLY** – The improper or unauthorized use of UAS may expose citizens to physical harm, violate rights to privacy, and risk accidents with other users of the airspace.
- 1.2** *This UAS Operations Procedure Guideline must be read in conjunction with the Jamaica Constabulary Force Unmanned Aerial Systems Strategy, Policy and Standard Operating Procedure.*
- 1.3** This is a guide for the safe operation of the Jamaica Constabulary Force (JCF) Unmanned Aerial System (UAS). A major underlying principle of the operation of UAS is safety. This means safety for the vessel, other users of the airspace as well as those on the ground. The principle underlining operations of UAS in the JCF is that safety should never be compromised. Operators must be aware of the following risks/situations which may compromise safe operation/management of UAS:
1. Loss of altitude
 2. Loss of control
 3. Loss of transmission
 4. Collision with manned/unmanned aircraft or buildings, power lines
 5. Partial failure or loss of navigation systems
 6. Severe weather or climatic events
 7. Midair failure due to corrosion/poor maintenance
 8. Pilot unfamiliar with area
 9. Rotor failures
 10. Battery failure during flight
 11. Take-off and landing incidents such as undershooting or overrunning
 12. Breach of rights to privacy due to intrusive feature/operation

2. ROLE AND RESPONSIBILITIES

In normal operations specific functions and responsibilities are coordinated amongst three persons: 1) the Operation Commander, 2) the Pilot and 3) the Spotter.

2.1 Operation Commander:

- 2.2.1** The Operation Commander has overall responsibility for the operation. He/she is responsible to supply timely information to the Head of the UASU on the location, time, duration and any change(s) as it relates to the deployment of the UAS. See Section 8.2 for the *Role and Responsibilities of the Operation Commander, JCF Unmanned Aerial Systems Strategy, Policy and Standard Operating Procedures.*

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

2.1.1 Operational Goals

- 2.1.1.1 The Operation Commander should clearly define the goals of the UAS flight operation before leaving for the location. This can be achieved with careful considerations to the following:
1. The purpose of the UAS in the operation.
 2. The expected length of the operation.
 3. Any need to supply live video feeds or photographs during the operation.
 4. Any data (photographs, recorded imagery etc.) that may be required for capture.
 5. The potential evidential value of recorded photographs or video.

2.2 The Pilot:

- 2.2.1 Before flight, the pilot must take into account factors such as; weather condition, potential for equipment failure and obstacles/hazards. See Section 8.3 for the *Role and Responsibilities of the Pilot, JCF Unmanned Aerial Systems Strategy, Policy and Standard Operating Procedures*

2.3 The Spotter:

- 2.3.1 The spotter shall always be a certified pilot and be prepared to take over flight operations if the pilot is not able to complete the mission. He/she shall monitor the operational area to ensure that there are no hazards that may endanger the flight or people who are not a part of the UAS flight operations team. See Section 8.4 for the *Role and Responsibilities of the Spotter, JCF Unmanned Aerial Systems Strategy, Policy and Standard Operating Procedures*.

3. GENERAL OPERATING PROCEDURES/GUIDELINES

- 3.1 The general operating procedures for UAS are divided into four components:
1. Pre-Trip
 2. Pre-Flight
 3. Flight
 4. Post-Flight

The requirements in each component are encapsulated in following checklists (**Appendices 1 to 8**):

3.2 Pre-Trip

- 3.2.1 Prior to any UAS operation, the pilot must gather information about the proposed flight area to ensure the safety of the operation. The pilot should receive from the officer in charge a Keyhole Markup Language/Keyhole Markup language Zipped (kml/kmz) file of the location where the aerial operation is to be conducted.

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

3.2.2 If this information is not received, the pilot should have the officer in charge point out the location on an electronic map. The pilot can then use this to create his/her own kml/kmz file.

3.2.3 Creating a kml/kmz file is critical for submitting the flight advisory to the JCAA and for accountability and tracking purposes.

