PMMD'S STOREROOM INVENTORY MANAGEMENT STANDARD OPERATING PROCEDURES

Property Management & Maintenance Divisions

Introduction

These standard operating procedures establish responsibilities, procedures and guidelines for managing, receiving, storage, and issuing of supplies that are procured by or donated to the Property Management & Maintenance Division (PMMD). Supplies procured by or donated to the division are managed by the division's stores whose main function is to provide support to the PMMD's mandate of managing and maintaining all infrastructure owned and leased by the JCF by ensuring proper receiving, recording, storage, and issuing of inventory. To ensure smooth running of the PMMD's storeroom, these procedures and guidelines have been established to ensure there are sound stock control systems to maintain proper and accurate stock records, to protect the quality of the projects stock, and prevent loss through theft.

PURPOSE

The purpose of this document is to describe the procedure and guidelines for receiving, storage, and issuing of supplies at the Property Management & Maintenance Division's storeroom.

SCOPE

These standard operating procedures apply to all police personnel involved in receiving, verification, storing, issuing, requesting and using the supplies at the Property Management & Maintenance Division's storeroom. The responsibility for receiving, verification, storage and issuing of supplies lies with the stores staff, breaches of these policies will result in disciplinary actions.

OBJECTIVES

The objectives of storeroom and inventory management system are to:

- ✓ Ensure satisfactory receipt of goods;
- ✓ Keep accurate account of the inventory movements;
- ✓ Maintain complete and accurate records of the inventory situation;
- ✓ Maintain adequate storage conditions, to ensure that the inventory is in usable or serviceable condition when needed;
- ✓ Implement appropriated measures to guarantee the safety and security of the goods.
- ✓ Ensure the inventory is maintained according to the Layout & Storage plan; and items are conveniently staked.

KEY PRINCIPLES

Effective storeroom and inventory management includes proper planning, recording, controlling and monitoring of the inventory. While the planning of tasks and projects are carried out based on the needs of each police facility and formation much of the execution of works involves the storeroom, thus proper coordination and communication between Project Management logistics & Inspection Unit and the PMMD's storeroom is essential. As ineffective inventory management could result in incorrect quantities released, incorrect data recorded, poor decisions, excessive inventory levels, damages and losses.

ROLES & FUNCTIONS OF STORE MANAGER AND STOREKEEPER

Store Manager

The store manager is responsible for the control and monitoring of the daily operations of a storeroom and for the management of assets and resources, in means to effective and efficiently run storeroom. Their functions are as follows:

- ✓ Oversee daily operations, while controlling and managing inventory and logistics.
- ✓ Maintain a safe and healthy work environment by establishing, following, and enforcing standards and procedures and complying with legal regulations, Security and safety checks.
- ✓ Inspect equipment, tools, and machinery regularly, and oversee general maintenance as needed.
- ✓ Oversee and manage logistics utilized to transport supplies to customers and project locations, in ensure efficient delivery of supplies.
- ✓ Maintain the good relationship with the suppliers.
- ✓ Maintain proper stock levels of materials(minimum, maximum, average, danger, reorder level)
- ✓ Overseeing and/or exercising general control over all the tools and activities of the store
- ✓ Inspecting the construction site and ensuring that all tools and/or equipment are complete and in good shape

Storekeeper

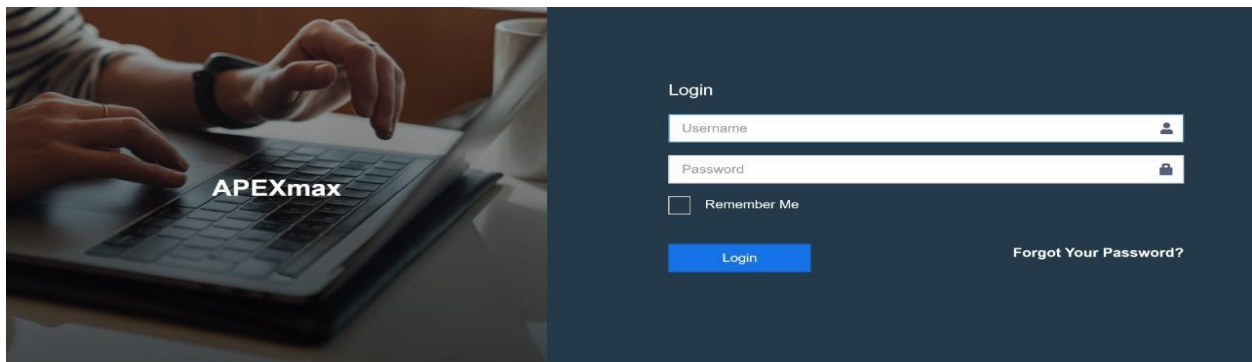

The storekeeper is responsible for the control over the stores materials, tools and equipment.

