6. Staff Responsibilities	5
7. Storage of inventory	8
8. Request for Parts etc.	9
9. Issuing of Stock	10
10. Removals of Stock Items Issued From Inventory	11

1.0 Introduction

- 1.1 The mission of the Transport Management and Maintenance Division is to keep the JCF mobile. Critical to this objective is the Stores Department which has a multiplicity of functions. These include but are not limited to: the procurement of goods and equipment for use by TMMD, service and replacement parts for the fleet of JCF vehicles, the management of the receiving, storing and issuing of all items. In addition, the acquisition of quotes from suppliers, the certifying of bills for payment and subsequent submissions that are done at the TMMD stores.
- 1.2 The store has a contemporary inventory system that allows the management team to do quick analysis of the stock of items which informs readily on the need to replenish the stock or otherwise. Bi-annual stock taking is done to reconcile movement of stock and records as well as a yearly audit from the Government auditors. In addition, periodic cycle counts are done as a part of the check and balance practice of the department
- 1.3 The complement of the staff should be 1 Inspector, 2 Sergeant, 2 Corporal, 2 Constables and 10 other personnel including Janitors.
- 1.4 The opening hours are 8:00 am – 5:00 pm on weekdays only and 9am to 2pm on Saturdays. The Stores remains close on a Sunday except in special circumstances.
- 1.5 The procedures outlined in this document are geared primarily towards the TMMD stores establishing a systematic flow of activities in receiving, storing, issuing and accounting accurately for the items of government stock and miscellaneous properties.
- 1.6 It will assist the administration to understand how the stores operates and hold individuals accountable for their stewardship in their respective areas of responsibilities should there be any improprieties.
- 1.7 It may also serve as a guide to succeeding management teams to have an in-depth appreciation of the procedures at the stores. The document is not absolute at this juncture and is open for review, amendment, editing etc.

2.0 Purpose

The purpose of this SOP is to highlight the operations of the TMMD Stores including the processes of procurement, receiving, inventory and recording, storage and distribution of parts. It involves access to the facility and security measures, how requests are treated and the accountability framework.

3.0 Scope

These standard operating procedures applies to all sworn and unsworn members of the Transport Management and Maintenance Division (TMMD) and include contractors and other stakeholders.

4.0 System management (Vehicle Management System (VMS))

- 4.1** The sub-officer in-charge of the stores in consultation with the IT personnel will have all access to the inventory system (VMS) to make adjustment, correct erroneous input and void incorrect postings. He should make a record of all such occurrences in his diary and report same to the Commanding Officer.
- 4.2** The sub-officer in-charge of the store must check inventory system to ensure that items are accurately posted by the data entry clerk before updating the system.

5.0 Access to Stores Building:

- 5.1** Whenever the Store is closed, the keys for the metal shutter at the entrance are kept secured at the guard room in the firearm strong pan. The Sub Officer i/c Stores or his designate will retrieve the keys daily and hand over same at the end of the day.
- 5.2** The keys to the storerooms are kept in a vault inside the office of the Sub officer i/c of stores. Only the sub officer in-charge or his designate has access to the vault and will retrieve the keys daily to open the various storerooms and return the keys to the vault where they are held securely.
- 5.3** Each member of the store staff gain access to the administrative area by using an access code to enter once the shutter is open. However, a swiped card access system would be more ideal to replace the coded system.
- 5.4** No unauthorized persons should be allowed in any of the store rooms.
- 5.5** Under no circumstance should any store room be opened except under the supervision of a sub-officer.
- 5.6** On conclusion of duties the Store is securely locked by the Sub-officer in-charge of the store or his designate
- 5.7** A copy of all keys for the stores department are kept in a vault at the office of the Senior Superintendent of Police in charge of the Transport Management and Maintenance Division

