1.0 Introduction

Domestic Violence is among the societal issues we face in Jamaica. It occurs in various forms and may look different based on circumstances. Oftentimes, people fail to recognize that they are themselves victims of domestic violence and, more so, what steps to take if they find themselves in this unfortunate situation. The issue can become detrimental not only to the immediate parties, but also to the wider community. Effective management of reports of domestic violence is also critical in order to build and sustain confidence in the police.

The terms ‘domestic violence’ and ‘domestic abuse’ can be used interchangeably to describe the range of actions or omissions in relationships (including past relationships) where the perpetrator maintains power and control over their victim(s). Perpetrators’ actions may include physical, sexual, psychological, emotional or verbal abuses and threats, while omissions include but are not limited to confinement and or deprivation of physical, financial and personal resources. The impact of domestic violence/abuse can be extremely traumatic, and often, the victims suffer mental and psychological complications as well as a range of physical injuries and even death.

In Jamaica, spousal abuse and family violence/abuse are the most common forms of domestic violence/abuse. While both sexes are affected, women and girls constitute the majority of victims and men the main perpetrators.

The Jamaica Constabulary Force (JCF) acknowledges that, domestic violence has become a focal point of great concern. Consequently, the domestic violence protocols have been reviewed to incorporate a more contemporary and robust prevention and protection framework which treats with these issues from its first detection to the final resolution.
