

THE JAMAICA CONSTABULARY FORCE
Transport Management Policy and Standard Operating Procedures

Title: JCF Transport Management Policy and Standard Operating Procedures	Number: JCF/TMMD/PL/SSs/0006/2021
Effective Date: 2024-May-31	Pages: 34
Review Date: 2024-May-30	Distribution: TMMD
Revision #: 1	Process Owner: ACP Services Branch
Rescinds: March 16, 2021	
Authors: TMMD	Owner: JCF
First Published: March 16, 2021	Review: Triennially

1.0 Introduction

Motor vehicles play important roles in law enforcement world-wide. The Jamaica Constabulary Force (JCF) recognizes the importance of having a reliable fleet of vehicles in sufficient quantities and of appropriate types in order to adequately satisfy the burgeoning demand from citizens. This Transport Management Policy and Standard Operating Procedures (SOP) present the JCF's approach in maintaining the suite of vehicles for optimal functionality.

This policy conforms to the Revised Comprehensive Motor Vehicle Policy for the Public Sector (2017), and ensures adherence to the principles of economy, prudence and probity, while minimizing any negative environmental impact.

2.0 Purpose

The purpose of this document is to outline the JCF's policy and standard operating procedures on the management and maintenance of all fleet vehicles owned by the Commissioner of Police in accordance with the Government of Jamaica Revised Comprehensive Motor Vehicle Policy for the Public Sector (2017).

3.0 Scope

This policy and SOP applies to all service vehicles and pedal cycles owned by the Commissioner of Police. It covers the life cycle management of the JCF's fleet to include acquisition, distribution, maintenance, repairs, monitoring and disposal. It applies to all sworn members who are Force Drivers and all sworn and unsworn members responsible for the management and maintenance of vehicle fleet. This SOP does not apply to motor boats or other marine vessels.

4.0 Abbreviations & Acronyms

BOS	Board of Survey
MNS	Ministry of National Security
MOFPS	Ministry of Finance and Public Service
SOP	Standard Operating Procedure
VMS	Vehicle Management System

5.0 Definitions

5.1 Approved Garages

These are private garages approved by the Ministry of National Security which provide maintenance (servicing and repairs) to JCF fleet.

5.2 Fuel Debit Card

A card that is electronically and magnetically encoded with information about a specific service vehicle, rental vehicle or equipment to which it is assigned to purchase fuel and lubricant

5.3 Service/Fleet Vehicle

All vehicles to include heavy duty and light trucks, SUVs, pick-ups, motor cars, motor cycles and pedal cycles owned by the Commissioner of Police and operated by the JCF.

5.4 Vehicle Management System (VMS)

This is a software used by the JCF to manage all information concerning the acquisition, assignment, maintenance, servicing and disposal of all fleet.

5.5 Gift

Vehicles provided by stakeholders or third parties within the guidelines established by the MOFPS for use by the JCF.

5.6 Special Project

Vehicles provided by external stakeholders for a particular project within the JCF. These vehicles are maintained by the stakeholder and maybe returned on completion of the project.

5.7 Cannibalize

The process of transferring part(s) of an unserviceable vehicle to facilitate repairs to one that is serviceable. Cannibalizing occur only when parts are unavailable.

5.8 Vehicle Call Sign

This is a unique identification mark on service vehicles that comprises letters and numbers and facilitates the internal registration process.

5.9 Third Party Information

Information from any person/entity, not representing the JCF, and has been involved in an accident or incident with a service vehicle

6.0 Responsibilities

The following summarizes key responsibilities:

6.1 The Assistant Commissioner of Police in charge of Support Services Branch will be responsible for:

- 6.1.1 making recommendations to the Commissioner of Police for the acquisition of vehicles;
- 6.1.2 the registering, re-registering, and fitness of fleet;
- 6.1.3 acquisition, activation and deactivation of fuel debit cards;
- 6.1.4 custody of fleet documents;
- 6.1.5 authorization of suitable garages for repair and servicing of fleet;
- 6.1.6 managing the distribution process of fleet; and
- 6.1.7 preparing fleet documents to be submitted to the Ministry of Finance for disposal of vehicles.

- 6.2 **The Senior Superintendent of Police (SSP) in charge of Transport Management & Maintenance Division (TMMD)** will be responsible for:
- 6.2.1 conducting research to ascertain best fit fleet for acquisition, and to verify need and availability in each division;
 - 6.2.2 branding, plating and deploying of vehicles;
 - 6.2.3 the development and maintenance of the VMS;
 - 6.2.4 management of vehicle maintenance and the procurement process;
 - 6.2.5 recommending suitable garages for repairing and servicing of fleet; and
 - 6.2.6 management of internal registration of fleet.
- 6.3 **The Superintendent of Police in charge of Operations, TMMD** will be responsible for:
- 6.3.1 managing all activities relating to maintenance, servicing and repairs of fleet including those at approved garages;
 - 6.3.2 provide weekly production report;
 - 6.3.3 make recommendations to SSP TMMD for vehicle based on organizational needs;
 - 6.3.4 make recommendations to SSP TMMD for staff development and training; and
 - 6.3.5 managing vehicle parts transfer.
- 6.4 **The Deputy Superintendent of Police in charge of Operations, TMMD** shall be responsible for:
- 6.4.1 managing collision/incident reports, vehicle assessments and repairs;
 - 6.4.2 managing the receipt, processing and return of all correspondences sent to the department; and
 - 6.4.3 supervising the maintenance of fleet island-wide.
- 6.5 **Commanding Officers**
- 6.5.1 The Heads of Areas, Divisions and Formations are responsible for, and accountable directly to the Fleet Manager, and ultimately to the Commissioner of Police for all vehicles deployed and assigned to their respective areas of responsibility. The Log Book which accompanies each assigned vehicle must be strictly maintained and Reports submitted as stipulated by the Commissioner of Police or his designate.
 - 6.5.2 Commanding Officers must ensure that Officers under their command are held accountable in keeping with the Fleet Management Policy and these Standard Operating Procedures (SOPs), and that persons assigned to drive police vehicles have been certified as competent and fit to drive vehicles of the particular class and have been duly authorized by the Commissioner of Police.

7.0 Policy Statement

It is the policy of the JCF that:

- 7.1 All service vehicles shall be acquired, managed, distributed, maintained and disposed of in accordance with the Government of Jamaica Procurement Guidelines and the Revised Comprehensive Motor Vehicle Policy;
- 7.2 the VMS shall be used to record all activities concerning the lifecycle of all service vehicles;
- 7.3 where required, and for the purpose of effecting repairs to serviceable fleet vehicle(s), an unserviceable vehicle may be cannibalized in accordance with the Government of Jamaica Asset Disposal Policy and the procedures outlined in this policy and SOP;
- 7.4 service vehicles involved in collisions/incidents shall be repaired in accordance with this policy and standard operating procedures;
- 7.5 only fit for purpose vehicles that give value for money and meet the required specifications for law enforcement purposes shall be acquired;
- 7.6 leasing of vehicles may be considered as an acquisition option. In cases where vehicles are acquired through leasing agreements, consideration for servicing/maintenance and repairs must include in the contract; and
- 7.7 parts from one service vehicle may be transferred to another for greater efficiency.

