Quality Management System Manual			
	Page 5 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

1.0 INTRODUCTION

The purpose of this Manual is to specify the Quality Management System (QMS) requirements to be used, for the Jamaica Constabulary Force's (JCF's) capability to consistently supply services to its customers. Principles presented in this Manual, guide all operations within the scope of ISO 9001:2015. While the Commissioner of Police (hereinafter referred to as CP) is responsible for quality on a Force-wide basis, every employee is responsible for quality and is expected to apply these principles to their work.

The processes are governed by several pieces of legislation to include but not limited to::

- ✓ The Constabulary Force Act
- ✓ Public Bodies Management Act (PBMA)
- ✓ Firearms Act
- ✓ Evidence Act
- ✓ Road Traffic Act
- ✓ Domestic Violence Act

This Quality Manual includes JCF's policy regarding quality, statement of the scope of the QMS, procedures established for the management system or reference to them, and a description of the interaction between the processes of the QMS in the form of a Macro Process Map (See Annex A).

2.0 QUALITY POLICY STATEMENT

The JCF:

- is fully committed to its role in addressing the safety and security needs of people in Jamaica. We have taken a solemn oath to maintain law and order as we serve the public through the protection of life & property, prevention and detection of crime and the preservation of peace. In doing so, we commit to the strict compliance with, and enforcement of laws and the rule of law;
- will ensure that its systems and processes will be continually improved to satisfy the changing demands of the dynamic landscape in which we operate.
- will train, develop and support our members to deliver efficient and effective service with the aim of satisfying stakeholders' expectations.
- recognizes that in order to actualize our vision of being a high-quality service organization, the organization must be committed to improve standards of service delivery, and customer experience through the effective use of technology, process approach to management and evidence-based decision-making;
- is committed to accomplish its strategic priorities and objectives with the purpose of continued advancement towards excellence in policing; and
- is dedicated with the constant effort to improve public confidence.

Quality Management System Manual			
Page 6 of 24		Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023

3.0 QUALITY MANAGEMENT SYSTEM SCOPE

The JCF has established a Quality Management System (QMS) that includes all activities relating to the ***“provision of crime investigation services, community intervention and mediation services, station services, generation of official reports, and patrol and emergency response services”***.

3.1 Applicable sites:

The QMS scope applies to the following locations:

- a. The Commissioner’s Office (Headquarters) located at 105 Old Hope Road, Kingston 6,
- b. Police Emergency Command Centre located at 103 Old Hope Road, Kingston 6
- c. Matilda’s Corner Police Station located at 115 Old Hope Road, Kingston 6.
- d. Duhaney Park Police Station located at 1-3 Sutcliff Avenue, Duhaney Park, Kingston 20.
- e. Half Way Tree Police Station, 142 Mayfield Avenue, Kingston 10
- f. Constant Spring Police Station, 2 Cassava Piece Road, Kingston
- g. Olympic Garden Police, Olympic Way, St. Andrew
- h. Seaview Gardens Police, Mediterranean Sea Drive, Kingston
- i. Greater Portmore Police Station, 1 Braeton Parkway, Portmore, St. Catherine
- j. Hunts Bay Police Station, 236 Marcus Garvey, St. Andrew
- k. Criminal Investigations Branch Headquarters (CIB), South Tower, 2 Oxford Road, Kingston
- l. Criminal Records Office, 56 Duke Street, Downtown, Kingston

Other support processes such as Property Management and Maintenance and Fleet Management are located at 2nd Floor, NCB South Towers, 2 Oxford Road, Kingston 5, and 2 Tom Redcam Drive, Kingston 5 respectively.

3.2 Applicability of the ISO 9001:2015 standard:

All clauses of the standard are applicable to the processes and services provided to the JCF’s stakeholders.

4.0 CONTEXT OF THE ORGANIZATION

The High Command is responsible for the Risk Management Programme which is guided by the Risk Management Policy and Procedure. The JCF uses two approaches to integrate risk management into its processes and operations. Firstly, JCF uses a SWOT Analysis to determine its strengths, weaknesses, opportunities, and threats. The SWOT analysis is used to understand the internal and external landscape to develop robust risk response strategies. Secondly, the JCF determines its external and internal issues relevant to its purpose and its strategic direction to narrow its focus on

Quality Management System Manual			
	Page 7 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

risks under its control. The High Command identifies these risks, which are analyzed and evaluated, and risk response strategies are developed and communicated to the relevant Formation Commanders. The Formation Commanders are responsible for implementing risk responses strategies. The effectiveness of the strategies is reviewed by the Portfolio Heads and the results presented at the Quarterly Reviews. Important to note, the Divisional and Station Commanders are required to conduct their own risk analyses in order to understand their own geographic or situational profile to develop appropriate policing strategies.

