1.0 Introduction

The security of the Jamaica Constabulary Force (JCF) Transport Management Maintenance Division (TMMD) facility and its assets are of utmost importance to the TMMD Management and the JCF overall.

The mandate of the TMMD is to keep the JCF mobile and visible, consequently every effort will be made to provide the best possible servicing and maintenance program, while securing the assets of the department. Maintenance of the fleet is expected to be done effectively and as efficiently as possible based on available resources.

2.0 Purpose

This policy establishes protocols designed to ensure a work environment that prioritizes the health and safety of all personnel within the Transport Management and Maintenance Division (TMMD). This policy also mandates preparedness for disaster scenarios, strictly aligning with the strategic objectives of the Jamaica Constabulary Force (JCF).

3.0 Scope

This directive applies unequivocally to all personnel associated with TMMD, including officers, civilian staff, contractors, and visitors. It encompasses all facilities, equipment, and operations under the jurisdiction of this division. Adherence to this directive is mandatory and non-negotiable.

4.0 Policy Statement

TMMD shall maintain a workplace that is free from hazards that could result in injury, illness, or harm. Disaster readiness procedures must be enforced rigorously. This enforcement includes regular inspections, comprehensive training, and strategic resource allocation to maintain unwavering compliance with established health, safety, and disaster preparedness standards.

5.0 Responsibilities

The following summarizes key roles and responsibilities:

5.1 Senior Superintendent of Police (SSP) TMMD

- 5.1.1 Must demonstrate decisive leadership and oversight for all initiatives related to occupational health, safety, and disaster readiness.
- 5.1.2 Shall enforce compliance with national and JCF health and safety standards with utmost authority.
- 5.1.3 Must allocate essential resources for safety improvements and disaster preparedness.

5.2 Occupational Health and Safety Officer

- 5.2.1 Shall coordinate and implement a comprehensive occupational health, safety, and disaster readiness program with unwavering accountability.
- 5.2.2 Must conduct regular risk assessments and inspections.

- 5.2.3 Shall oversee and facilitate mandatory training sessions on health, safety, and disaster response.

5.3 Supervisors & Master technicians

- 5.3.1 Must rigorously enforce safety protocols and disaster preparedness measures within their respective areas of responsibility.
- 5.3.2 Shall conduct routine safety inspections and report any identified hazards immediately and without hesitation.
- 5.3.3 Must ensure the proper use of personal protective equipment (PPE) and the scrupulous implementation of emergency protocols.

5.4 Employees

- 5.4.1 Must strictly adhere to health, safety, and disaster response protocols.
- 5.4.2 Shall report hazards and unsafe conditions immediately;
- 5.4.3 Must participate in all mandatory training and emergency drills

5.5 Risk Management and Hazard Control

- 5.5.1 Shall scan work environment to identify and mitigate hazards effectively.
- 5.5.2 Mandatory incident reporting and thorough documentation of all accidents, injuries, and near-misses must occur without exception.
- 5.5.3 Employees are required to wear appropriate PPE at all times, dictated by prevailing circumstances.
- 5.5.4 Routine emergency drills for evacuation, fire response, and first aid shall be executed with meticulous attention to detail.
- 5.5.5 PPE shall be worn consistently in specified work areas; noncompliance will incur corrective actions.
- 5.5.6 Proper labeling, storage, and disposal of hazardous materials must be strictly enforced.

6.0 Standard Operating Procedures

The following outlines the procedure for the Occupational Health, Safety, and Disaster Readiness.

6.1 Emergency Supplies and Equipment

- 6.1.1 The Guard Room must maintain an up-to-date inventory of essential emergency supplies, including rechargeable flashlights, lanterns, tarpaulins, and batteries to address short term emergency needs.
- 6.1.2 The General Office shall be stocked adequately with necessary emergency supplies to address short term emergency needs.
- 6.1.3 TMMD Stores must stock and maintain appropriate inventory of adequate emergency supplies and equipment at all times.

6.2 Health and Safety Training

- 6.2.1 Shall provide mandatory health and safety sensitization for all newly recruited employees.

- 6.2.2 Annual refresher courses on the principles of occupational health, safety, and disaster preparedness will be conducted.

6.3 Safety Equipment and Facility Maintenance

- 6.3.1 Must conduct mandated regular inspections of fire extinguishers, hydrants, and first-aid kits to ensure functionality.
- 6.3.2 Shall maintain adequate lighting and conspicuous emergency signage to facilitate safety.
- 6.3.3 Hazardous materials must be stored and disposed of according to rigorous safety regulations.

6.4 Emergency Response Procedures

- 6.4.1 Routine fire drills must be executed and coupled with rigorous enforcement of fire prevention measures.
- 6.4.2 Immediate response protocols for medical emergencies shall be established and adhered to without deviation.
- 6.4.3 Emergency exits and assembly points must be clearly marked and communicated throughout TMMD facilities.

6.5 Communication and Warning Systems

- 6.5.1 A Public Address (PA) system must be in place to disseminate critical information during emergencies.
- 6.5.2 Regular tests and maintenance of the communication system must be done to ensure operational readiness and effectiveness.

6.6 Power Backup

- 6.6.1 A generator must be procured and maintained reliably to ensure the continuous operation of critical functions, including lighting and communication during power outages.

6.7 Transportation and Meal Support

- 6.7.1 A designated service vehicle shall be allocated specifically for medical and casualty evacuation needs in case of a disaster.
- 6.7.2 Meal arrangements for staff on static duty during emergencies must be secured and communicated in advance.

6.8 Continuous Improvement and Monitoring

- 6.8.1 Regular reviews of the disaster response plan and occupational health and safety measures must occur without exception.
- 6.8.2 Ongoing assessments shall identify new risks, integrate technological advancements, and incorporate lessons learned from past incidents to refine protocols.

6.9 Compliance and Enforcement

- 6.9.1 Noncompliance with this policy will result in stringent disciplinary actions in accordance with JCF regulations.
- 6.9.2 Regular audits shall be conducted to ensure strict adherence and drive continuous improvement.
- 6.9.3 All incidents must be reported to the ground commander promptly.
- 6.9.4 Ground commander must immediately report to SSP TMMD by any available means; followed by the submission of an incident report within 24 hours. This report must include preliminary casualty assessment; Preliminary damage assessment; preliminary actions taken and ; general state of affairs