8.0 Standard Operating Procedures

8.1 Fleet Acquisition and Distribution

8.1.1 Fleet Acquisition

Service vehicles are purchased by the Ministry of National Security (MNS) on the recommendation of the Commissioner of Police based on the organization's need. In determining the JCF's service vehicle needs, the following will apply:

- i. the head of TMMD conducts the JCF service vehicle annual needs analysis and submits recommendations to the Assistant Commissioner of Police, Services Branch;
- ii. upon receipt of the service vehicles and the dispatched from ACP Service Branch, an application for fuel debit card, private plate for unmarked service vehicles are then made through Support Service Branch.
- iii. upon receipt of fuel debit cards and private registration places at TMMD, the division is not notified and the vehicles are signed for by a representative from the division then deployed.

8.1.2 Fleet Distribution

Upon the delivery of vehicles from the dealer, assigned contractor and/ or donor the following procedures shall be adhered to:

- i. a distribution list shall be prepared by ACP Services Branch and forwarded to SSP TMMD;
- ii. registration plates for unmarked vehicles are acquired from the Tax Administration Jamaica (TAJ) through ACP, Services Branch and affixed to units;
- iii. all internally registered vehicles are fitted with call sign, assigned registration plates and branded where appropriate;
- iv. SSP TMMD shall apply for fuel debit card through Support Services Branch for each vehicle;
- v. Upon receipt of the advance cards from the Services Branch, the VMS shall be populated with information including: identity of the vehicles, the purchase/acquisition cost and Division of assignment;
- vi. once all steps from (i) to (vi) are completed, vehicles are then handed over to the Commanding Officer of the respective Divisions or his/her designate who will sign for the vehicle(s), fuel debit card and Log Books;
- vii. once a vehicle becomes uneconomical to be maintained or repaired, it is recommended to the Board of Survey (BOS); and
- viii. all other activities concerning the vehicles including maintenance and repairs shall be updated in the VMS throughout the life cycle of the vehicle.

8.2 Procurement of Vehicle Parts and Supplies

Prior to the start of each financial year, a projection of the quantity and type of parts, lubricants, tyres or batteries shall be prepared by Sub-Officer in charge of TMMD Stores and submitted through SSP TMMD to Corporate and Special Services Branch.

- 8.2.1 Quotations are requested from suppliers to acquire urgently needed items. These quotations are submitted through SSP TMMD to the JCF Finance Branch for committal;
- 8.2.2 TMMD shall only stock fast moving items such as tyres, batteries, filters, oils and brake parts. Vehicle-specific parts will be purchased on a needs basis; and
- 8.2.3 only genuine parts or brands approved by the SSP TMMD shall be used for the maintenance of JCF vehicles.

8.3 Sourcing by Parts Transfer (cannibalization)

The turnaround time for repairs to service vehicles can be lengthy due to the process of procurement of parts. To this end, the *Ministry of National Security Fleet Management Policy* for the Jamaica Constabulary Force (JCF) recommends that, vehicles may be ‘cannibalized’ to facilitate repairs. The following procedures shall apply when transferring parts from unserviceable to serviceable vehicles:

- 8.3.1 the transfer of parts from one service vehicle to another shall be done in such a manner that the original vehicle retains its identity. Used parts shall only be transferred for re-use in other service vehicles of similar make and model;
- 8.3.2 if the part required for the timely repair of a service vehicle is unavailable at the TMMD stores and effort made to source the part has proven futile, the part may then be transferred from an unserviceable vehicle to facilitate the repairs;
- 8.3.3 the Sub-officer for the section responsible to conduct the particular repairs must submit the request through the garage supervisor to the DSP, Operations TMMD who will make recommendation to SSP TMMD for approval of the transfer;
- 8.3.4 SSP TMMD or his/her designate shall verify the unavailability of the part(s) via the TMMD Stores and authorize the transfer;
- 8.3.5 whenever the part is identified on a unit that is not serviceable, the Parts Transfer Register shall be written up with particulars of both vehicles;
- 8.3.6 the part(s) needed is removed from the unserviceable unit and taken to TMMD stores along with the Parts Transfer Register where it is issued as a used part;
- 8.3.7 the defective part marked “defective” is placed on the unserviceable unit; and
- 8.3.8 the relevant stores records updated.

8.4 Maintenance & Repair

The maintenance and repairs of all service vehicles shall be conducted at TMMD Headquarters, TMMD Areas 1 & 2 and approved garages in the corporate and rural areas. The following guidelines and procedures must be adhered to when a vehicle is taken in for either maintenance or repairs:

8.4.1 General Servicing

A service vehicle upon acquisition undergoes preventative maintenance and general servicing at the following mileage schedules:

- i. first service check: all units – 1000km;
- ii. thereafter: cars, pickups and SUV’s every 5000km;
- iii. heavy duty vehicles to include light trucks, heavy trucks and tractors every 3000km; and
- iv. motorcycles and ATV’s every 3000km.

8.4.2 Servicing Alert

- i. The Divisional Transport Sub-officer will identify vehicles that are nearing service mileage and inform TMMD Commanders to make arrangement via Whatsapp or other appropriate communication for the

- scheduling of vehicle servicing at TMMD, Areas 1 and 2 and approved garages.
- ii. Divisional Transport Managers must ensure that the next service mileage quoted on the sticker is adhered to.

8.4.3 Vehicles on Warranty

- i. TMMD shall inform the external liaison from dealerships and approved garages regarding the scheduling of the vehicles for servicing;
- ii. TMMD shall inform the Divisional Commander of the scheduled date of the appointment for the vehicles; and
- iii. vehicles under warranty must be repaired at the specified dealership during the warranty period, unless written permission is provided by the warrantor to conduct the repairs/servicing at an approved garage.

8.4.4 Vehicles not on Warranty

Division Transport Sub-officers will inform TMMD Commander to make arrangement via Whatsapp or other appropriate communication for the scheduling of vehicle servicing at TMMD, Areas 1 and 2 and approved garages.

8.4.5 Vehicles taken in for servicing and repairs

When a service vehicle is taken to TMMD for general servicing and/or repairs the following procedures shall apply:

8.4.5.1 unit shall be taken to the check point where it shall be inspected for:

8.4.5.2 physical damages, lighting, indicators and warning device functionality;

8.4.5.3 accessories;

8.4.5.4 updated Log Book; and

8.4.5.5 Fuel Debit Card.

8.4.5.6 The Turnaround Time for the servicing and repair of service vehicles are categorized in the following tiers;

- i. 1-3 Working Days (Minor Repairs)
- ii. 3-21 Working Days (Major Repairs)
- iii. 3 weeks – 10 weeks (Long-term Major Repairs)

8.4.5.7 the fuel debit card shall be surrendered at the check point and the driver signs the Debit Card Register handing over same;