4.1 Overview of Responsibilities

The High Command is responsible for:

- a) identifying the processes needed for its QMS and their application throughout the Force (in this quality manual and related documentation, and pictorially in the QMS Procedure Manual);
- b) determining the sequence and interaction of these processes;
- c) determining criteria and methods needed to ensure that both the operation and control of these processes are effective;
- d) ensuring the availability of resources and information necessary to support the operation and monitoring of these processes;
- e) continuously monitoring, measuring, and analyzing these processes, and
- f) implementing actions necessary to achieve planned results and continual improvement of these processes.

These processes are managed in accordance with the requirements of ISO 9001:2015.

4.2 Responsibility and Authority

An overview of responsibilities and authorities is as indicated in the Organizational Chart. Key executive management responsibilities are as follows:

i **Administration and Support Services Portfolio** - headed by a Deputy Commissioner of Police

This portfolio oversees the administrative functions in the JCF and provides related policy and procedural guidelines. It seeks to produce organisational efficiency and effectiveness from the strategic and operational level, through the enforcement of rules and regulations for administrative and operational processes and procedures. The portfolio directly supervises the Administration; Recruitment and Training; Finance; Medical Services; Chaplaincy Service; Branches and the Human Resource Management & Development Division

ii **Strategic Operations Portfolio** – headed by a Deputy Commissioner of Police

Quality Management System Manual			
Page 8 of 24		Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
Revision Number: 1		Approved By: Commissioner of Police	Last Revised: N/A

This portfolio provides strategic direction for frontline services. It also coordinates and monitors operational strategies and resources to improve strategy interpretation and the timely execution of operational initiatives within all five geographic areas. A major responsibility for this portfolio is also the planning and coordination of security arrangements for major events. In addition to the five geographic areas, the Public Safety and Traffic Enforcement Branch (PSTEB); Special Operations Branch; the Marine, Canine, and Mounted Troop divisions all report to this portfolio.

iii. **Force Development and Logistics Portfolio- headed by a Deputy Commissioner of Police**

This new portfolio provides executive leadership of the developmental and reform efforts of the JCF. It is concerned with establishing effective logistics and asset management capabilities within the organization. The FDLP is positioned to give oversight to organization wide projects and ensure sustainable implementation of the development agenda. The portfolio has superintendence of the following Branches: Technology; Planning, Research and Development; Services; and Procurement functions.

iii **Crime and Security Portfolio– headed by a Deputy Commissioner of Police**

This portfolio has primary responsibility for providing strategic oversight and policy direction to the Criminal Investigation Branch (CIB), Security and Intelligence Branch, and the Counter Terrorism and Organized Crime Investigation Branch (C-TOC). The portfolio supports crime prevention efforts by developing strategies to improve organizational intelligence and investigative capabilities to solve crimes and place strong cases before the courts. It provides leadership in advancing new technologies and techniques in intelligence and investigation, as well as the training and equipping of the detective corps to undertake complex criminal cases.

iv **Inspectorate and Professional Standards Oversight Bureau - headed by an Inspector General**

As the quality assurance arm of the JCF, the Inspectorate and Professional Standards Oversight Bureau (IPROB) has the responsibility to monitor compliance with prescribed organisational standards at all levels. This portfolio also provides advice to the High Command on issues of ethics and integrity. Additionally, IPROB serve as the JCF's main

Quality Management System Manual			
	Page 9 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

liaison with external oversight bodies and investigates and reports on specific breaches of the Force's policies and guidelines.

All JCF personnel are responsible for the quality of services offered to the customers and have the mandate to achieve compliance to statutes, and to protect and serve stakeholders. This mandate is summarized in the Quality Policy which is communicated to all employees.

4.3 Organizational Chart

See Annex A for Organisational Chart

4.4 Overview of Processes

Outsourced Process

Note: JCF does not outsource any of its processes directly associated with service delivery.

4.5 Sequence of Interaction of Processes

See Annex B for Macro-Process Map

4.6 Understanding the needs and expectations of interested parties

Due to their effect or potential effect on the Force's ability to consistently provide services that meet customer and applicable statutory and regulatory requirements, JCF in its Stakeholder Analysis Procedure determined its interested parties and their requirements. JCF determines the frequency and methodologies for monitoring and reviewing information about these interested parties. *Information derived from Stakeholders' Analysis and levels of customers' satisfaction is evaluated at the Performance Review.* The information from the analysis of the stakeholder needs and satisfaction is done at the Performance Review.