3.2.4 Location

3.2.4.1 The pilot should be aware of all the necessary information regarding the location for the selected area of operation. This is necessary for him/her to determine if the planned operation will proceed. The pilot should seek to satisfy himself/herself as it relates to the following:

1. physical and natural structures at the location;
2. presence of hazards to aviation (mountains, cell towers, powerlines, etc.);
3. owner of airspace in which the location is situated;
4. number of persons expected around the area;
5. plan to minimize flight over people;
6. whether or not all the publicly available aerial images of the area were pulled and the site surveyed;
7. weather forecast for the day of the operation;
8. whether or not aviation weather forecast was consulted;
9. whether or not local weather source was consulted for an immediate trip;
10. alignment of projected wind levels with the operational maximums set by the manufacturer or by the pilot's operational guidelines; and
11. the effects of temperature on the batteries at the selected location.

3.2.5 Logistics

3.2.5.1 The pilot must consider the following logistics:

1. Before leaving for the operation area, equipment needed should be considered.
2. The functionality of the equipment should be checked.
3. The site should be inspected. Factor in time for a walk through of the location to note any hazards only visible on site.
4. Ensure that there are sufficient batteries to accomplish the task.
5. Ensure the batteries are charged.

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

3.2.6 Pilot's Briefing

- 3.2.6.1 The pilot is responsible for briefing operation personnel on each phase of flight. The pilot will designate the spotter and will explain their roles and what will happen during flight. During the briefing, the pilot must:
1. identify who is fulfilling each role in the operation;
 2. communicate the expectations of each member of the operation;
 3. give a general description of the operations area;
 4. state the expected weather at the location;
 5. communicate any known hazards, including winds, obstacles, known high traffic areas, any nearby airports or expected air traffic; and
 6. communicate the specific mission goals, including expected shots, angles or subjects

3.2.7 Pre-Trip Inspection

- 3.2.7.1 Before leaving for the operation area, the pilot should conduct a pre-trip inspection of the UAS. A pre-trip inspection includes charging batteries, checking various mounting hardware, and checking the camera/s and storage media to ensure they are sufficient for the task. See *Pre-Trip Inspection Checklist (Appendix 1)*.

3.3 Pre-Flight

- 3.3.1 Pre-flight operations are immediately before any flight. The pre-flight checklist (**Appendix 2**) repeats some of the pre-trip checklist, such as inspecting the aircraft and some of the control surfaces. Pre-trip and pre-flight inspections help to ensure airworthiness. This will serve as an early warning sign for both maintenance and mechanical issues, which could substantially affect or cancel flight operations.
- 3.3.2 The general rules of pre-flight are:
1. the pilot should physically handle and inspect the UAV. He/she is responsible for the aircraft and all related devices. The Pre-flight Inspection will be conducted that is, connecting the batteries etc.;
 2. Operation Commander must designate a takeoff and landing area of at least 10 feet x 10 feet and ensure it is free of debris;
 3. Operation Commander may be required to secure an area to be kept free of people. This space should be as large as the pilot thinks is practical;
 4. wind conditions may vary by location and an anemometer is a valuable tool for measuring wind on the site. This will inform the pilot if the wind speeds are within operational limits and how they may affect flight operations; and

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

5. before takeoff, the compass should be free of interference from nearby metallic objects and there are enough GPS satellite connections.

3.4 Flight

3.4.1 The *Flight Checklist* (**Appendix 3**) is a reminder of the things that should be done by an UAS operator. During flight the pilot should:

1. continuously scan for airborne traffic or other obstacles
2. check battery levels constantly and returned before it reaches 30 percent of capacity
3. Constantly check flight parameters (such as altitude, speed, angle) to ensure that they remain within restrictions and operational goals.

3.5 Post-Flight

3.5.1 The *Post-Flight Checklist* (**Appendix 4**) is broken into three parts:

1. Shutting down the UAV (by the spotter)
2. Shutting down the controller
3. Inspecting the aircraft and filling out logs

4. LOGGING

Logging is an important part of aviation safety and will serve as an important document in maintenance of UAS. Unmanned Aerial System operations can be divided into three separate logs:

- Maintenance Log
- Battery Log
- Flight Logs

4.1 Maintenance Log

4.1.1 A maintenance log is a list of issues to be checked or fixed between flights. Pilots should note any issue that should be checked. This may include; unusual wobble or sound, overheating motor, or a complete system failure. The maintenance log should include the date, UAS make and model, UAS registration number, the identification number of the battery used when the issue occurred, the specific issue, the person reporting the issue, the date the issue was repaired, who repaired it and notes.