- 8.4.5.8 the physical condition of the unit, lighting, indicators and accessories shall be recorded in the Vehicle Checklist Book which is then signed by the driver;
- 8.4.5.8.1 the driver's complaints of the unit shall be recorded in the VMS and a job sheet generated for the different workshops to which the unit will be assigned;
 - 8.4.5.8.2 vehicle shall be taken to the relevant workshop/s where an assessment is done to identify the mechanical defects or service required;
 - 8.4.5.8.3 the workshop supervisor will record the relevant parts requested in the Order Book and submit it along with the Job Sheet to the TMMD Stores for the parts to be supplied;
 - 8.4.5.8.4 verification is done of the unit by the garage supervisor that the correct parts are requested, after which the parts are issued to the workshop supervisor or his designate who shall sign the delivery book along with the stores dispatch clerk;
 - 8.4.5.8.5 the service parts are then used/ fitted to the unit to complete the servicing and/or repairs;
 - 8.4.5.8.6 unit is then checked for any other defects and test driven to ensure compliance with roadworthy standards. If defects are found, revert to **(e)**;
 - 8.4.5.8.7 if repair to a unit is incomplete by the end of the day, the Fuel Debit Card must be sent to the TMMD General office for safe keeping;
 - 8.4.5.8.8 if it remains out of service in excess of 10 working days a request must be sent to ACP Support Service Branch for the deactivation of the Fuel Debit Card until repairs have been completed;
 - 8.4.5.8.9 a next service mileage sticker signed by the workshop supervisor is then placed in a visible section of the unit;
 - 8.4.5.8.10 Job Sheet is completed with the required information to include:
 - i. parts and service items used on unit;
 - ii. description of work carried out on unit;
 - iii. whether or not job completed;
 - iv. name of technician that carried out work; and
 - v. signature of workshop supervisor.
 - 8.4.8.11 unit is taken to the check point where it is inspected by a motor vehicle inspector to ensure quality control;
 - 8.4.8.12 unit is physically inspected at the check point in the driver's presence to verify that there are no additional damages, and all accessories are in place;

- 8.4.8.13 the driver shall sign the Check-off Sheet indicating his/her satisfaction with the condition of the unit;
- 8.4.8.14 the driver shall be informed of the repairs carried out and the service vehicle along with the Fuel Debit Card and Log Book shall be handed over to him/her against his/her signature;
- 8.4.8.15 the driver shall make an entry in the Log Book indicating the repairs/servicing of the vehicle; and
- 8.4.8.16 vehicle servicing information shall be recorded in the VMS by the Check Point Staff.

8.4.6 External Maintenance at Area and Approved Garages

Service vehicles shall only be serviced or repaired at area and approved garages:

- 8.4.6.1 all request for the servicing/repair of service vehicles in Areas 1 & 2 shall be made to the respective SO i/c Area Garage;
- 8.4.6.2 in divisions where there is no area garage the service vehicles may be taken to an approved garage on the authorisation of SSP TMMD in consultation with Transport Manager for the division;
- 8.4.6.3 the unit must be assessed by the repairer and an estimate generated which is then forwarded to the SO i/c Area Garage or Divisional Transport Manager. Estimates will be checked, verified and signed by the SO i/c Area Garage and forwarded to TMMD for approval;
- 8.4.6.4 upon receipt of the estimates the Workshop Manager at TMMD shall conduct a review to ensure that pricing is within market value. If there are any queries or issues this will be communicated to the repairer and the SO i/c Area Garage;
- 8.4.6.5 the Divisional Transport Manager will then visit the repairer's garage regarding the work to be undertaken;
- 8.4.6.6 upon inspection of the estimates by the TMMD Work Shop Manager, recommendation is made to SSP TMMD for approval not exceeding \$300,000.00;
- 8.4.6.7 all estimates for work exceeding the threshold of \$300,000.00 shall be forwarded to ACP Services Branch for approval. If approved, a Commitment Requisition shall be prepared and forwarded along with estimate to the JCF Finance Branch for a Purchase Order to be prepared and forwarded to TMMD HQ;
- 8.4.6.8 once the work is completed, service vehicles must be road tested by a TMMD representative to ensure that the vehicle is road worthy;

8.4.6.9 a Post Repair Checklist see (**Appendix 1**) accounting for all repair/servicing works conducted must be prepared and signed by the repairer and the person collecting the unit and taken to TMMD for entry into the VMS and copy filed.

8.4.7 Collision/Incidents Reporting and Repairing Procedures

The reporting and administrative procedure of all accidents/incidents involving service vehicles shall be as follows:

8.4.7.1 all parties involved must make an official report at the nearest police station as soon as practicable and vehicles examined by a motor vehicle examiner from the Island Traffic Authority within twenty-four (24) hours of the accident;

8.4.7.2 service vehicles must be taken to TMMD garage for safe keeping as soon as possible;

8.4.7.3 Accident Unit must cause service vehicle to be examined by a certified motor vehicle assessor who will prepare an assessor's report and an estimate of repairs within 30 days after being examined;

8.4.7.4 a summary of the collision/incidents report must be submitted to SSP TMMD within 5 days of the incident/accident;

- i. collision /incidents report must be submitted to the Auditor General's Department for approval for repair; and
- ii. all files from the Office of the Attorney General must obtain a response within five (5) working days.

8.4.8 Pre-repairs Procedures

On receipt of the assessor's report a summary of the accident/incident shall be prepared and submitted to the Auditor General's Department for approval to facilitate repairs where appropriate. The information to be submitted should include:

8.4.8.1 JCF Information:

- i. a summary of the accident, to include date, time and division where the accident/incident occurred,
- ii. the name of the investigator,
- iii. full description of the service vehicle,
- iv. division in which the vehicle is assigned
- v. description of the damage, and
- vi. particular of persons involved and injuries, if any.

8.4.8.2 Third Party Information:

- i. vehicle description;

- ii. insurance information;
- iii. description of damage(s);
- iv. identification of person(s);
- v. injuries if any; and
- vi. estimated cost of repairs for vehicle damage if available or any other information deem pertinent.

8.4.8.3 Where the third party has accepted liability and is desirous of repairing the service vehicle the following procedure shall apply:

- 8.4.8.3.1 He/she must provide a letter to the Investigating Officer indicating that he/she has accepted liability and intend to stand the cost of repair(s);
- 8.4.8.3.2 the letter must be signed by him/her and witnessed by a Justice of the Peace (JP), an Attorney or a Notary Public;
- 8.4.8.3.3 it is recommended that the repairs be conducted by an approved garage and not TMMD;
- 8.4.8.3.4 if he/she wishes to use a garage that is not approved by the MNS it must be indicated;
- 8.4.8.3.5 a TMMD representative shall visit the garage and make assessment of its security and expertise;
- 8.4.8.3.6 all monies for the repair of the unit shall be paid to the repairer and not TMMD;
- 8.4.8.3.7 Sub-Officer, Accident Unit shall prepare and submit a report to the DSP Operations;
- 8.4.8.3.8 DSP Operations shall assess the report and make a determination whether or not repairs can be done to the unit and forward same to SSP TMMD with his/her recommendation;
- 8.4.8.3.9 SSP TMMD shall submit file to ACP, Support Services Branch for approval for the commencement of repair or otherwise. File must include the following documents:
 - i. Copy of collision/incidents report;
 - ii. assessor's report;
 - iii. letter of approval from Auditor General Department; and
 - iv. letter from third party indicating his/her acceptance of liability and intention to stand the cost of repair(s).
- 8.4.8.3.10 once an approval for repair(s) is received from the Auditor General's Department, ACP Support Services Branch shall approve the repairs to be done at an approve garage;
- 8.4.8.3.11 periodic follow-up on repairs must be done by a TMMD representative and a report forward to DSP Operations; and
- 8.4.8.3.12 the VMS and accident database must be updated accordingly and a physical copy kept by the Accident Unit

8.4.9 Upon completion of repair(s) to vehicle at Approved Garages

- 8.4.9.1 A certified TMMD mechanic and body repair specialist shall make checks and conduct test driving of unit to ensure quality repair and no additional damage(s):
- 8.4.9.2 where defects are observed, the vehicle shall be returned to the garage for corrective action; and
- 8.4.9.3 vehicles that are satisfactorily repaired shall be reassigned to regular operations.

