Fleet Vehicles Acquisition, Distribution and Disposal Standard Operating Procedures

Table of Contents	Pages
1. Introduction	3
2. Purpose	3
3. Scope	3
4. Acquisition and Distribution	3
5. Disposal	4-5

1.0 Introduction

- 1.1 This Standard Operating Procedure (SOP) represents the standardized guidelines of the Jamaica Constabulary Force (JCF) which governs the acquisition, distribution and disposal the fleet of service vehicles. The process is managed consistent with the Government of Jamaica Fleet Management Guidelines.
- 1.2 The JCF fleet assets shall be managed in accordance with the life cycle approach to material management (from acquisition to disposal)/ Board of Survey (BOS/MOFPS) and with the principles of economy, prudence and probity, while minimizing any negative environment impact.
- 1.3 **Terms:**
 - 1.3.1 **Cannibalize** – *The process of parts transfer; that is the removal of parts from unserviceable vehicle to facilitate repairs to a serviceable vehicle.*

2.0 Purpose

- 2.1 The purpose of this SOP is to outline the process within the Transport Management and Maintenance Division (TMMD) in managing the JCF's fleet to ensure effective and efficient mobility within the organization in line with the Government of Jamaica (GOJ) motor vehicle policy (Ministry of Finance & the Public Service (MOFPS)).

3.0 Scope

This standard operating procedure applies to all service vehicles owned by the Commissioner of Police and operated by the Jamaica Constabulary Force.

4.0 Fleet Vehicles Acquisition and Distribution

- 4.1 Service vehicles are purchased by the Ministry of National Security (MNS) on recommendation of the Commissioner of Police based on needs in the Police Divisions and Formation and Budget availability. To quantify the needs that exist, a research is carried out by TMMD to verify the need and availability of service vehicles in each Division for patrolling, transporting personnel and to carry out operations.
- 4.2 Once the vehicles are purchased they are retrofitted by the Dealer or assigned contractor, if so required and checked off by the Internal Auditors from the Ministry of National Security.
- 4.3 A distribution list is then prepared by the Assistant Commissioner of Police in charge Support Services Branch which is then sent to SSP TMMD to whom the vehicles are then handed over for branding, plating and deployment.

- 4.4 The Fleet management System is then interrogated to verify the next Call Sign to be assigned to each vehicle in the Divisions.
- 4.5 Application is then made through Support Services Branch for Advance Cards for each vehicle and for private Registration plates in the case of unmarked vehicles.
- 4.6 Once the Advance cards and plates are received at TMMD, the vehicles are signed for by a representative of each Division then deployed.
- 4.7 The Fleet Management System is then populated with information including; identity of the vehicles, the purchase cost and Division assigned.
- 4.8 All other activities concerning the vehicles including maintenance and repairs are recorded in the Fleet Management System throughout the life of the vehicle.
- 4.9 Once a vehicle becomes uneconomical to be maintained or repaired, it is recommended to the Board of Survey (BOS).
- 4.10 If the vehicle is acquired as a gift or acquired for a special project, instruction from ACP Support Services Branch will dictate whether the vehicle will be fitted with a Call Sign or assigned private plates.

5.0 DISPOSAL: Process for Board of Survey (BOS) JCF Fleet Vehicles

- 5.1 The Government of Jamaica comprehensive asset management policy for the public sector recommends that vehicles are depreciated and disposed of after **seven (7) years**. In addition, whenever the maintenance cost, or cost of repairing a JCF Fleet vehicle is considered exorbitant based on the value of the vehicle, *i.e. the vehicle becomes uneconomical to be repaired*, the vehicle should be recommended for the Board of Survey (BOS).
- 5.2 Consequent to the above GOJ policy last published by the Ministry of Finance and the Public Service February 18, 2020 each Police Division may forward a list of all Service Vehicles older than **seven (7) years** and deemed to be unserviceable and make recommendation for Boarding.
- 5.3 When the list is received at TMMD, it is verified on the Fleet Management System. An inspection is then carried at the Division where the vehicle is assigned or wherever the vehicle on the BOS list is located to confirm state of the vehicle. Consideration is then made whether any vehicle can be repaired and is to be removed from list; in addition any other vehicle in the Division that is in a state of disrepair will be added to the list.

- 5.4** An electronic list will then be created on the Fleet Management System to be submitted to the Board of Survey.
- 5.5** A date is then set for a representative from each Division concerned to attend TMMD to sign off on the list and make any amendments if necessary.
- 5.6** A final list is then created and forwarded by SSP TMMD to the Assistant Commissioner of Police, Support Services Branch for further submission to the Ministry of Finance for approval.
- 5.7** No. 8 of the JCF MNS Fleet Management policy gives the option for a vehicle that is no longer serviceable to be “cannibalized” and useful parts re-used in other vehicle of similar make and model.