4.2 Battery Log

4.2.1 A battery log serves as a warning to the pilot by indicating that the battery is getting worn out and could possibly fail. Fully charged batteries that go unused and are not discharged for over a week can lead to damaged battery cells. The batteries degrading over time provides less flight time.

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

- 4.2.2 The log should include the date, UAS make and model, UAS registration number, the number of past charges, the percentage of battery power at shutdown, total flight time and battery depletion rate.
- 4.2.3 The log should inform the pilot of the working conditions of the battery. A note should be made on the log of any unusual changes in the battery, for example, signs of puffing (this indicate that the battery is damage).

4.3 Flight Log

- 4.3.1 A flight log will highlight the important events that occur from the time the UAV takes off to the time it landed and powered down.
- 4.3.2 Each UAV will have its own flight log and it should note the date, the battery used during flight and the total flight time.
- 4.3.3 The flight log should include the flight number, date, location, day/night, duration, issues, battery number and comments.

5. EMERGENCY PROCEDURES

5.1 Emergency Assumption of Control

- 5.1.1 In most emergency situations, the general protocol is to land as soon as is safely possible. This may include landing in areas that were not pre-determined landing zone. The pilot must endeavor to conduct a safe, controlled landing where;
 - the UAV can be safely retrieved
 - impact can be cushioned
 - there is minimal risk of injury to persons or property, and
 - landing is not likely to result in fire or chemical hazard.
- 5.1.2 During any automated flight, should there be any concern that the UAV is not flying the mission planned or that control characteristics are abnormal, the pilot will take manual control of the UAV with a Remote Control (RC) and return it to the landing zone if possible, and land it.
- 5.1.3 If the UAV starts showing any sign of not following the automated flight path, and the manual override doesn't happen automatically, the pilot should take the necessary steps for manual control.
- 5.1.4 Commercial based UAS are configured with an automatic return to home procedure controller to prevent drift outside of the operation area if the RC link is lost.

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

- 5.1.5 There may be minor problems that do not require emergency assumption of control. In these cases, the GCS communication can direct the UAV to land or the pilot can manually land the UAV.
- 5.1.6 Each UAV carries a memory card for data storage. The pilot must ensure that memory card for each mission should not have sensitive information stored thereon. It is to be noted that there are risks in losing a vessel with sensitive information on its memory card on each mission.

6. GLOSSARY

- 6.1 **AGL** – Above Ground Level
- 6.2 **GCS** – Ground Control Station
- 6.3 **RC** – Remote Control

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 1

JCF UAS - PRE-TRIP CHECKLIST

Date: _____

Item	Action	Status
Batteries	Charge	
Controller Batteries	Charge	
Propeller nuts	Check and tighten	
Motor mount screws	Check and tighten	
Gimbal mount	Check and tighten	
Gimbal camera harness	Check and tighten	
Airframe check	Inspect for damage	
Registration markings	Check for display	
Camera battery	Charge	
Camera memory card	Check and empty	
Mission planning meeting	Record goals of the flight	
Tower check	Contact closest tower, if needed	

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 2:

JCF UAS PRE-FLIGHT CHECKLIST

Date: _____

Item	Action	Status
Weather	Check location conditions against weather reports	
Wind conditions	Measure at location, check operation maximums	
Flight area	Visually inspect for hazards, note, and report	
Takeoff/landing area	Delineate and clear of debris	
Operations area	Delineate > 15 feet from takeoff area	
Flight area	If needed, secure flight area to be kept free from people to ensure safety	
Pre-flight meeting	Review goals	
Airworthiness check	Visually inspect aircraft	
Airworthiness check	Visually inspect control surfaces and linkages	
Airworthiness check	Inspect props for balance, damage	

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Pre-Flight Checklist Continued