8.5 Disposal

The Government of Jamaica comprehensive asset management policy for the public sector recommends that vehicles are depreciated and disposed of after **seven (7) years**. In addition, whenever the maintenance cost, or cost of repairing a JCF Fleet vehicle is considered exorbitant based on the value of the vehicle, *i.e. the vehicle becomes uneconomical to be repaired*, the vehicle should be recommended for the Board of Survey (BOS)

8.5.1 Board of Survey (BOS)

Service vehicles shall be deemed fit for disposal as BOS under the following circumstances:

- i. All service vehicles may be recommended for board of survey upon the expiration of seven (7) to ten (10) years unless they are assessed as being uneconomical or unserviceable before such period;
- ii. the maintenance cost, or cost of repairing a service vehicle is considered exorbitant based on the value of the vehicle;
- iii. service vehicle may be recommended for boarding under the following circumstances:
 - i. whenever the VMS flags a unit that has reached the maximum of seven (7) years;
 - ii. Commanding Officers must forward a list of all fleet under their command that is seven (7) years and older and/or those deemed to be unserviceable to SSP TMMD which will be verified by the VMS;
 - iii. an inspection shall be conducted by TMMD in the division to verify the state of the vehicles to make a determination if vehicles can be repaired; and
 - iv. during the inspection if any other unit is observed to be in a state of disrepair and unserviceable such unit will be added to the list for BOS.
- iv. a copy of the list will be sent to the Divisional Commander for the respective divisions who will make amendments and signed; and
- v. a final list shall be created and forwarded to ACP, Support Services Branch for further submission to the Ministry of Finance for approval.

8.6

Replacement of Vehicles

The criteria for replacement of vehicles are determined as follows:

8.6.1 vehicles may be replaced based on age, and/or mileage.

A patrol vehicle which attains 6 years or 150,000 miles/240,000 kilometres, whichever occurs first may be recommended for replacement.

8.6.2 when it is deemed uneconomical or inefficient to be retained in the fleet

8.6.3 whenever a unit is recommended for replacement it must be stripped of all its attached equipment and returned to its original state.

8.7 Access to Stores Building

8.7.1 Whenever the Store is closed, the keys for the metal shutter at the entrance are kept secured at the guard room in the firearm strong pan. The Sub Officer i/c Stores or his designate will retrieve the keys daily and hand over same at the end of the day.

8.7.2 The keys to the storerooms are kept in a vault inside the office of the Sub officer i/c of stores. Only the sub officer in-charge or his designate has access to the vault and will retrieve the keys daily to open the various storerooms and return the keys to the vault where they are held securely.

8.7.3 Each member of the store staff gain access to the administrative area by using an access code to enter once the shutter is open. However, a swiped card access system would be more ideal to replace the coded system.

8.7.4 No unauthorized persons should be allowed in any of the store rooms.

8.7.5 Under no circumstance should any store room be opened except under the supervision of a sub-officer.

8.7.6 On conclusion of duties the Store is securely locked by the Sub-officer in-charge of the store or his designate.

8.7.7 A copy of all keys for the stores department is kept in a vault at the office of the Senior Superintendent of Police in charge of the Transport Management and Maintenance Division.

8.8 Storage of inventory

8.8.1 All items received at the store must be placed in the appropriate storage area once they have been duly recorded. (Main storage area, oil house or tyre room)

8.8.2 The items are placed on shelves that are properly labeled with the description of each item and given a part number. These information are logged into the inventory section of the Vehicle Management System(VMS)

8.8.3 Batteries must not be kept in the main store and should be packed on board pallets.

8.8.4 Bulk oils and lubricants are stored in the oil room. Other cleaning chemicals are kept in an uncovered but enclosed area that adjoins the oil room.

8.8.5 Any infrastructural damages noted that need repairs must be immediately reported to the Senior Superintendent for the appropriate redress. This include broken shelves, leaking roof, infestation of termites, rodents etc.

- 8.8.6 The store men are required to keep the items neatly packed and to keep the store rooms clean.
- 8.8.7 The principle of first in first out must be applied to all stock
- 8.8.8 Liquid chemicals received must be properly labeled with the company name and date of receipt noted in bold on the drums with coloured spray paint.

8.9 Requests for Parts

- 8.9.1 Items are issued on application made by a Division, Section, Area or Branch or any other formation, to the SSP in-charge of TMMD.
- 8.9.2 The application is recorded, assigned a B8 number at the General Office and forwarded to the Sub-Officer in-charge of Stores authorizing the issuing of the items stated.
- 8.9.3 Request via an assessment done by section supervisors forms part of the feature; in this instance, the supervisor assess the need of the respective vehicle for servicing or for replacement of parts and makes an order in the prescribe order book. The order is then approved by SSP i/c TMMD or his designate and then taken to the stores. Goods are then supplied based on the availability.
- 8.9.4 Job cards obtained at the check point which indicate the purpose of visit to TMMD and intended repairs to be done, must accompany order books from the respective sections for examination by the sub-officer in-charge or his designate.
- 8.9.5 In addition, the Vehicle Management System (VMS) must be used to verify correctness of registration number and chassis number of the respective vehicle prior to the issuing of any parts. *(This is to ensure accurate update of the inventory system. The parts are then issued under the signature of the sub-officer in charge of dispatch/operations or his designate and received by the respective section supervisor or his designate.)*
- 8.9.6 If the parts requested are not readily available at TMMD stores, an assessment form is written up by the section supervisor and or the DSP in-charge operations outlining the repairs required or part needed and taken to the Sub-officer in-charge of the stores.
- 8.9.7 The information is then entered on the Vehicle Management System and the pink copy filed.
- 8.9.8 Supplier is contacted who will submit a quotation for the items required.
- 8.9.9 Upon receipt of the quote, a commitment requisition is prepared at the stores and submitted along with the completed assessment form and quote to the Finance and Compliance Officer and transitioned to the Ministry of National Security (Finance department) for a Purchase Order to be obtained.

NB all quotes are to be signed by the Sub-Officer in-charge of the Stores or his designate before submission.

- 8.9.10 A purchase order is obtained from the Ministry of National Security; the respective supplier is given a copy who will in turn deliver the goods stated therein. He will afterwards submit his invoice (bill) for payment along with his

purchase order. The delivery receipts are also attached after being certified by the sub-officer in-charge of the Stores.

8.9.11 Issuing of Stock

- i. The sub-officer in-charge of operations and the dispatch counter will first examine the request/application for any items and do the necessary checks and balance using the inventory system.
- ii. Being satisfied that request is authentic and the item is available, the store men will be given the instruction to bring to the issuing clerk the item requested.
- iii. The issuing clerk will then record in the appropriate delivery receipt book in triplicates the items that are available.
- iv. The dispatch sub-officer will examine the correctness of the items and sign as the authorizing officer after the issuing clerk would have first signed.
- v. The recipient of the items would then examine the goods to ascertain its correctness and write out his name, rank and number.
- vi. The white copy of the receipt booklet is removed and given to the data entry clerk to remove the quantity issued from the stock on the inventory system. The copy is then filed away.
- vii. On no occasion are items to be issued without the knowledge and authorization of the dispatch sub-officer.
- viii. All items must be issued from the dispatch counter except bulk chemicals.
- ix. A supervisor must be present when issuing chemicals from the storage area.
- x. Items that are required to be stocked at the Area Garages must be issued to the transport sub-officers in-charge of the respective Area Garage.