5.0 LEADERSHIP

5.1 Management Responsibility: Throughout this Manual, the term 'Top Management' refers to the strategic layer called the High Command which is led by the Commissioner of Police and includes the Deputy Commissioners of Police and the Inspector General. The tactical layer includes the Executive Management Board which includes Branch and Area formations which are geographic and non-geographic in nature. Geographic formations deliver the services outlined in the scope directly to the customers while the non-geographic formations provide support services to the service delivery formations. The operational layer consists of Divisional, Station and Unit Commanders.

	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

5.2 Leadership and commitment

The High Command is committed to the maintenance of this QMS. The QMS is continually assessed using performance reviews, internal audits, executive branch meetings, and its corrective action system with the intent to continually improve its effectiveness. The High Command communicates to all members the importance of meeting customer as well as legal, statutory, and regulatory requirements through station lectures, briefings, and meetings; Force Orders; emails; social media; newsletters; circulars and posting information on the notice boards. The Quality Policy is disseminated and communicated at all levels within the JCF, and the strategic priorities and objectives are deployed throughout the Force as appropriate.

5.3 Customer Focus

Top Management has established processes to ensure that customer requirements are determined and met throughout the Force with the aim of enhancing satisfaction. These processes include logging customer requests, complaints, and feedback. Annual research is conducted by the PRDB to determine the level of customer satisfaction. Additionally, stations receive real-time feedback daily using its JCF station feedback system. The feedback is reviewed by management to improve the processes. The JCF receives complaints about dissatisfactory service or breaches by police, and the IPROB uses its Complaint Management Procedure to guide its investigations and responses. All complaints are logged and addressed. The results of the investigation are communicated to the customer. All trends in complaints are included in the JCFs corrective action system. Complaint trends are reviewed by High Command.

5.4 Quality Policy

5.4.1 Establishing the quality policy

The Commissioner of Police issued the Quality Policy throughout the Force. The JCF Quality Policy is appropriate to the organization's mandate and purpose and provides a framework for establishing and reviewing quality objectives.

5.5 Communicating the JCF Quality Policy

The High Command ensures that appropriate communication processes are established within the Force. All policies and directives, including the JCF Quality Policy is issued force wide using Force Orders. The JCF Quality Policy is also included on JCF Docs¹ and posted at strategic points at the various sites. The JCF Quality Policy is communicated in Tasking Meetings, briefings and station lectures at the operational level. All personnel are made aware of the policy through sensitization sessions.

¹ JCF Docs is the central repository for all policies, SOPs, forms, directives, and legislations.

Quality Management System Manual			
	Page 11 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

6.0 PLANNING

6.1 Actions to address risks and opportunities

The High Command develops a strategic plan and used risk assessment approach to:

- identify the internal and external issues that may affect the strategic objectives;
- establish the impact of change on the current system;
- evaluate the risks and decide on measures to safeguard against same;
- note significant findings; and
- review associated policy/procedure and update if necessary.

The Planning and Performance Management SOP guides the planning process. The Risk Management Policy and SOP governs the risk assessment process.

The planning process occurs at three layers: the strategic, tactical, and operational layers. The strategic layer includes developing the vision and strategic direction of the Force. The output of this process is the Strategic Policing/Corporate Plan and the JCF's Annual Plan. JCF's Annual Plan includes both the Strategic Plan, and the splinter Portfolio Plans. The tactical layer includes the Branch and Area Commanders. They develop Area and Branch Plans which are presented to the Portfolio Heads. The operational layer develops their divisional, station, or unit plans which are presented to the Area or Branch Commanders to who they report.

6.2 Quality objectives and planning to achieve them

The planning of the Quality Management System is facilitated via a three-year Corporate Plan, a strategic business plan, an Annual Operational Plan, Portfolio plans, Divisional Plans, Branch plans and Unit Plans. The objectives are developed based on the strategic priorities and the mandate of the National Security Ministry and the needs of the interested parties. The JCF sets up a planning mechanism to ensure that the objectives are communicated and deployed at all functional levels. Risks to the objectives are assessed and risk response strategies developed, implemented, and monitored for effectiveness. The planning process is guided by the Planning and Performance Management policy and procedure. All strategic objectives are approved by the Commissioner of Police.

6.3 Planning of changes

Major changes to the QMS include but are not limited to major projects, integration of new technologies, new laws and legislations and integration of new processes and formations. Once a change is identified, it is managed through the projects of the Force Development and Logistics Portfolio (FDLP). Change ambassadors are incorporated into all projects of the JCF to increase the likelihood of success.

