1.0. Purpose

The purpose of this document is to outline the steps in Collection, collation, analysis and dissemination of Crime Statistics and related data.

2.0. Scope

This process involves the collation, analysis, and dissemination of Crime Statistics to our internal and external customers.

3.0. Definitions

MCIR Morning Crime Incident Report

CSTATS Central repository of all Crimes and related incidents committed Island wide.

4.0. Acronyms and abbreviations

MCIR - Morning Crime Incident Report

5.0. Description of Activities [Procedures]

5.1 Morning Crime Incident Reports submitted by the divisions are retrieved from the Email each day by the Crime Review Coordinator.

Scoring Process:

5.2 The MCIRs are reviewed, validated and Scored by the Quality Assurance Officer

The Scoring process include:

- Examination of the reports for missing or conflicting information.

Standard Operating Procedures**

JAMAICA CONSTABULARY FORCE
Statistics and Information Management Unit

- Validate MCIRs against the Morning Incident Report prepared by the Police Emergency Communication Centre (PECC).
- Ensuring appropriate crime classification - appropriate offences listed are based on the facts expressed in the narrative.
- Checks are made in the CSTATS application to ascertain if the crime was previously received and entered.

The check include:

- Offence
 - Victim Name
 - Crime Date
 - Crime Location
 - Investigator
 - Narrative
- Highlight firearms and ammunition recovered or stolen
- Highlight reports of Fatal Shootings

5.3 Data Entry process:

On completion of the scoring, the crime reports are distributed to Data Entry Clerks where they are entered in the statistics database using the C-STATS © Web Application.

On receipt of the Morning Crime Incident Reports the data clerks are required to:

- Enter the relevant data into the C-STATS © database.

Standard Operating Procedures**

JAMAICA CONSTABULARY FORCE
Statistics and Information Management Unit

- Record each crime in accordance with the written remarks made by the Quality assurance Officer.
- Assign all victims and accused persons to the respective crimes as stipulated in the crime report.
- Assign all properties stolen to the relevant reports and the appropriate victim(s).
- Assign the respective crimes data to the appropriate division and stations. □
Ensure that the injuries of the victims and accused persons are appropriately recorded.
- Appropriately account for incidents of fatal shootings, motor vehicle theft, firearms stolen or recovered.
- Record the matching Incident number generated by the C-Stats© application on the physical crime report on completion of each entry for storage and future reference.

5. 4 Crime Analysis

Crimes are analysed and disaggregated at the following Levels:

- Division
- Stations
- Temporal (Time of day, Day of Week, Month, Year)
- Spatial Analysis:
 - o Community
 - o Division
 - o Station

5. 5. Crime Statistics Dissemination

Crime Statistics Reports are disseminated to our internal and external customers via schedule reports and in response to on demand requests from our customers.