8.10 Removals of Stock Items Issued From Inventory

- 8.10.1 A senior data entry clerk is charged with the responsibility of supervising the process of removing issued stock items from the inventory system on a daily basis. The persons assign this task are not assigned duties to issue or receive goods.
- 8.10.2 In an effort to ensure a real time update of the inventory system, these data entry clerks will remove from the stock all items that have been issued.
- 8.10.3 The senior data entry clerk will take all the delivery receipts that have been removed from delivery books after the issuing of items and divide them among the other clerks in the department.
- 8.10.4 Each item removed is given a reference number created by the system. This number is written on the delivery receipt beside each item issued. The number is used to obtain information readily on the respective transaction.
- 8.10.5 The receipts are then filed away by date and month for easy retrieval.
- 8.10.6 The senior data entry clerk will report to the Sub-officer in-charge of TMMD stores all challenges that require attention.

8.11 Procedure for Checkpoint Grounds

- 8.11.1 All TMMD employees including civilians must be properly attired in keeping with workplace/JCF standards.
- 8.11.2 AT ALL TIMES, no less than **TWO** members of staff MUST be operating at the Checkpoint and the number **MUST** include at least one sworn member.
- 8.11.3 Vehicles entering the garage for repairs MUST be physically checked off and all tools accoutrements and defects noted on the prescribed checklist which must be signed by the driver when entering and exiting the facility, this includes units based at TMMD.
- 8.11.4 Absolutely NO prisoner, exhibit nor any unauthorized property is to be admitted in the Garage under any circumstances.
- 8.11.5 All vehicles entering and leaving the garage MUST be searched thoroughly in the presence of the driver.
- 8.11.6 No vehicle with any **VISIBLE DAMAGE** as a result of an accident is to be admitted in the garage for repairs **WITHOUT** ascertaining that a report of the accident has been submitted to SSP in charge TMMD.
- 8.11.7 At all times, all Advance Cards (Fuel Debit Cards) must be handed over for Service Vehicle to be repaired or serviced whether at TMMD or an Authorized Garage; this includes vehicles wrecked to the facilities.
- 8.11.8 Only vehicles owned by JCF are to be admitted at TMMD or Area garages for servicing or repairs.
- 8.11.9 All vehicles driven by TMMD employees and civilians are to be parked in the parking areas provided outside of the checkpoint; only vehicles delivering supplies at stores, removing garbage or attending to property maintenance are allowed to go beyond the checkpoint unless authorized by SSP in charge TMMD or designate.
- 8.11.10 Before new parts are issued, corresponding defective parts must be returned to the stores.
- 8.11.11 All vehicles that have been repaired must be brought to the checkpoint to be test driven and approved for delivery.
- 8.11.12 All units that are sent to authorize garages for repairs must be accompanied by a Repair Order (Job card) and a Post Vehicle Service and Repairs checklist.
- 8.11.13 Section supervisors are responsible for the security of all vehicles taken to the section for repairs even if it is parked elsewhere on the facility due to space constraints.
- 8.11.14 No parts or accessories must be removed from any vehicle in the garage and fitted to any other vehicle without approval of SSP in charge TMMD or designate.
- 8.11.15 No vehicle must be worked on in the precincts of TMMD during work hours unless authorized by SSP in charge TMMD or a senior manager.
- 8.11.16 On no occasion must TMMD personnel be seen resting or lounging in service vehicles taken in for repairs.
- 8.11.17 Personnel performing Ground Commander duties must be attired in No. One uniform or denim with badges of rank and is responsible for reporting, recording

- and investigating all unusual occurrences and report to SSP in charge TMMD through the chain of command.
- 8.11.18 Section supervisors are responsible for the custody of the keys for all units undergoing repairs at the section and MUST ensure that units are securely locked and keys left in a secure location.
 - 8.11.19 Section supervisors are responsible for all tools and equipment used at the section and must account for all such inventory when required.
 - 8.11.20 Section supervisors are to ensure that all tools are properly cleaned and securely locked away and the general areas cleaned at the end of the workday.
 - 8.11.21 No member of staff is to carry any tool or other equipment off the compound unless authorized by SSP in charge TMMD or a senior manager.
 - 8.11.22 No member of staff is permitted on the compound of TMMD after operating hours or weekends unless detailed for a duty or otherwise authorized by SSP in charge TMMD.
 - 8.11.23 No member of staff should communicate with any division or force driver informing them of the readiness of any unit. *(to be done by DSP Operations or designate)*
 - 8.11.24 All members of staff, sworn and unsworn are required to attend weekly parades and briefings.
 - 8.11.25 No foul or abusive language is to be used in the facility and personnel must conduct themselves with decorum and respect for self and others.

8.12 IN: Procedures at TMMD Checkpoint:

- 8.12.1 Advance card surrendered
- 8.12.2 Verification of vehicle information and security check done.
- 8.12.3 Nature of defects reported by driver
- 8.12.4 Logbook is inspected to ensure compliance
- 8.12.5 Prescribed checklist completed and the driver signs to its correctness and receives a copy.
- 8.12.6 Unit is assigned to the appropriate Section Supervisor to carries out assessment and repairs.
- 8.12.7 If the works required outsourcing, a Repair Order form is completed and signed by SSP TMMD or designate and attached to a Post Repairs checklist to accompany vehicles to the appropriate service provider. The checklist is completed by the service provider and returned to TMMD.

8.13 OUT: Procedures at TMMD Checkpoint:

- 8.13.1 when the vehicle is returned to the Checkpoint, an inspection is carried out by a Motor Vehicle Inspector who may test-drive vehicle to ensure reported defects were corrected;
- 8.13.2 checklist is completed and driver sighs to its correctness
- 8.13.3 advance card is returned to the driver and vehicle is released
- 8.13.4 all appointments for works on fleet vehicles are made by SSP TMMD or designate; **NO DIRECT CONTACT** is to be made with Service providers regarding Service Vehicle status by any JCF member except authorized by SSP TMMD

8.14 Procedure For Fuel Control

- 8.14.1 Each vehicle in the fleet is to be issued an Advance (Gas) Card to facilitate re-fuelling while on assignment and/or at end of duty. This card must be used only for official purposes and for the vehicle to which it is assigned. Each time it is used, a record must be made of the mileage at time of re-fuelling and the amount-of fuel taken.
- 8.14.2 Whenever a vehicle is taken in for servicing, the Advance Card must be surrendered to an appropriate authority (Commanding Officer or his designate, Fleet Manager, Chief Workshop Manager, etc.) and its surrender duly noted.
- 8.14.3 In the event a vehicle is disabled and the estimated time for repair exceeds one month, the assigned Advance Card must be forwarded to the Services Branch in order for it to be de-activated and the approved suppliers advised. Once the vehicle becomes operational again, the Card will be re-activated and returned, and the suppliers advised.