7.0 SUPPORT

7.1 General provision of resources

The JCF determines and provides the resources needed for the satisfactory delivery of service. The Portfolio Heads ensure that there are adequate personnel, equipment and communication resources

Quality Management System Manual			
Page 12 of 24		Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
Revision Number: 1		Approved By: Commissioner of Police	Last Revised: N/A

for each formation. The operational and EMB meetings are used to discuss resource needs and mobilize resources where necessary. The FDLP is responsible for providing on-the-ground logistical support to all Divisions.

7.2 People

The High Command ensures the effective and efficient operation of service realization and support of processes and the associated process network, so that the Force has the capability required to satisfy its stakeholders. The strength of a formation is examined on an annual basis to determine adequacy, and continually assess and develop the capability for delivering the services to its stakeholders. The Administration Portfolio is responsible for ensuring that adequate members are recruited to ensure adequate strength are available for the various formations.

7.3 Infrastructure

The JCF endeavours to provide a work environment that is suitable for all employees. Planning of new, and/or modification of existing infrastructure and facilities are usually conducted in conjunction with new policy programmes and/or work force changes. The Technology Branch, Property Management and Maintenance Division (PMMD), and the Transport Management and Maintenance Division (TMMD) are responsible for identifying the needs and requirements for new or modified facilities and equipment. Requests for significant changes or expansions of facilities and acquisition and/or disposal of vehicles are submitted to the Deputy Commissioner of the FDLP for review and approval. Consideration is given to the following areas:

- (a) Communication and network services – the Technology Branch is responsible for the maintenance of the communication and systems network of the JCF. The data centre is used to manage and store all incoming communication to the JCF. The ICT Division develops software used to manage the Forces' operations. It also ensures that systems networks are protected from internal or external penetrations.
- (b) workspace and associated utilities – maintenance of work environment and facilities is performed by specific Formations or approved contractors. This includes regularly scheduled maintenance of electrical, plumbing, air conditioning systems, landscaping, and cleaning. The PMMD conducts inspection of facilities and upgrade or repair facilities to prevent deterioration of the facilities. Other Repairs to the building and similar facilities are done upon request through its help desk. The PMMD is responsible for coordinating and managing maintenance contracts
- (c) fleet management services - TMMD provides fleet management and maintenance services. The Division is responsible for servicing and repair activities for all service vehicles. Through its Amber Connect capability, the vehicles have a tracking system that enables TMMD to track the handling and condition of each service vehicle.

Last Revised: N/A

7.4 Environment for the operation of process

The JCF is committed to a cohesive, conducive and inclusive environment where each individual feels a part of the team and valued for his/her uniqueness and contribution. The Chaplaincy, Medical and HR Units of the Administration Portfolio develop programmes necessary to support the physical, psychological and social needs of its members. Policies exist to manage all forms of harassment or prejudice and to ensure conflict resolution. Relevant workplace policies are implemented through training and awareness programs, and where necessary, disciplinary actions. Health and safety management is integral to the Quality Management System.

7.5 Monitoring and Measurement of Processes

All quality system processes of the JCF are monitored, and where applicable, measured. These measurements are designed to demonstrate the ability of the process to achieve planned results. The Branch Commanders at intervals monitor and measure the performance of processes they are responsible for and take corrective actions. The performance of the processes is further assessed using:

- Internal audits of the Quality Management Systems.
- Monitoring trends in corrective and preventive action requests.
- Analyzing service conformity and other key performance data and trends
- Measuring and monitoring customer satisfaction

7.6 Monitoring and Measurement of Services

In its efforts to ensure that service requirements are met, the JCF monitors and measures service characteristics at appropriate stages during the service delivery process.

- Crime Investigation Services monitored through its Case Management System (CMS)
- Patrol and Emergency Response measured through its Computer Aided Despatch (CAD) System and OpsInsight
- Community Intervention monitored using Station Diary
- Station Services monitored through OpsInsight

Evidence of conformity with the acceptance criteria is established. Services are released to the customer only after all specified activities have been completed and conformity of the product has been met or approved.

7.7 Organizational Knowledge

The JCF is aware that the retention of institutional knowledge is critical for its growth. This knowledge is maintained and made available to the extent necessary – internally, from documented results of improvements in processes and services, and externally, from knowledge gathered from customers or suppliers and other stakeholders. Personnel from time to time attend conferences and training sessions and are therefore required to share information with the rest of the Force. JCF ensures succession planning is done to ensure continuing viability and sustainability. JCF also

	Page 14 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

conducts analysis of its projects' successes and failures to improve future projects.