Item	Action	Status
Airworthiness check	Check camera/gimbal security	
Airworthiness check	Verify controller batteries	
Airworthiness check	Verify controller is on	
Airworthiness check	Verify UAS battery	
Airworthiness check	Verify UAS battery is on	
Airworthiness check	Verify display panel working properly	
Airworthiness check	Calibrate compass, if necessary	
Airworthiness check	Check navigation and telemetry connection	
Non-Pilot personnel	Leave takeoff area, if present	
Pilot	Leave takeoff area before launch	
Video monitor	Check wireless connection	
All clear check	Check takeoff area, airspace, flight area	
Power up	Unlock motors, increase throttle	
Final pre-mission check	At low hover, check telemetry status	
Final pre-mission check	At low hover, check prop balance and controls	

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 3:

JCF UAS FLIGHT CHECKLIST

Date: _____

Item	Action	Status
Airborne hazard check	spotter reports immediately	
Ground hazard check	spotter reports immediately	
Battery check	Pilot monitors battery levels frequently	
Flight parameter check	Pilot evaluates altitude	
Low battery alert	Return to landing area	
Battery change	Pilot in command changes the battery	
Battery change meeting	Evaluate mission goals	

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 4:

JCF UAS POST-FLIGHT CHECKLIST

Date: _____

Item	Action	Status
Battery removal	Spotter removes the battery	
Controller	Turn off after battery removal	
Motor check	Touch motors to check for overheating	
Camera	Turn off if required	
Memory card	Remove from camera	
Propellers	Visual inspection, log changes	
Landing struts	Visual inspection, log changes	
Gimbal	Visual inspection, log changes	
Housing	Return UAS to case after inspection	
Flight log	Update flight log	

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 5:

JCF UAS LOST AUTONOMOUS FLIGHT PROCEDURE CHECKLIST

Actor	Action
Pilot	Verifies automated flight has stopped
Pilot	Verbally notifies spotter
Pilot	Pilot assumes control via RC, if possible
Spotter	spotter notifies other operations personnel
Pilot	Returns UAS to pre-determined landing area as safely practical
Pilot	Land UAS

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 6:

LOST RC CONTROL PROCEDURE CHECKLIST

Actor	Action
Pilot	Verifies lost link
Pilot	Verbally notifies spotter
Spotter	Verbally notifies other operations personnel
Pilot	Turns off RC controller
Pilot	Turns RC controller on
Pilot	If positive control returns, Pilot lands immediately
Pilot	If positive control does not return, Pilot alerts spotter
Pilot	Verifies that Return to Home function has engaged
Pilot/spotter	Verifies that landing area is clear, clear if necessary
Pilot	Upon UAS landing Pilot turns off battery immediately

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 7:

JCF UAS EMERGENCY ASSUMPTION OF CONTROL CHECKLIST

Actor	Action
Pilot	Verifies abnormal operation
Pilot	Verbally notifies spotter
Spotter	Verbally notifies other operations personnel
Pilot	Assumes control of UAS using RC
Pilot	If necessary, begin emergency landing at a safe location
Pilot	If practical, return UAS to pre-determined landing zone, execute landing

APPENDIX 'A' (CONT'D) TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Appendix 8:

JCF UAS Loss of Power/Motor

Actor	Action
Pilot	Attempt control the UAS to land in open, safe area
Pilot	Alert operations personnel of emergency situation
Spotter	Alert others to emergency situation
Pilot	Post flight, record details of flight for report

APPENDIX 'B' THE JAMAICA CONSTABULARY FORCE CORPORAL QUALIFYING SYLLABUS 2018
TO FORCE ORDERS NO. 3700 DATED 2018-05-03

The Jamaica Constabulary Force
Corporal Qualifying Syllabus 2018

INTRODUCTION

The **Corporal Qualifying Syllabus** was developed in accordance with the Jamaica Constabulary Force (JCF) Selection Procedure for Promotion Policy. It is envisioned that the assimilation of the material outlined in the syllabus will enable those aspiring to the job of Corporal to perform in the role. This syllabus is a professional development tool that all aspirants to Corporal can use as a personal guide, in accessing information critical to this supervisory position.

