Information Communication Technology Division Software Development Procedure

Title: JCF Information Communication Technology Division Software Development Procedure	Identification Code: JCF/TECB-ICTD/PR/SFs/0005/2021
Effective Date: 2024-Nov-22	Pages: 4
Last Reviewed: 2024-Nov-18	Distribution: Tech Branch
Revision version #: 1	Process Owner: DCP Force Development and Logistics Portfolio
Rescinds: 2021-Nov-30	
Authors: ICTD	Owner: JCF
Publication: 2021-Nov-30	Review: Triennially

Information Communication Technology Division Software Development Procedure

JCF/TECB-ICTD/PR/SFs/0005/2021

1.0. Purpose

The purpose of this document is to capture the process of how request for software development coming into the department are handled and followed through until request has been satisfied. .

2.0. Scope

This process includes the development software applications, database administration and their maintenance. For software applications that cannot be built in house, same is procured by the procurement department provided it falls within the budgetary guidelines.

3.0. Definitions

SRS	Software Requirements Specification
SDLC	Software Development Life Cycle
Functional Requirement	Application feature enabling users to complete their tasks (Inputs, processing & outputs)
Non Functional Requirement	Specifies the criteria in the way the system operates such as security, performance & scalability.
UAT	User Acceptance Testing
COTSS	Commercial Off the Shelf Softwares
ICTD	Information & Communications Technology Division

4.0. Responsibility

SMDM	System Maintenance & Development Manager
SA/SE	System Analyst/ Software Engineer
AO	Administration Officer
HD	Help Desk
SH	Stakeholder

5.0. Description of Activities [Procedures]

5.1.	AO/HD	Receive requests via written correspondence & Help Desk then routes same to the Systems Department.
-------------	--------------	---

Information Communication Technology Division Software Development Procedure

JCF/TECB-ICTD/PR/SFs/0005/2021

The correspondence would be sent from the head of the Branch/Division (i.e., Assistant Commissioner of Police, Senior Superintendent, Superintendent, Deputy Superintendent).

5.2. SMDM/ SA/SE

Conduct validation of the request then conduct an interview with the stakeholder.

Once routed to the Systems Department, we verify the nature and accuracy of the request and formally accept and state the nearest possible date/time for an interview with the stakeholder(s).

5.3. SMDM/ SA/SE

Determine if the project is feasible. If the project is determine to not be feasible then this is communicated to the stakeholder and it is recommended that a solution be purchased (COTS).

The project is determined feasible if:

- 1. Technologies available within the Systems Department to meet the request.*
- 2. An amicable agreement between the stakeholder(s) and the System Department team regarding the timeframe to complete the request.*
- 3. Human resources available to meet the request. (i.e. availability of developers).*

5.4. SA/SE

Conduct a Requirements Gathering Session i.e. fact finding techniques, interview & studying the existing standard operating procedures.

Information is captured as follows:

- 1. An examination of their existing system (often manual processes) or written/electronic documents used to capture data and formulate reports.*
- 2. Interviewing the requestee and observing the work process flow whilst making documentation.*
- 3. Utilization of questionnaires.*

5.5. SA/SE

Complete a draft SRS document & email same to the stakeholder for their review and feedback. This process is iterated until a final draft is achieved.

5.6. SA/SE&SH

Meet with the stakeholders and sign off on the agreed SRS document.

**5.7. SA/SE
best**

Place the SRS document in a queue, determine the

Information Communication Technology Division Software Development Procedure

software development platform and then indicate the earliest completion date to ???.

- | | | |
|--------------|-------|---|
| 5.8. | SA/SE | Commence the utilization of programming technologies, database modelling, software testing & test deployment. |
| 5.9. | SA/SE | Conduct interim UAT(s); receive feedback from End users within a predefined timeframe. |
| 5.10. | SA/SE | Conduct training with the end users. |
| 5.11. | SA/SE | Conduct a predetermined implementation pilot phase in live production where the solution is monitored for the duration of that timeframe. |
| 5.12. | SA/SE | Conduct training of System Administrators & Helpdesk prior to handing over the complete solution. |
| 5.13. | SA/SE | Conduct official handing over of the software application to the stakeholders. |

6.0. Records

Written Correspondence
Help desk ticket
Email messages
Draft SRS
Signed SRS
Acceptance notification
Deliverables sign off
Questionnaires
Observation notes

This is used during the requirements gathering session as stated in 5.0 Description of Activities [Procedures], Section 5.4.