8.15 Safety

- 8.15.1 The main gate is to be kept closed and open only for vehicular traffic. All pedestrians should use the small gate provided.
- 8.15.2 On arrival at the Reception Area, employees and visitors must be interrogated by a member of staff to ensure legitimate business will be conducted before entering the facility.
- 8.15.3 No personnel visiting TMMD should be allowed inside the garage unsupervised.
- 8.15.4 All Service vehicles taken in for servicing or repairs are to be collected at the Checkpoint by a TMMD driver and delivered at the appropriate workshop unless the Check Point Supervisor or a Senior Sub Officer authorizes the driver to proceed. On completion, the vehicle is returned to the Checkpoint and handed over to the Force Driver.
- 8.15.5 All personnel when required must be attired in appropriate safety gear. Loose jewellery and other hazardous accoutrements must NOT be worn whilst on the garage floor effecting repairs.

8.16 Approved Garages for Area 1 and Area 2

Transport Managers/ Sub Officers in charge Transport to have oversight of all approved garages, that services and repairs JCF units. The following procedures shall apply:

- 8.16.1 When a vehicle is to be serviced or repaired the SOI/C Area Garage is prompted by an email, via telephone or by text message (WhatsApp) by the Transport Sub Officer in charge of the division requiring such services.

- 8.16.2 The unit will be taken to TMMD Area garages or an Authorized Garage by the Sub Officer or his designate.
- 8.16.3 A Repair Order is generated and approved by SSP TMMD or designate and should accompany the unit to the repairer (**Appendix 3**)
- 8.16.4 Units taken to approve garages will be assessed by the repairer and an estimate generated. This estimate will be checked, verified by the SOI/C Area Garage or a representative who will also verify work done via a post repairs checklist.
- 8.16.5 All estimates will be reviewed by the Workshop Manager to ensure that pricing is within market value. If there are any queries or issues this would be communicated to the repairer and the S.O i/c Area Garage.
- 8.16.6 Before work commences approval **MUST** be given by Senior Superintendent of Police, TMMD.
- 8.16.7 All estimates exceeding the **threshold of \$300,000.00** are sent to ACP Services Branch for approval.
- 8.16.8 Once approval is given, the Commitment requisition is prepared and sent along with the estimate to the Jamaica Constabulary Force's Finance Branch. The Branch in turn will prepare the Purchase Order and forward to TMMD HQ.
- 8.16.9 Once the work is completed, the Vehicles will be road tested by the Area representatives to ensure that the defects have been repaired and to ensure that there are no other defects.
- 8.16.10 A Post Repairs checklist (**Appendix 1**) accounting for all works done on the vehicle is to be prepared by the repairer and handed to TMMD representative; this information will be entered into the Vehicle Management System as permanent record.
- 8.16.11 A *Declaration of Satisfaction* **MUST** be completed on the Post Repairs checklist and submitted to **TMMD HQ**.
- 8.16.12 The invoice is then submitted to TMMD HQ for payment.

8.17 Accident Management

- 8.17.1 Collect daily reports by 9:00 am on service vehicle accident from the Police Emergency Control Centre (PECC) then verify the information with the JCF Accident Investigation and Reconstruction Unit (AIRU)
- 8.17.2 Make enquiry from all Divisions/Formations through the Division's Fleet Manager and Traffic department for additional or omitted information or information on any other accident or incident involving service vehicles not reported to PECC.
- 8.17.3 make calls to the Divisions traffic department, Investigator or other relevant persons to ascertain correct details or additional information on accidents as necessary (visit the Divisions and inspect records where necessary);
- 8.17.4 record information in Accident database (VMS);
- 8.17.5 liaise with Assessor;
- 8.17.6 cause the assessment report and estimate of expenditure to be done within specified timeline (30 days or time agreed with assessor);

- 8.17.7 receive and review accident file for completeness;
- 8.17.8 enclose assessor's report and estimate of expenditure in file;
- 8.17.9 submit file to Support Services Branch;
- 8.17.10 on receipt of the Assessor's report, prepare a summary of the information to be submitted to ACP Support Services Branch for onward transmission to the Auditor General's office for approval to facilitate repairs where appropriate. The information to be submitted should include:
 - i. date /time/ div. occurred;
 - ii. name of investigator;
 - iii. service vehicle description, division assigned and damage; Personnel identity and injuries; and
 - iv. summary of accident.
 - v. **where third party is involved** the vehicle description, Insurance and damage; Identification of persons and injuries if any;
 - vi. estimated cost of repairs; and
 - vii. contact PECC for third party insurance information.
- 8.17.11 respond to all files from the Office of the Attorney General within **five (5) working days** or as soon as the information becomes available;
- 8.17.12 recommend through DSP Operations, repairs that can be done internally and those to be outsourced;
- 8.17.13 once a response/ approval is received from the Auditor General's office, (ref. 5.6) vehicles approved for repairs may be repaired internally at JCF/TMMD facilities or outsourced; and
- 8.17.14 estimates for vehicles to be outsourced for repairs are sent to Assistant Commissioner of Police, Support Services Branch under cover for approval. Accompanying documents are:
 - i. copy of accident report;
 - ii. Assessor's report; and
 - iii. the letter of approval from Auditor General's office.
- 8.17.15 Follow up is done on repairs or otherwise (recommended for Board of Survey) and records updated in the Vehicle Management system.

9.0 Legislative Authority/Guiding Principles

- 9.1 Government of Jamaica Revised Comprehensive Motor Vehicle Policy for the Public Sector (2017).
- 9.2 JCF MNS Fleet Management policy

10.0 Records and Related Forms

- 10.1 Vehicle checklist (entry and exit)
- 10.2 Repair order form (Job Card)
- 10.3 Post Vehicle Service/Repair Checklist
- 10.4 Service vehicle accidents/incident form

11.0 Roles and Functions

11.1 Role of Transport Management and Maintenance Division (TMMD)

The Transport Management and Maintenance Division (TMMD) is under the direction of the Head of the Support and Services Branch and is ultimately responsible for the maintenance and repair of all motor vehicles in the JCF fleet. This responsibility is usually delegated to Commanding Officers for vehicles deployed under their jurisdiction. The TMMD also has the responsibility for:

- 11.1.1 Sourcing and stocking an inventory of parts and accessories for the classes and models of vehicles in the JCF fleet.
- 11.1.2 Establishing a system of controls to ensure accountability for the use of parts and accessories.
- 11.1.3 Liaising with the Heads of Areas, Divisions and Formations to ensure compliance with the maintenance and servicing schedules for vehicles;
- 11.1.4 Performing servicing and repairs for vehicles within designated geographic areas and/or assigning work to approved private garages;
- 11.1.5 Liaising with, and monitoring the operators of approved private garages to ensure that standards are maintained, prices remain competitive, and accounts are settled;
- 11.1.6 Determining when vehicles have passed their useful life and should be disposed of either by scrapping for usable parts or sold through established GoJ procedures;
- 11.1.7 Maintaining an inventory of used parts for re-use in other vehicles.

11.2 TMMD Administrative Manager

It shall be the responsibility of the Administrative Manager to:

- 11.2.1 supervise day-to-day operations of the VMS;
- 11.2.2 coordinate training and evaluate the performance of Fleet/transport staff;
- 11.2.3 develop, review and improve administrative systems, policies and procedures
- 11.2.4 ensure adequate supplies and equipment are in stock
- 11.2.5 collaborate with the Finance and accounts unit and the Management team to prepare budgets, monitor spending and other expenses
- 11.2.6 plan, schedule and promote office meetings, conferences, interviews, orientations, training sessions, etc.
- 11.2.7 build new and expand existing skills by engaging in educational opportunities.