7.8 Competence & Awareness

Personnel performing work affecting service provision are competent based on appropriate education, training, skills and experience. See JCF Staff Training and Competence Records.

- Formation Commanders are responsible for ensuring that the requisite resources are available within their Sections i.e., the technical skills, knowledge, ability, equipment, technologies and services required to fulfill the service delivery and for identifying and providing any training or skills enhancement which the Section may require.
- Competence for personnel performing work affecting services are documented in the job descriptions.
- Training needs may also be identified, and the training planned and coordinated by the National Police College of Jamaica (NPCJ).
- The training is evaluated to determine its impact.
- JCF ensures that its personnel are aware of the relevance and importance of their activities and how they contribute to the achievements of the Force.
- Station lectures are used to sensitize personnel on policies and SOPs.
- Records of education, training, skills and experience are maintained on personnel files.

The JCF provides or supports the following categories of training and awareness programs:

- **Training at Recruitment** - provided to all new employees during their induction to the Force. For enlistment, applicants satisfying prerequisites sit an entrance examination and those successful are further processed through interviews, deep vetting, physical and medical examinations, and the decision of a selection panel.
- **External training**- External seminars, conferences, and courses provided to individual employees on an as-needed basis.
- **Internal training**- In-house training sessions provided to all employees as the needs arise.
- **Skills training** - in customer service, and professional development (values & attitudes) where appropriate.
- **PMAS** – during the annual individual appraisal process, the training needs of each member are identified and recorded on their PMAS form by their immediate supervisor.

7.9 Communication

7.9.1 Internal Communication

Top Management ensures that appropriate communication processes are established within the Force and that communication takes place regarding the effectiveness of the Quality Management System at weekly, monthly and quarterly meetings. Frontline members meet at briefing and debriefing sessions, case reviews, police radio communications, Force Orders, and social media. Strategic plans, operational plans and individual work plans are additional resources to

Quality Management System Manual			
	Page 15 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

communicate targets and ensure that personnel are aware of expectations of the executive management.

7.9.2 Management commitment to communication

Top management has provided evidence of commitment to the development and implementation of QMS and continually improves its effectiveness by:

- communicating to all employees the importance of meeting customer as well as legal, statutory and regulatory requirements through staff meetings, emails, newsletters and posting information on the Force's notice boards;
- disseminating and explaining the quality policy at all levels within the Force;
- establishing and deploying quality objectives throughout the Force as appropriate;
- conducting management reviews; and
- ensuring the availability of resources

7.10 Documented information

The JCF has established, documented, implemented and maintains a QMS and continually improves its effectiveness in accordance with the requirements of ISO 9001:2015. The JCF Policy on the Management of Policies and Standard Operating Procedures outlines how policies and procedures are created, updated, approved and protected. JCF Docs is the repository of all policies and procedures. Each formation has its own folder on the JCF's network server, that has its documents to be shared with its team. The JCF also develops software and databases to manage its data and information.

7.10.1 Creating and updating

JCF creates and updates documented information as required.

All documents are identified through an established version control method (e. g. Title, issue date, revision date and reference number) and formatted (e.g. language, software version, graphics) as appropriate on the relevant media (e.g. Paper, electronic). The JCF Policy on the Management of Policies and Standard Operating Procedures requires review and approval for suitability and adequacy using the document change request.

7.10.2 Control of documented information

The Quality Management System Documentation include:

- documented statements of the governing policies and procedures. All policies and procedures are classified in various categories to allow for easy access and retrieval;
- this Quality Manual;
- processes for document control, records management, internal auditing, control of nonconforming product, corrective and preventive action and other documents needed to ensure the effective planning, operation and control of JCF's processes as listed in the *JCF Master Document Index*; and

Quality Management System Manual			
	Page 16 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

- d) records required to support the effective operation of the management system and identified in the various process documents for which they are created.

7.10.3 Control of Documents

Documents required by the Quality Management System are controlled. Any changes must be approved by the relevant process owner prior to issue.

7.10.4 Control of Records

Records have been established and maintained to provide evidence of conformity to requirements and of the effective operation of JCF's quality management system. Care is taken with paper records to ensure that they remain legible, readily identifiable, and retrievable.

7.10.5 List and reference to procedures

Reference is made to the following documents in whole or in part in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendment) applies.

For Standard Operating Procedures (SOP) please refer to the Master Document Index.

8.0 OPERATION

8.1 Operational planning and control

The Force's High Command rationalizes personnel to ensure optimal distribution of staffs. The Branch and Divisional Commanders assesses its strength and mobilize human resources to meet the relevant service requirements. JCF forecasts demands based on: (a) geographic profile (b) crime levels, (c) hotspots (d) seasonal changes for e.g., Christmas, and (d) unusual or unique situations for e.g., elections.