For efficiency in your preparation to perform this role, it is important to understand how the syllabus is arranged. The five (5) areas below are presented with sub-categories that are supported by specific reference material. This is followed by a description of the examinations and a guide to the abbreviations used in the references.

The syllabus will inform a multiple-choice and a written examination that complement the rest of the promotion selection process; wherein those members who are successful in the multiple-choice examination will move on to the written examination. **The examination process will assess attitudes; require candidates to recall facts and concepts; and to be able to identify, differentiate, explain and apply them. Candidates will also be required to develop and construct solutions and/or documents to demonstrate their understanding of this role.**

The syllabus is arranged around the following themes:

1. Supervisory Knowledge and Skills
2. Customer Relations Focus
3. Laws, Policies and Procedures
4. Investigation, Evidence and Court Procedures
5. Contemporary Issues

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

THEME ONE - SUPERVISORY KNOWLEDGE AND SKILLS	
AREAS OF FOCUS	REFERENCE
Station Duties and Supervision - Station records: management and accountability - Procedure for dealing with missing persons (appreciation of report, role of lead investigator, role of supervisor) - Treating with citizens reports - Responsibilities of the Station Guard/Officer (Supervision) - Property in police custody	F.O. 3194,3256, JCF S.O. Chap. 38(1); JPM Chap.4 pg 27-30 F.O. 3060 F.O. 3258; 3643; 3646; 3177 JPM Chap.4 pg 37-39; Basic Notes JCF S.O. Chap. 25; Chap. 38(1); F.O. 3344; 3349; 3355
Lock-Up Supervision and Prisoner Care - Care and Management of Prisoners - Prisoner admission and release procedure - Detainee record, identification and property - Cell security and the guarding of prisoners - Females and children in custody - Right to attorney, visit and medical attention - Responsibilities under the Legal Aid Act - Bail	Bail Act, 2000 – S. 3 & 4 Legal Aid Act and Regulations F.O. 3522
Leave - Types of leave: vacation, departmental, sick and no-pay leave - Procedures governing the application, grant, extension and accumulation of, locally and abroad	SOPS Chap. 7 F.O. 3204, 3617, 3669,3683, 3696 Book of Rules Rule 4
Discipline - Procedures for dealing with breaches - Conduct of members and deportment	F.O. 3080, 3144, 3258 Basic Notes JCF S.O. Chap. 13; 6 Book of Rules
Grievance procedures - Definition of a grievance - Grievable issues - The informal and formal grievance procedure - Cancellation of a grievance	F.O. 3536, 3537
Beat and Patrol Duties - Types and objectives of patrol - Supervision of personnel on patrol	Basic Notes

THEME TWO - CUSTOMER RELATIONS FOCUS	
AREAS OF FOCUS	REFERENCE
Community Based Policing Candidates should demonstrate an understanding of the philosophies, principles and practices of community policing.	JCF Manual for Community Policing (1 st Edition, 2008)

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

THEME TWO - CUSTOMER RELATIONS FOCUS	
Human Rights Use of Force and Firearms Candidates should have an appreciation of Human Rights issues and an in-depth knowledge of JCF use of force and firearms policy provisions	JCF Human Rights and Police Use of Force and Firearms Policy
Policies and Procedures - Anti-corruption Policy and Strategies - JCF Public Interaction Policy - JCF Policy on Diversity - Witness and Victim Care	JCF Anti-Corruption Strategy 2012-2015; F.O. 3449; 3467; 3501; 3512 F.O. 3337; 3627; 3485 (Amendment) F.O. 3351; 3400 CIB Manual

THEME THREE - LAWS, POLICIES AND PROCEDURES	
AREAS OF FOCUS	REFERENCE
Arrests - Purpose of an arrest - Powers of arrest (Statute & Common Law) - Arrest of military personnel - Procedure for dealing with arrest of foreign nationals - Diplomatic privileges and immunities	F.O. 3587 Basic Notes The Constabulary Force Act
Types of Assaults and Wounding - Points to prove offences - Police powers and procedures	Offences Against the Persons Act Basic Notes
Sexual Offences - Types: Incest, Sexual Grooming, Sexual Touching or Interference and Indecent Assault - Points to prove offences - Police powers and procedures	Sexual Offences Act F.O. 3562
Domestic Violence - Procedure for dealing with Domestic Violence - Police action for breach of Protection Order - Recording and reporting	Domestic Violence Act – S. 5 F.O. 3484 F.O. 3479
Threats - Definition of a threat - Police action in the event of a reported threat	F.O. 3649
Interaction with Children - Offences, police powers and procedures - Children in conflict with the law - Children deemed to be in need of care and protection - Children deemed uncontrollable - Children who are victims and witnesses	Child Care and Protection Act, 2004 – S. 6; 8 - 11; 15; 37; 39; 67 F.O. 3573