11.3 Divisional Fleet Manager

The Divisional Fleet Manager shall be responsible for the following:

- 11.3.1 manage, maintain and accountable for all service Fleets, accessories and devices affixed under his/her supervision;
- 11.3.2 maintain inventory and all relating documentations of fleets assigned to his/her division/formation;
- 11.3.3 provides monthly returns to his/her Administrative Officer by the 5th day of each month to be forwarded to ACP Support Services and SSP TMMD; and

11.3.4 liaising with TMMD for update on the repairs and servicing of fleets.

11.4 Sub-Officer i/c Accidents/Incidents Records

The Sub-Officer i/c Accident/Incident Records shall:

- 11.4.1 contact Police Emergency Control Centre (PECC) on a daily basis to ascertain information on service vehicle accidents/incidents reported to include third-party information;
- 11.4.2 liaise with the JCF Accident Investigation and Reconstruction Unit (AIRU) to verify all reported cases of accident/incident involving service vehicles;
- 11.4.3 liaise with divisional traffic departments, to ascertain accurate and additional information on accident/incident involving service vehicles which occurred within the division;
- 11.4.4 conduct enquiries into all accident/incidents involving service vehicles;
- 11.4.5 prepare a listing of collision/incident reports along with copies of collision/incident reports and submit to the independent assessor for appropriate inspection and preparation of an estimated cost of repairs.
- 11.4.6 ensure that files requested by the Attorney General Department are completed and submitted in a timely manner; and
- 11.4.7 update VMS with accident/incident reports and other relevant information.

11.5 Sub-Officer i/c Stores (Stores Manager)

The Sub-Officer i/c Stores shall:

- 11.5.1 conduct procurement activities, attend to requests on assessment and application as well as safety and staff welfare issues;
- 11.5.2 liaise with Finance and Compliance Officer on matters relating to invoices, quotes, bills for payment etc. for all suppliers;
- 11.5.3 validate inventory system to verify that the items stated on the invoices submitted for payment were indeed delivered;
- 11.5.4 ensure timely submission of all Invoices for payments after certifying that goods are delivered;
- 11.5.5 ensure that items issued are taken off the inventory system accordingly;
- 11.5.6 ensure that old Motor Vehicle Log Books returned are properly filed away for future reference;
- 11.5.7 ensure that service parts such as disc pads, brake shoes, filters, plugs replacement lubricants, batteries and new log books are always available at the stores for the fleet of service vehicles;
- 11.5.8 liaise with the chief garage supervisor and the sub-officer in-charge of the garage to have discussions and recommendations as it relates to type and quality of products best suited for the JCF fleet of vehicles; and

- 11.5.9 perform a weekly inspection of the stores facility to identify whether or not there are any infrastructure deficiencies or inadequacy as well as any other need identified and make report to the Senior Superintendent in-charge of TMMD in written monthly reports.

11.6 Sub-Officer i/c Stock Taking and Quality Assurance

The Sub-Officer i/c Stock Taking and Quality Assurance shall:

- 11.6.1 receive all items of stock entering the stores, with a team of three (3) data entry clerks. Two of whom records all items received on the inventory system and records book (backup system). Items received must be recorded including quantity and brand made.
- 11.6.2 In addition these two data entry clerks are responsible to receive quotes submitted and prepare commitment requisitions to be submitted to the Sub-Officer in-charge TMMD Stores.
- 11.6.3 The other data entry clerk primarily records on the inventory system all assessment requests submitted by the garage section supervisors and any other duty assigned from time to time.
- 11.6.4 These clerks must not issue any items neither should they be given the responsibility to adjust inventory after items are issued.
- 11.6.5 ensure that all items received are properly recorded and placed in the appropriate storage areas ASAP.
- 11.6.6 examine all items received to ensure that the items delivered are of the desired quality and are consistent with quotes submitted which underscore the quantity and description of the items therein.
- 11.6.7 receive from the various garage supervisors request for repair jobs to be done on engine heads/blocks, alternators, starters and rack and pinions etc. He/she will ensure that these job requests are recorded in the appropriate books and sent to the respective external repairer ASAP.
- 11.6.8 on receipt of completed repaired jobs, ensure that the respective garage supervisor is notified, in order to retrieve such repaired part under signature in the appropriate register.
- 11.6.9 make periodic checks on stock items using physical checks and the inventory system to identify shortages and make recommendation to the Sub-Officer in-charge TMMD stores to cause stock to be replenished.

11.7 Section Supervisor, TMMD

The Section Supervisor shall:

- 11.7.1 make assessment of the parts and service items required when a service vehicle is taken to TMMD for general servicing and/or repairs;
- 11.7.2 take the job sheet along with the order book to the stores to acquire the necessary parts;
- 11.7.3 sign or caused to be signed the delivery book along with the stores dispatch clerk for parts that are requested;

- 11.7.4 check the service vehicle after servicing and/or repairs for any other defects and test drive
- 11.7.5 to ensure compliance with roadworthy standards;
- 11.7.6 sign and placed a next service mileage sticker in an easily visible section of the unit; and
- 11.7.7 write up or cause the job sheet to be written up to include:
 - a. parts and service items used;
 - b. description of work done;
 - c. whether the job was completed;
 - d. name of technician who performed the work; and
 - e. signature of supervisor.

11.8 Sub-Officer i/c Area Garage

The Sub-Officer i/c Area Garage shall:

- 11.8.1 be aware whenever a vehicle needs to be serviced or repaired and is prompted by an email, telephone or by text message (WhatsApp) by the Transport Sub- Officer in charge of the division requiring such services;
- 11.8.2 visit the repairer's garage as the work to be undertaken regarding the service vehicle after being assessed by the repairer and an estimate generated. These estimates will then be checked, verified and signed by the SOI/C Area Garage and forwarded to TMMD; and
- 11.8.3 deal with any queries or issues that should arise when estimates have been reviewed by the Workshop Manager to ensure that pricing is within market value.

11.9 Finance and Compliance Officer

The Finance and Compliance Officer shall:

- 11.9.1 manage the monthly warrants (money allocated for payment to suppliers and service providers);
- 11.9.2 liaise with different suppliers and service providers;
- 11.9.3 manage cash imprest of \$30,000.00 and cheque imprest of \$3,000,000.00;
- 11.9.4 prepare and submit list of estimates and quotes exceeding \$300,000.00 for repairs of service vehicles to SSP TMMD for onward submission to ACP, Support Services Branch for approval and commitment by the JCF Finance Branch;
- 11.9.5 issue GCT exemption certificate to suppliers;
- 11.9.6 prepare and submit quarterly reports for the finance office to SSP TMMD for onward submission to ACP, Support Services Branch;
- 11.9.7 check for correctness of commitment and payment processes for stores then dispatching to JCF Finance Branch for commitment or payment;
- 11.9.8 check for correctness of commitment and payment processes for service vehicle repairs and signed commitment requisition then dispatching to JCF Finance Branch for commitment or payment; and

- 11.9.9 facilitate bills for payment from service providers, conduct detailed checks to verify work done or goods supplied and preparing signed cover letter to SSP TMMD for submission to JCF Finance Branch for commitment and payment.

11.10 System management (Vehicle Management System (VMS))

- 11.10.1 The sub-officer in-charge of the stores in consultation with the IT personnel will have all access to the inventory system (VMS) to make adjustment, correct erroneous input and void incorrect postings. He should make a record of all such occurrences in his diary and report same to the Commanding Officer.
- 11.10.2 The sub-officer in-charge of the store must check inventory system to ensure that items are accurately posted by the data entry clerk before updating the system.