8.2 Requirements for services

The JCF understands that the public's main requirements for its services are:

- turnaround time for station services
- response time to calls for service
- quality of investigation of reported crimes
- appropriate levels and quality of interventions for community and individual intervention services required
- Turnaround time for Issuance of Police Certificates

The obligatory needs of the clients include meeting local security and safety requirements. Most persons requesting the services of the police experience high levels of emotional distress therefore the police respond to unique circumstances of the customer. All core processes are guided by the relevant standard operating procedures available on JCF Docs, and through Weekly Force Orders.

Quality Management System Manual			
	Page 17 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

Records of all work are retained and kept secure to ensure protection of information.

8.3 Customer communication

The Force has determined and implemented effective arrangements for communicating with customers. The CCU is responsible for developing the content for Force's brochures, information flyers, internet site, and other forms of information material. Stations are responsible for communicating product information to the customer. Where the feedback constitutes a complaint, the appropriate mechanism is employed to route those to IPROB which also receives complaints directly. The JCF determines response to the customer to ensure resolution within reasonable time and, when appropriate, determines what corrective or preventive actions should be implemented. This Quality Management System assists in improving interaction with citizens by streamlining and simplifying internal procedures so that the Force can respond in a timely manner. The Force has developed quality standards to ensure the highest possible levels of service in the shortest possible time, whilst seeking to achieve the mission, vision, and communicating and upgrading the various services of the Force.

8.4 Determining and reviewing the requirements for services

JCF determines the needs of the services through the Reception Area/Guard Room that appreciates reports and requests and facilitates service delivery. The delivery of the service is monitored by the Commanders/Shift Supervisor to ensure that the police comply with the relevant policies and SOPs.

- For emergency response services, all records are maintained in the CAD system.
- For patrol services, patrol logs are retained on the OpsInsight or hard copy records
- For Crime Investigation services, activities and the progress of investigations are included in the case files
- For intervention services, records of requests and or delivery are included in the station diary

8.5 Changes to requirements for services

If there are changes to the requested service, stations/formations maintain record of the change.

- For emergency response services, all records are maintained in the CAD system.
- For patrol services, patrol logs are retained on the OpsInsight or hard copy records
- For Crime Investigation services, changes are included in the case files
- For intervention services, all records are included in the station diary

8.6 Control of externally provided process, products and services

8.6.1 General

JCF conforms to the GOJ Public Procurement guidelines 2018 which is used to govern externally provided products and services. JCF procurement controls govern externally provided processes, products and services. The main products and services provided to JCF include:

- (a) Servicing of vehicles
- (b) Building contract services

Quality Management System Manual			
	Page 18 of 24	Document Number: JCF/FW/MAN/Mgt/0005/2021	Issue date: November 16, 2023
	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

(c) Telecommunication Services

Control of outputs services are done:

- a) through implementation of corrective and correction actions ;
- b) segregation of non-conforming staff through its disciplinary processes,
- c) applying risk mitigating strategies to reduce the needs for containment of products and services,
- d) informing the customer;
- e) obtaining authorization for certain products or services to be delivered.

The JCF develops criteria for the evaluation and selection. The procurement documents are prepared by the relevant formations and submitted to the Procurement Unit for approval for purchase. The recipient formation monitors the performance of the external providers as required. JCF retains documented information of these activities and any necessary actions arising from these evaluations.

8.6.2 Type and extent of control

The JCF assesses the potential impact of the externally provided processes, products and services on its ability to consistently meet customer needs. JCF maintains contract of the service requirements and verifies whether they are meeting the needs of JCF.

8.6.3 Information for external providers

JCF communicates with all external providers its requirements for products and services to be provided through established contracts and periodic meetings.

8.6.4 Service provision

8.6.4.1 Control of service provision

Processes for provision of services are planned and carried out under controlled conditions in the divisions and stations. JCF ensures that SOPs are provided to govern the execution of all elements of service delivery. Frontline personnel are trained on their respective procedures and continually monitored to ensure compliance to the quality specifications. The Compliance Officers and Commanders are responsible for carrying out quality checks to ensure the service is delivered and they are in compliance to policies and regulations.

8.6.5 Identification and traceability

Identification is done using numbers unique to the service.

