1.0 Introduction

This Standard Operating Procedure (SOP) represents the standardized guidelines of the vehicles in the Jamaica Constabulary Force (JCF) Force Fleet that are damaged by accident or other incident, and the procedures carried out by the Transport Management and Maintenance Division to return them to service or otherwise.

All accidents or any other incident causing damage to service vehicles are to be reported to the SSP TMMD who makes a determination, based on the extent of the damage, whether or not the vehicle is to be repaired the vehicle.

2.0 Purpose

The purpose of this SOP is to outline the management process for reporting on, and/or repairing service vehicles damaged by accident or other incidents.

3.0 Scope

This standard operating procedure covers all service vehicles owned by the Commissioner of Police.

4.0 Responsibility of the Accident and Records Department are:

- 4.1** Collection of all service vehicle accident reports and other accompanying data including third party insurance information.
- 4.2** Acquire estimate of repairs from independent/ approved assessors (Assessor's report)
- 4.3** Forward summaries of accident files to ACP Support Services Branch for the attention of the Auditor General, to facilitate repairs and investigation by the Attorney General.
- 4.4** Record all information concerning accident/incident involving service vehicle in the JCF Fleet Management System.

5.0 Standard Operating Procedures

- 5.1** Collect daily reports by 9:00 am on service vehicle accident from the Police Emergency Control Centre (PECC) then verify the information with the JCF Accident Investigation and Reconstruction Unit (AIRU)
- 5.2** Make enquiry from all Divisions/Formations through the Division's Fleet Manager and Traffic department for additional or omitted information or information on any other accident or incident involving service vehicles not reported to PECC.

- 5.3 Make calls to the Divisions traffic department, Investigator or other relevant persons to ascertain correct details or additional information on accidents as necessary (visit the Divisions and inspect records where necessary).
- 5.4 Record information in Accident database (VMS)
- 5.5 Liaise with Assessor
- 5.6 Cause the assessment report and estimate of expenditure to be done within specified timeline (30 days or time agreed with assessor)
- 5.7 Receive and review accident file for completeness
- 5.8 Enclose assessor's report and estimate of expenditure in file
- 5.9 Submit file to Support Services Branch
- 5.10 On receipt of the Assessor's report, prepare a summary of the complete information to be submitted to ACP Support Services Branch for onward transmission to the Auditor General's office for approval to facilitate repairs where appropriate. The information to be submitted should include:
 - 5.10.1 Date /Time/ Div. Occurred
 - 5.10.2 Investigator
 - 5.10.3 **JCF Information:** Service Vehicle description, Division assigned and damage; Personnel identity and injuries
 - 5.10.4 Summary of Accident
 - 5.10.5 **Third party information:** Vehicle description, Insurance and damage; Identification of persons and injuries if any.
 - 5.10.6 Estimated cost of repairs
 - 5.10.7 Contact PECC for third party insurance information
 - 5.10.8 Respond to all files from the Office of the Attorney General within five (5) working days or as soon as the information becomes available
 - 5.10.9 Recommend through DSP Operations, repairs that can be done internally and those to be outsourced.

5.10.10 Once a response/ approval is received from the Auditor General's office, (ref. 5.6) vehicles approved for repairs may be repaired internally at JCF/TMMD facilities or outsourced.

5.10.11 Estimates for vehicles to be outsourced for repairs are sent to Assistant Commissioner of Police, Support Services Branch under cover for approval. Accompanying documents are:

5.10.11.1 Copy of accident report

5.10.11.2 Assessor's report and

5.10.11.3 The letter of approval from Auditor General's office.

5.10.12 Follow up is done on repairs or otherwise (recommended for Board of Survey) and records updated in the Fleet Management system.