11.11 Responsibilities of the Sub-Officer in-charge TMMD Stores

The Sub-Officer in-charge TMMD Stores shall:

- 11.11.1 Report directly to the Superintendent in-charge of TMMD on all relevant and pertinent issues arising at the Stores.
- 11.11.2 Conduct Procurement activities, attending to requests on assessment and application as well as safety in the stores and staff welfare issues and general supervision.
- 11.11.3 Liaise with the Finance and Compliance officer on matters relating to invoices, quotes, bills for payment etc. for all suppliers
- 11.11.4 Ensure timely submission of all bills for payment after certifying that goods are delivered in good condition.
- 11.11.5 Utilize the inventory system to verify that the items stated on the bills submitted for payment were indeed delivered.
- 11.11.6 Ensure that items issued are taken off the inventory system accordingly.
- 11.11.7 Ensure that old log books returned are properly filed away for future reference.
- 11.11.8 Ensure that service parts such as disc pads, brake shoes, filters, plugs replacement lubricants, batteries and new log books are always available at the stores for the fleet of service vehicles.
- 11.11.9 Liaise with the chief garage supervisor and the sub-officer in-charge of the garage to have discussions and recommendations as it relates to type and quality of products best suited for the JCF fleet of vehicles.
- 11.11.10 Make weekly inspection of the stores facility to identify whether or not there are any infrastructure deficiencies or inadequacy as well as any other need identified and make report to the Senior Superintendent in-charge of TMMD in written monthly reports.

11.12 Responsibilities of the Sub-Officer in-charge receiving of stock items and quality assurance

- 11.12.1 Should not be less than that of the rank of Sergeant and reports directly to the sub-officer in-charge of the TMMD stores. The responsibilities include:
- 11.12.2 Receiving of all items of stock entering the stores, with a team of three (3) data entry clerks. Two of whom records all items received on the inventory system and records book (backup system). Items received must be recorded including quantity and brand made; example, (ten (10) tropical batteries NS60: twenty (20) triangle 185/70/14 tyres);
- 11.12.3 In addition these two data entry clerks are responsible to receive quotes submitted and prepare commitment requisitions to be submitted to the Sub-Officer in-charge TMMD Stores;
- 11.12.4 The other data entry clerk primarily records on the inventory system all assessment requests submitted by the garage section supervisors and any other duty assigned from time to time
- 11.12.5 These clerks must not issue any items neither should they be given the responsibility to adjust inventory after items are issued.
- 11.12.6 This Sub-officer must ensure that all items received are properly recorded and placed in the appropriate storage areas ASAP.
- 11.12.7 The sub-officer must examine all items received to ensure that the items delivered are of the desired quality and are consistent with quotes submitted which underscore the quantity and description of the items therein.
- 11.12.8 The sub-officer will receive from the various garage supervisors request for repair jobs to be done on engine heads/blocks, alternators, starters and rack and pinions etc. He/she will ensure that these job requests are recorded in the appropriate books and sent to the respective external repairer ASAP.
- 11.12.9 He/she shall on receipt of completed repaired jobs, ensure that the respective garage supervisor is notified, in order to retrieve such repaired part under signature in the appropriate register.
- 11.12.10 This sub-officer will make periodic checks on stock items using physical checks and the inventory system to identify shortages and make recommendation to the Sub-Officer in-charge TMMD stores to cause stock to be replenished.

11.13 Responsibilities of the Sub-Officer in-charge of Operations/Issuing of Stocks

- 11.13.1 The operations sub-officer is in-charge of issuing of all items from the stores; and the senior data entry clerk who manages the removal of stock items issued from the inventory system.
- 11.13.2 This sub officer is responsible for the supervision of the dispatch counter; this forms the main responsibility of the Sub-Officer in-charge of operations/issuing. His team should consist of at least, one constable or corporal, ten other personnel to include two (2) dispatch clerks, four (4) data entry clerks and four (4) store men.
- 11.13.3 He must ensure that all requests for any issue are duly made via requisition from garage supervisors or by application from the various branch, divisions, and sections/departments, duly authorized by TMMD Commanding Officer or Administration or Operational Officer.
- 11.13.4 Ensure that the items being issued are correctly identified, described and recorded in the appropriate delivery receipts; double check all delivery receipts recorded by the issuing clerks to ensure that no errors are made and that items being issued correspond with the items recorded. However, if errors are detected the matter must be reported immediately to the sub-officer in-charge TMMD stores with the view to have correction updated.

NB errors made at the dispatch counter will affect the inventory system in a deleterious way, hence the imperatives of accuracy at all times.

- 11.13.5 He must ensure that the store men carry out their functions which include cleaning of the storerooms, packing of shelves and retrieving of goods for issuing
- 11.13.6 Ensure that the items are placed at the appropriate bin locations and that all items issued in the delivery books reflect their respective bin locations
- 11.13.7 He must ensure that all persons leaving the main store rooms are searched before leaving
- 11.13.8 He must ensure that no unauthorized persons enter the store rooms

11.14 Responsibilities of the sub Officer at delivery Area (receiving of parts etc.)

- 11.14.1 All deliveries must be supervised by a senior sub-officer not below the rank of a sergeant.
- 11.14.2 All items must be checked to ascertain quality, quantity and the brand especially of vehicle spare parts, tyres and batteries.
- 11.14.3 All pertinent information is to be noted to include company name, description of items whether genuine or otherwise as also the correct price of items being delivered.
- 11.14.4 All items delivered must be posted on the inventory system as well as enter in the related books which serve as a backup system within the same day but not more than in twenty-four hours.
- 11.14.5 All goods received in the reception area must be taken to the respective store room area as soon as they have been checked off by the appropriate officer.

11.14.6 Using a printed list of items received, the store room supervisor will double check the quantity and quality of items received, placed them in the appropriate bin location and forward the checked list to the Sub-Officer in charge TMMD stores for items to be updated on inventory system.

NB: Until these items above are updated by the Sub Officer i/c TMMD Stores, no subsequent adjustment can be made to the stock after an item is issued; hence, after data is entered by the receiving clerk, the items must be updated by the sub-officer or his designate.

11.15 Responsibility and Accountability of Drivers

Each driver assigned to drive a police service vehicle is accountable to his/her Commanding Officer and also the Fleet Manager, is required to observe the provisions of the Road Traffic Act, Fleet Management Policy and the Standard Operating Procedures governing the Care and Control of service vehicle equipment while it is in his/her care. Drivers are responsible to ensure that:

- 8.17.16 the Log Book for the particular vehicle is in the vehicle at all times and its security is assured;
- 8.17.17 prior to departure on an assignment, information regarding the Authorizing Officer, the nature of the assignment and the directions received are recorded in the Log Book;
- 8.17.18 the assigned vehicle is inspected to note; confirm and record the physical condition, reconcile the equipment in the vehicle against the record in the Log Book, and note any discrepancy;
- 8.17.19 any defects, deficiencies, etc. are entered immediately in the Log Book and brought to the attention of the Authorizing Officer.

NB. When a vehicle is being taken over directly from another driver, both drivers shall conduct the inspection of the vehicle as outlined at 11.15 and sign the Logbook to confirm the findings and conclusions.