- For emergency response services, traceability of all calls is maintained in the CAD system.
- For patrol services, traceability is maintained based on date and shift times and are recorded in patrol logs which are retained on the OpsInsight or hard copy records
- For Crime Investigation services, each case file has unique identification features to provide traceability for all activities and evidence retained.
- For intervention services, dates and times are recorded in the station diary

Quality Management System Manual

	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

- For issuance of Police Certificates traceability of records is maintained in the Police Certificate Application Management System (PCAMS)

8.6.6 Property belonging to customers or external providers

The Force exercises care with customer property from the time of initial interaction to follow up receipt, through storage, assessing, inspection, auditing and return of customer property. Documents which are considered customer property are identified, verified, protected and safeguarded using the documented handling techniques. If any customer property is lost, damaged or otherwise found to be unsuitable for use, this is recorded and reported to the customer.

Types of customer property that the JCF may take into its custody includes but however is not limited to, personal information, pictures, signatures, and addresses.

For emergency response services, customer property includes names and personal contact information.

For patrol services, information for customers include personal contact information, addresses.

For Crime Investigation services, information include witness statements, personal information

For intervention services, all records are included in the station diary

8.6.7 Preservation

JCF preserves all the outputs of goods (especially official reports) and services from production to delivery, through established standards and procedures. Its policies and procedures for monitoring and auditing serve as quality control mechanisms to ensure conformity to standards and quality objectives. During service provision. Outputs of the processes include completed records maintained in the OpsInsight, case files, CAD system, Station Diary and PCAMS.

This preservation of service is maintained through access control, chain of custody, approval authority and records management and security.

8.6.8 Post-delivery activities

The JCF conducts follow up at various points of the service delivery process.

- For emergency response services, follow up is done with the Patrol team by PECC and patrol supervisors to ensure that the service has been delivered as required.
- For patrol services, debriefing sessions are used to determine any necessary follow-up, and records are retained.
- For Crime Investigation services, detectives continuously follow-up until the case is handed over to the prosecutor.
- For intervention services, follow-ups are done with various communities based on their needs.

8.6.9 Control of changes

Changes to the service are done from time to time

	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

8.6.10 Release of products and service

JCF's quality assurance is implemented in the various processes to ensure service delivery according to the policies and procedures.

- For emergency response services, quality checks are done through supervisors listening of live calls and recording the performance of each call taker.
- For patrol services, quality checks are done at the end of each shift at the debriefing sessions.
- For Crime Investigation services, quality checks are done through inspections each quarter.
- For intervention services, quality checks are done through certification of the station diary
- For issuance of Police Certificates, quality checks are done through verification by supervisors

8.6.11 Control of nonconforming outputs

Whenever exceptions or deviations occur, Commanders respond with the appropriate actions. JCF retains documented information in the Station Diary. If trends exceed the required defect level, Commanders, describes the deviation and prescribes the actions to be taken.

9.0 PERFORMANCE EVALUATION

9.1 Monitoring, Measurement, Analysis and Evaluation

General

The JCF continually monitors, measures, analyzes, maintains, and improves its processes to demonstrate conformity to requirements and effectiveness of the quality management system.

The Force plans and implements the monitoring, measurement, analysis, and improvement processes needed:

- a) to demonstrate conformity of the services provided (through its various official records),
- b) to ensure conformity of the QMS (e.g., internal audits, performance indicators, customer satisfaction measures); and
- c) to continually improve the effectiveness of the QMS (e.g., corrective and preventive action, management review).

Data entered as a result of the Force's processes is analyzed and summarized into reports and graphs which are used to demonstrate compliance and/or achievement of objectives, and opportunities for continual improvement.

Quality Management System monitoring, and measuring includes:

- Customer Perception Research
- Internal Stakeholder perception research analysis

Quality Management System Manual

- Quality Management System (Internal Audit, inspection and unannounced visits)
- Continual improvement
- Corrective Action
- Preventive Action
- Control of non-conformities

9.2 Customer satisfaction

The Force reviews customer satisfaction feedback information to ensure that customers' requirements are met. This information is incorporated into the management reviews, corrective/preventative action system. Additionally, the Force monitors information relating to customers' perception as to whether the Force has met their (customers') requirements.

The PRDB is responsible for developing suitable indicators of customer satisfaction, and for defining methods for collecting and analyzing the pertinent information. Customer complaints, spontaneous expressions of satisfaction, and other unsolicited customer feedback are collected through a web-based portal available to the FDLP for processing and tracking. Methods of obtaining and using customer satisfaction and/or dissatisfaction information may include the following:

- Customer complaints
- surveys
- Direct customer communication
- Customer visits

9.3 Analysis of Data

The Force collects and analyzes appropriate data to demonstrate the suitability and effectiveness of the quality management system. The analysis includes data generated because of monitoring and measurement or any other relevant sources.