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

THEME THREE - LAWS, POLICIES AND PROCEDURES	
AREAS OF FOCUS	REFERENCE
Dangerous Drugs - Offences - Police powers and police procedures	Dangerous Drugs Act, 2015 – S. ;7(a-f); 8; 23; 24(1) Constabulary Force Act - S. 17-19, F.O. 3564
Firearms - Offences - Police powers and procedures	Firearm Act - S. 21; 23; 24; 25; 39; 40; 42 Law Reform (Zones of Special Operations) (Special Security and Community Development Measures) Act, 2017 – S. 42 (a - c)
Criminal Justice (Suppression of Criminal Organizations) - Definition of a criminal organization - Points to prove offences	The Criminal Justice (Suppression of Criminal Organizations) Act, 2014 - S. 3; 4; 6
Law Reform (Fraudulent Transactions) (Special Provisions) - Definition of identity information - Powers of search and seizure - Obtaining a benefit by menace	Law Reform (Fraudulent Transactions) (Special Provisions) Act, 2013 – S. 10;11;16
Larceny - Offences - Police powers and procedures - Larceny investigations	Larceny Act – S. 5 - 7; 13; 15; 18;19; 24; 34 - 37, 39 - 41, 42A; 62(1-3); 63(1&2) The Praedial Larceny (Prevention) Act – S. 11(1); 11(3); 14
Public Order - Definitions for political meeting, public marches and processions - Offences - Police powers and procedures	Public Order Act
Towns and Communities - Offences - Police powers and procedures - Dealing with the use of lewd lyrics and expletives by entertainers	Towns and Communities Act – S. 3(e); (j-o); 5(a, f, g, h); 6-8
Noise Abatement - Application procedures and obligations of organizers - Noise from private premises and public spaces - Liability of the owner of the premises and equipment	Noise Abatement Act – S. 3 - 4
Spirit Licence Opening and closing hours and offences	Spirit Licence Act – S. 34 - 36; 55 Basic Notes

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

THEME THREE - LAWS, POLICIES AND PROCEDURES	
AREAS OF FOCUS	REFERENCE
Road Traffic - Licensing of drivers - Production of drivers license to a Constable on request - Offences (Reckless/Dangerous Driving) - Breath Test - Restrictions from prosecution - Police powers (stop, search, arrest, seizure)	Road Traffic Act - S. 16; 22; 27; 32; 34 (a-b); 39 Constabulary Force Act - S. 19-22
Regulation of Traffic - Handling congestion - General responsibilities and powers	Basic Notes

THEME FOUR- INVESTIGATION, EVIDENCE AND COURT PROCEDURES	
AREAS OF FOCUS	REFERENCE
Investigating Accidents and Collisions - Procedures - General responsibilities - Notices of intended prosecutions - Inspection of documents	Road Traffic Act – S. 39 JCF S.O. Part V. Traffic Procedures pg 58 Basic Notes
Crime Scene Management Initial response, assessment and preservation of crime scene.	F.O. 3270
Sudden Death Investigation Police action and investigation of sudden death scenes.	F.O. 3476; 3605
Process - Types of warrants and summons - Procedure for dealing with warrants and summonses - Procedures for dealing with subpoenas	Evidence Act S. 59 JPM Vol 1 Chap. 9 Basic Notes
Guidelines for identifying suspects Methods of identification to include video	CIB Manual
Exhibits - Chain of custody, preservation and packaging, transmittal of evidence - Exhibit management	Basic Notes
Evidence - Rules (Taylor) - Admissibility - Types of statements - Competency of witnesses	Evidence Act - S. 4; 31(c); 31(g – i) JPM Vol. 1 Chap. 15 Basic Notes CIB Manual