Their functions are as follows:

- ✓ Receive the deliveries of all incoming materials and reconcile with purchase orders.
- ✓ Track, document, and resolve any discrepancies on received orders.
- ✓ Ensure accuracy of the facility's inventory system by updating records of physical inventory totals, receipts, adjustments, and returns.
- ✓ Manage inventory/supplies and ensure they are within the established minimum and maximum levels.
- ✓ Keep up-to-date records of receipts, records, and withdrawals from the storeroom.
- ✓ Responsible for packing and labelling supplies.
- ✓ Maintaining and keeping track of withdrawals of the stockroom (materials, tools, equipment etc.)
- ✓ Responsible for returning damaged items to suppliers as appropriate.
- ✓ Cleaning construction equipment and testing them to ensure functionality

INVENTORY MANAGEMENT SOFTWARE

The Property Management & Maintenance Division has implemented an inventory management system called Apex Maz. Its purpose is to provide an effective and efficient system in tracking and managing the ordering, stocking, storing and use of inventory in our storeroom.

RECEIVING AND INSPECTION

At the time of delivery, the receiving officer should inspect and verify the supplies, against the delivery invoices. For every delivery the receiving officer should;

- ✓ Verify that supplies being delivered have been procured for by or donated to the Property Management & Maintenance Division using the delivery documents (Delivery note, packing list and invoice).
- ✓ Make sure he/she is receiving as many items as are listed on the delivery documents. Count items delivered in the Unit's recommended unit of measurement not according to the supplier packaging.
- ✓ Carefully examine each item for visible damage. If damage is visible, note it on the delivery note, have the delivery agent/driver sign the copy.
- ✓ Ensure that quality for conformance to the invoice specification (grade, variety, type, Cat/Part no., expiry dates) is confirmed by the end user and he/she must sign all delivery documents.
- ✓ Sign the delivery documents only after being fully satisfied with the delivered goods and that they have been verified with and confirmed by the user.

RECEIVING REPORT

The PMMD's store manager should prepare a monthly receiving report noting all orders received within a month, indicating partial and full delivery. However, where deliveries are incorrect, of poor quality, damaged or has discrepancies on the invoice or delivery note, a report should be prepared immediately at the time of receipt and sent to the Project Management logistics & Inspection Unit for necessary action to be taken.

INVENTORY CONTROL

STORAGE

The primary objective of storage is to protect the quality of the items, have enough stock on hand, and prevent loss through spoilage and theft.

Control over items in storage is established by assigning responsibility to specific persons, maintaining proper storage conditions, and sound material handling procedures. Minimum operating requirements for storage include:

- ✓ Immediately after receiving and inspection. All items should be placed in their respective storage areas the same day.
- ✓ There should be a definite space in the storeroom for each project stock. In case of field station.
- ✓ All items should be stored according to their Lot/Batch numbers in a manner that will facilitate issuing on a "first in-first out" FIFO and "first expiry first out" FEFO basis.
- ✓ Items should be organized and labelled according to date received and project with the oldest goods on top of stacks, and the most recently purchased goods at the bottom of stacks. Labels, Project and date-received markings must face right side up and out for identification.

ISSUING STOCK OUT OF THE STOREROOM

ACCESS CONTROL

Access control is vital to storeroom management as it is a physical security measure that controls or limits access to the storeroom. In means to secure properties under the PMMD's storeroom control the following guidelines should be employed:

- ✓ Only authorized PMMD's store staff shall have access rights to the storeroom.
- ✓ All storeroom doors must be locked when unattended.
- ✓ Visitors and other police personnel must be accompanied when inside the storeroom.
- ✓ At the end of each working day, the storekeeper should ensure that all store doors are properly locked and keys are to be handed over to PMMD's general office and accessed only by authorised persons.