The data may include:

- Results of internal audits
- Trends of processes and service delivery including opportunities for preventative action
- Service improvement
- Conformance to service requirements/criteria
- Customer Feedback

The data analysis shall provide information relating to:

- Customer satisfaction
- Conformity to service requirements
- Characteristics and trends of processes and service.

Records of this analysis are maintained.

9.4 Internal audit

Internal audits are conducted at planned intervals to determine whether the quality management system conforms to the planned arrangements, to the requirements of ISO 9001:2015 and to the established JCF governing policies and SOPs and is effectively implemented and maintained. An internal audit is conducted at least annually. Audit includes audit, compliance inspections and unannounced visits.

9.4.1 Internal Audit Planning

An audit plan is prepared and circulated for each audit two to three weeks prior to the audit. The audit plan defines the audit criteria, scope and method. The plan is circulated to the relevant personnel.

9.4.2 Auditor Selection, Training & Evaluation

JCF either selects qualified external auditors or trains employees as internal auditors to conduct each audit. Selection is done to ensure objectivity and impartiality of the audit process. Auditors do not audit their own work. Auditors are trained and competent (at minimum, auditors complete at least sixteen hours of training and at least one audit under the supervision of a competent auditor).

The performance of auditors is evaluated after each audit in which they have participated. Actions for improvement are recommended as is necessary (This recommended action may feed into the Force's training plan). The Audit Manager is responsible for coordinating all audit activities and ensuring the preparation of the final report. Lead Auditors are assigned and convene a pre-audit meeting where the audit teams review the procedures, elements to be audited and previous audit results prior to the audit. They formulate their specific approach to ensure that the procedures, work instructions, personnel, and process being audited enhance the QMS. At the audit, auditors conduct the audit against the audit criteria and document all the findings. The Lead Auditor communicates the findings to the EMB and the closing meeting and then compiles the audit report (All handwritten notes become a part of the audit and are filed with the closed audit reports). The report is circulated to the EMB. All non-conformities identified are documented in a corrective action request and issued to the relevant Branch Commanders. The Lead Auditors may be asked to evaluate correction action for implementation and effectiveness.

9.5 Corrective Action

The relevant Branch Commanders indicate the action/s to be taken to close-out the non-conformity(ies) after conducting root cause analysis. They ensure that the action(s) is/are taken within the stipulated timelines. The corrective action process should follow/ be in keeping with the Corrective Action procedure. The relevant Branch Commanders and Audit Coordinator monitor the implementation of corrective actions while the Audit Coordinator or designate verifies their effectiveness each quarter and reports to the Performance Review.

	Revision Number: 1	Approved By: Commissioner of Police	Last Revised: N/A

9.6 Management review

The High Command will, at planned schedules, review data relating to internal audits, products, services, customer complaints, status of corrective action and risk management to ensure timely response and improvement. Management Review is carried out via a series of meetings that covers all the relevant inputs and outputs listed below.

9.6.1 Management review inputs

The review inputs are:

- a) the status of actions from previous management reviews;
- b) changes in external and internal issues that are relevant to the quality management system;
- c) information on the performance and effectiveness of the quality management system, including trends in:
 - 1) customer satisfaction and feedback from relevant interested parties;
 - 2) the extent to which quality objectives have been met;
 - 3) process performance and conformity of products and services;
 - 4) non-conformities and corrective actions;
 - 5) monitoring and measurement results;
 - 6) audit results;
 - 7) the performance of external providers;
- d) the adequacy of resources;
- e) the effectiveness of actions taken to address risks and opportunities
- f) opportunities for improvement.

9.6.2 Management review outputs

The outputs are:

- a) opportunities for improvement;
- b) any need for changes to the quality management system;
- c) resource needs.

JCF retains minutes and action plans for the quarterly performance reviews. The performance review is guided by the JCF's Policy and SOP for Planning and Performance Management.

10.0 IMPROVEMENT

JCF identifies opportunities for improvement and implements actions to improve the system. JCF seeks to continually improve the effectiveness and efficiency of the business processes and related activities, rather than wait for a problem to reveal opportunities for improvement. Improvements range from small steps of ongoing continual improvements to strategic breakthrough improvement in products and new processes.

The effectiveness of the QMS is continually improved through the use of the:

- quality policy to allow for the commitment to quality is seen and understood by our clients, suppliers and employees;
- review of quality objectives to support the overall Force's planning goals
- review of audit results , and performing requested corrective actions
- analysis of data as a means for facilitating decision making.
- corrective and preventive actions to provide a means of revising areas of weakness and identify actions needed for improvement.
- performance review as a means of routinely reviewing performance and taking action when goals are not met.