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

THEME FOUR- INVESTIGATION, EVIDENCE AND COURT PROCEDURES	
AREAS OF FOCUS	REFERENCE
Case Management - Refusal of crimes - Roles and responsibilities - Vetting Officer	Crime Reporting and Case Management Policy CIB SOP 2010 F.O. 3259 CIB Manual
Judges' Rules (Revised) - Application of the rules - Use of warrants and Judges' Rules	Basic Notes CIB Manual F.O. 3274
Court Supervision Responsibilities of the Sub –Officer	JPM Vol 1 Chap. 14

THEME FIVE- CONTEMPORARY ISSUES	
AREAS OF FOCUS	REFERENCE
The Police Civilian Oversight Authority	The Police (Civilian Oversight) Authority Act, 2005
Human Trafficking - Identify offences - Police powers and procedures	The Trafficking in Persons - (Prevention, Suppression and Punishment) Act, 2007 - S. 2; 4; 14-15
Law Reform (Zones of Special Operations) (Special Security and Community Development Measures) - Arrest and detention - Persons held in custody	Law Reform (Zones of Special Operations) (Special Security and Community Development Measures) Act, 2017 - S. 16;17; 18
State of Emergency - Power to search premises - Power to stop and search vehicles - Power of questioning - Power of arrest and detention - Offences	The Emergency Powers (No. 2) Regulations, 2010 – S. 28 - 31; 32; 42
The Independent Commission of Investigations - Functions of the Commission - Offences under the Act	The Independent Commission of Investigations Act, 2010 - S. 4; 33

FORMAT OF EXAMINATIONS

Paper 1: Multiple-choice questions drawn from all areas of the syllabus. **ONLY** those members who are successful in the multiple-choice examination will move on to the written examination.

Paper 2: Questions on this paper will require both short and extended written responses about matters that are covered in the syllabus. At minimum, candidates are expected to be

Amended May 2018/1

6

APPENDIX 'B' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

familiar with the documentation and writing required at the rank of Corporal; some examples of which would be, minutes, reports, records and giving guidance to those being supervised regarding the appropriate information to be applied to specific situations.

The pass mark for each paper is 60%. Each paper contributes 40% to an individual's overall score; PMAS contributes the other 20%.

KEY TO ABBREVIATIONS/USE OF REFERENCE (References are grouped according to the areas of focus)

Criminal Investigation Branch	CIB
Force Orders	F. O.
Jamaica Constabulary Force	JCF
Jamaica Police Manual Vol 1	JPM Vol. 1
JCF Standing Orders	JCF S.O.
Performance Management and Appraisal System	PMAS
Staff Orders for the Public Service	SOPS
Standard Operating Procedure	SOP

APPENDIX 'C' MEDICAL ARTICLE – ASTHMA: FACTS AND FIGURES
TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Asthma: Facts and Figures

In recognition of the recent World asthma Day in May 2018, find below some general information on Asthma.

Definition- Asthma is a medical condition of the lungs characterized by narrowing in the lung airways (passages), lung hyper-reactivity to allergens, and lung inflammation. It is a chronic (long term) disease and usually causes recurrent (repeated) episodes of wheezing and shortness of breath.

Asthma affects more than 300 million people worldwide.

Asthma has no known cure.

Asthma is not usually diagnosed before 2 yrs of age.

Asthma can have varying severity.

General Symptoms- Coughing (coughing especially at nights is one of the earliest symptoms), Shortness of breath, chest tightness, wheezing(whistling musical sound made with breathing), chest pain.

Symptoms of Severe Asthma- Weakness, difficulty talking in complete sentences, breathlessness at rest , cyanosis(blue discoloration of lips and tongue), Difficulty with walking or lying down flat, Fast and labored breathing(ribs pronounced with breathing, nose opening wide with breathing.)

Triggers- Dust, pollen, weather changes, food allergies, emotional stress, pet dander, strong fragrances, smoke, cockroaches, strenuous exercise, viral illnesses.

