1. INTRODUCTION

- 1.1 The National Police College of Jamaica (NPCJ) is cognizant of its role as a tertiary law enforcement training institution at the pinnacle of excellence in the region. Thus, its ability to demonstrate quality in the design and evaluation of training is of great importance.
- 1.2 The Training Impact Evaluation (TIE) is a device geared towards measuring the behaviour of participants as a result of their engagement in a training programme. In so doing, the TIE provides opportunities for the NPCJ to collate and compare information so that firm conclusions can be drawn and decisions can be made. It further identifies what needs to be done in the training design process to enhance the deliverables of training and the application of information ascertained during training in the daily job performances of participants.

2. PURPOSE

- 2.1 This document describes the TIE process and strategies for assessing the extent to which the learning process has made a difference in the personal, organizational and occupational competencies attained by participants in a particular training/course. These competencies may include, but are not limited to: communication, human relations, job function and competence, accountability, problem solving and decision-making, etc.

3. SCOPE

- 3.1 The TIE is a process requiring the involvement of all individuals and groups affiliated or have participated in training at the NPCJ 4 – 6 months post training.

4. DEFINITION OF TERMS

Term	Definition
Total Cost	This includes payment to facilitators, food, learner's time away from job, course materials, etc.
Training	A course or programme that involves knowledge transfer for participants to effectively complete a job or set of tasks.
Training Impact Evaluation	This is a series of evaluations done to identify the extent to which the application of information ascertained during training is exemplified in effective job performances and positive behavioural changes in participants.

5. POLICY STATEMENT

- 5.1 The essence of this policy is to acknowledge that learning programmes are to be tracked and their progress recorded. The aim of the TIE is to maintain the process of curriculum development and review through the progressing and manifesting of learning outcomes, once participants have successfully completed the training programmes.
- 5.2 This policy asserts the fact that training does not end with the certification of participants. Hence, this post-training system will be effected to ensure that participants are able to implement the knowledge and skills learned in the particular learning programme within their scope of work. As such, the Curriculum Development and Coordination Unit will work with Course Coordinators, Syndicate Directors and other Course Staff to evaluate the impact the training has had on the daily work performance of participants.

6. ROLES AND RESPONSIBILITIES IN THE TIE PROCESS

- 6.1 The responsibilities in relation to this policy are as follows:
- a) Course Coordinators, Syndicate Directors and other Course Staff – initiating and managing the evaluation
 - b) Participants – provide feedback on how training assists them
 - c) Formations, Divisions, Areas of the JCF – the supervisors who monitor the performance of the participants in the workplace
 - d) CDCU – curriculum development and quality assurance body who will request feedback from training to make amendments to curriculum and the Standard Operating Procedures
 - e) DCP, Administration and Support Services Portfolio/ACP, Training Branch – request training impact evaluation report to decide on alterations to the training.

7. OBJECTIVES OF THE TIE

- 7.1 In completing the TIE, the NPCJ:
- a) Measures competency as a result of participating in training and professional development programmes.
 - b) Maintains the NPCJ Quality Management Strategy (QMS)
 - c) Creates opportunities for generating, revising, implementing and evaluating the procedures involved in ensuring that the NPCJ delivers quality training to its participants
 - d) Gathers vital information on the outcomes of training in the workplace

- e) Qualifies the Return on Investment of a training programme

8. STANDARD OPERATING PROCEDURE OF THE TIE PROCESS

- 8.1 The TIE requires involves five (5) major methods of measuring the impact of training, manoeuvring quite a bit of logistics to ensure that correct information regarding participants of a training is ascertained and maintained. In doing this, participant retention, participant's job performance, organizational effectiveness and stakeholder (participants, and NPCJ trainers/facilitators). This information is imperative for the dissemination of survey instruments and other preoperational procedures to be decided on and accomplished. In achieving this, the following steps should be followed:

a) The Evaluation Plan

- The evaluation planning method focuses on organizing a structure for collecting data. This normally accompanies the orientation and Introductory phases of the training where participants are exposed to the course outline, assessment protocols and course closure activities – exit interview, course evaluation.
- Create and gain approval for data collection instruments.

b) Communication Plan

- Identify and contact commanders, senior supervisors, and/or sub-officers and participants of the training programme.
- Explain the communication and data collection methods, what the data collected will be used for and how they will or will not affect participants, their supervisors and NPCJ's administrators.
- Provide a data security disclaimer.

c) Data Collection

- Collect assessment information – formative, summative, course evaluation and exit interview information on course
- Collect information regarding the Total Cost of Training – Training Plan
- Conduct surveys/ interviews with participants/supervisors/managers to gather and verify job performance information. Here it is important to gather information relative to performance before and after training.
- At the end of the data collection process, information should be ascertained regarding:
 - ✓ the total cost of the training
 - ✓ the productivity or performance before the training
 - ✓ the productivity or performance after the training
 - ✓ the increase or decrease in productivity or performance
 - ✓ Translate increase/decrease in productivity or performance into 'value benefit'

d) Analyze the Information Received

- Data collected is processed and evidence discussed to identify the results of the training in accordance with the expected outcomes.
- Analyze training in respect to information received from course closure activities

e) Create Report and Organize Curriculum Review

- This report will be different from the course report but will be used collectively to determine the overall impact of the training and determine the extent of the review of the curriculum.

9. LEGISLATIVE AUTHORITY/GUIDING PRINCIPLES

This Policy shall be read in conjunction with the Jamaica's Copyright Act 1993; Jamaica Copyright Amendment Act 2015; the JCF Training Policy, JCF Risk Management Policy and SOP, NPCJ Quality Assessment Policy, NPCJ Policy and Procedures on Academic Integrity, Student Handbook, NPCJ Student Code of Conduct.

10. EDUCATIONAL INITIATIVES

The NPCJ will provide educational initiatives to promote quality and to ensure targeted training programmes and initiatives. These initiatives may include workshops, seminars, online resources, and tutorials.

11. REVIEW AND REVISION

The NPCJ is committed to maintaining the highest standards of assessment. This Training Impact Evaluation Policy and Standard Operating Procedures will be reviewed biannually to ensure its effectiveness and relevance. Any necessary revisions will be made in consultation with relevant stakeholders, including students, faculty, staff, academic/advisory boards, and certification and accreditation bodies.
