Transport Management and Maintenance Division (TMMD) Motor Vehicle Parts Transfer Standard Operating Procedures

Table of Contents	Pages
1. Introduction	3
2. Purpose	3
3. Scope	3
4. Procedures	3
5. Process	3-4

1.0 Introduction:

- 1.1** This Standard Operating Procedure has been developed to account for parts that have been transferred from a service vehicle that is uneconomical to be repaired. The *Ministry of National Security Fleet Management policy* for the JCF recommends that, that vehicle may be ‘cannibalized’ to facilitate repairs for the timely repairs to another service vehicle.

2.0 Purpose

- 2.1** The purpose of this SOP is to outline the process in managing the JCF’s fleet to ensure effective and efficient mobility within the organization in line with the Government of Jamaica (GOJ) motor vehicle policy (Ministry of Finance and the Public Service, MOFPS)

3.0 Scope

- 3.1** This standard operating procedure applies to all service vehicles owned by the Commissioner of Police and operated by the Jamaica Constabulary Force.

4.0 Procedures

- 4.1** When a Service Vehicle becomes defective or needs to be serviced a request is made to TMMD for repairs/service to be carried out. A decision is then taken depending on the location of the vehicle, as to the most convenient garage to have the repairs done. If the vehicle is on warranty/contract it is taken to the particular Dealer/company, otherwise it is taken to a TMMD facility or may be referred to an approved garage.
- 4.2** If the part required for the timely repair of a service vehicle is unavailable and sufficient effort made to source the part has been proved futile, the part may then be transferred from another service vehicle to facilitate the repairs.

5.0 Process

- 5.1** The part is requested from the TMMD stores as needed and isn’t in stock
- 5.2** Efforts to source the part by the stores from suppliers in a timely manner proves futile.
- 5.3** A request is made for the part to be transferred from another service vehicle.
- 5.4** The unavailability is verified by SSP TMMD or designate
- 5.5** The part is identified on a unit that’s not serviceable
- 5.6** The Transfer Book is written up with particulars of both vehicles, including;
- 5.6.1** State of both units

- 5.6.2** Reason for request
 - 5.6.3** Date of request
 - 5.6.4** By whom requested
 - 5.6.5** By who authorized
- 5.7** Part needed is removed from the unserviceable unit and taken to the stores along with the transfer book where it is issued as a used part.
- 5.8** The defective part (marked defective) is replaced on the unserviceable unit.
- 5.9** The part to be placed on the serviceable unit is then issued by the stores and signed for by the person receiving the part.
- 5.10** All stores records updated.