Diagnosis- When a patient has the symptoms of Asthma they should visit their medical doctor to be evaluated. There are other medical conditions which may look like Asthma (Pneumonia, Bronchitis, Heart conditions, COPD-chronic obstructive pulmonary disease)

The diagnosis is mainly clinical- patient with history of repeated episodes of symptoms of asthma (cough, wheeze, shortness of breath) usually after exposure to a trigger. These symptoms are usually reversible (not permanent) and responsive to B-agonist medication(eg. Ventolin inhaler or nebulizer). The diagnosis is also supported if a patient has a personal history of other allergy related conditions like eczema, hay fever, allergic rhinitis and sinusitis. A family history of Asthma in a first degree relative (parent or brother or sister) is also supportive of the diagnosis of Asthma

Lung Function Tests can also be performed by Pulmonologist (Lung Disease Specialist) and are important in confirming the diagnosis of Asthma.

Management- The key elements to management of Asthma and any chronic medical condition are to have regular follow up appointments with your doctor, to consistently adhere to treatment medications, to become educated about the disease and to learn self monitoring.

For The Asthmatic regular follow up may require being seen every 2weeks or even more frequent visits initially when disease is uncontrolled; then frequency of visits may be significantly decreased once illness is under control to sometimes every 6 months or longer. At each visit patient compliance with medications should be assessed, review of inhaler technique should be done and evaluation of control made.

APPENDIX 'C' CONT'D TO FORCE ORDERS NO. 3700 DATED 2018-05-03

Asthma: Facts and Figures (Cont'd)

Patient should be regularly monitored at health care offices by Peak Flow Meter- which is a hand-held device used to determine lung function based on ability to blow air from lungs after maximum inspiration. Patients 6yrs and above can be taught to use Peak Flow Meter and should invest in purchasing these meters for self monitoring.

There are generally two main medications used in asthma maintenance therapy

1. **Preventor Medications**(eg. Becotide/Beclomethasone(Brown pump), Flixotide/Fluticasone (Orange Pump))- These prevent an asthma attack by decreasing the hyper-responsiveness of the lungs and by reducing lung inflammation. The medications are usually low dose steroid medications which are to be used daily with or without Asthma symptoms. These drugs are generally safe and can be used for long periods of time. These medication will not be of major benefit in reversing an acute attack, they work to PREVENT attacks by treating the underlying lung sensitivity.

2. **Rescue Medications**(eg. Ventolin/Salbutamol- Blue Pump))- These medications work to quickly open the narrowed airways to decrease asthma symptoms. They "rescue you from the attack." Salbutamol is the same medicine used in nebulization.

Other medications include Antihistamines like Montelukast(singulair), Loratadine(claritin/erolin), Cetirizine(cetrine)

In cases of more severe attacks, the patients are usually given oral steroids like Prednisone, Nebulization and may require Oxygen therapy

In some cases clients may benefit from chest physiotherapy

Patients with asthmatic attacks can be managed at the Medical Services Branch located at National Police College of Jamaica , Twickenham Park ,St. Catherine. For further information on Asthma, or to have your Asthma monitored contact us at ext. 69107/69103, or 7490470/7495268.

**APPENDIX 'D' JAMAICA POLICE CO-OPERATIVE CREDIT UNION LIMITED UPDATE
TO FORCE ORDERS NO. 3700 DATED 2018-05-03**

May 4, 2018

Notice of the Annual General Meeting

Notice is hereby given that the 64th Annual General Meeting of the Jamaica Police Co-operative Credit Union Limited (JPCCU) will be held on **Saturday, May 5, 2018** at 10 a.m. at the The Jamaica Pegasus Hotel, 81 Knutsford Boulevard, Kingston.

Mervin McNab
Secretary

CLOSURE NOTICE

Dear Members,

The Portmore Branch will be closed on **May 5, 2018** to facilitate our Annual General Meeting to be held at the Jamaica Pegasus Hotel.

The Branch resumes normal operation on **May 7, 2018** at its usual hours.

We Apologise for any inconvenience caused.

Sincerely,

Jamaica Police Co-op Credit Union Ltd.