6.0 Staff Responsibilities

- 6.1** For prudent management and accountability the staff has been subdivided by assigning specific roles and functions in order to achieve the desired objectives of the department. The areas of responsibility are supervised by the following;
- 6.2 Responsibilities of the Sub-Officer in-charge TMMD Stores**
- 6.2.1** Report directly to the Superintendent in-charge of TMMD on all relevant and pertinent issues arising at the Stores.
 - 6.2.2** Conduct Procurement activities, attending to requests on assessment and application as well as safety in the stores and staff welfare issues and general supervision.
 - 6.2.3** Liaise with the Finance and Compliance officer on matters relating to invoices, quotes, bills for payment etc. for all suppliers
 - 6.2.4** Ensure timely submission of all bills for payment after certifying that goods are delivered in good condition.
 - 6.2.5** Utilize the inventory system to verify that the items stated on the bills submitted for payment were indeed delivered.
 - 6.2.6** Ensure that items issued are taken off the inventory system accordingly.
 - 6.2.7** Ensure that old log books returned are properly filed away for future reference.
 - 6.2.8** Ensure that service parts such as disc pads, brake shoes, filters, plugs replacement lubricants, batteries and new log books are always available at the stores for the fleet of service vehicles.
 - 6.2.9** Liaise with the chief garage supervisor and the sub-officer in-charge of the garage to have discussions and recommendations as it relates to type and quality of products best suited for the JCF fleet of vehicles.
 - 6.2.10** Make weekly inspection of the stores facility to identify whether or not there are any infrastructure deficiencies or inadequacy as well as any other need identified and make report to the Senior Superintendent in-charge of TMMD in written monthly reports.
- 6.3 Responsibilities of the Sub-Officer in-charge receiving of stock items and quality assurance**

Should not be less than that of the rank of Sergeant and reports directly to the sub-officer in-charge of the TMMD stores. The responsibilities include:

- 6.3.1** Receiving of all items of stock entering the stores, with a team of three (3) data entry clerks. Two of whom records all items received on the inventory system and records book (backup system). Items received must be recorded including quantity and brand made; example, (ten (10) tropical batteries NS60: twenty (20) triangle 185/70/14 tyres);
- 6.3.2** In addition these two data entry clerks are responsible to receive quotes submitted and prepare commitment requisitions to be submitted to the Sub-Officer in-charge TMMD Stores;
- 6.3.3** The other data entry clerk primarily records on the inventory system all assessment requests submitted by the garage section supervisors and any other duty assigned from time to time
- 6.3.4** These clerks must not issue any items neither should they be given the responsibility to adjust inventory after items are issued.
- 6.3.5** This Sub-officer must ensure that all items received are properly recorded and placed in the appropriate storage areas ASAP.
- 6.3.6** The sub-officer must examine all items received to ensure that the items delivered are of the desired quality and are consistent with quotes submitted which underscore the quantity and description of the items therein.
- 6.3.7** The sub-officer will receive from the various garage supervisors request for repair jobs to be done on engine heads/blocks, alternators, starters and rack and pinions etc. He/she will ensure that these job requests are recorded in the appropriate books and sent to the respective external repairer ASAP.
- 6.3.8** He/she shall on receipt of completed repaired jobs, ensure that the respective garage supervisor is notified, in order to retrieve such repaired part under signature in the appropriate register.
- 6.3.9** This sub-officer will make periodic checks on stock items using physical checks and the inventory system to identify shortages and make recommendation to the Sub-Officer in-charge TMMD stores to cause stock to be replenished.

6.4 Responsibilities of the Sub-Officer in-charge of Operations/Issuing of Stocks

The operations sub-officer is in-charge of issuing of all items from the stores; and the senior data entry clerk who manages the removal of stock items issued from the inventory system.

6.4.1 This sub officer is responsible for the supervision of the dispatch counter; this forms the main responsibility of the Sub-Officer in-charge of operations/issuing. His team should consist of at least, one constable or corporal, ten other personnel to include two (2) dispatch clerks, four (4) data entry clerks and four (4) store men.

6.4.2 He must ensure that all requests for any issue are duly made via requisition from garage supervisors or by application from the various branch, divisions, and sections/departments, duly authorized by TMMD Commanding Officer or Administration or Operational Officer.

6.4.3 Ensure that the items being issued are correctly identified, described and recorded in the appropriate delivery receipts; double check all delivery receipts recorded by the issuing clerks to ensure that no errors are made and that items being issued correspond with the items recorded. However, if errors are detected the matter must be reported immediately to the sub-officer in-charge TMMD stores with the view to have correction updated.

NB errors made at the dispatch counter will affect the inventory system in a deleterious way, hence the imperatives of accuracy at all times.

6.4.4 He must ensure that the store men carry out their functions which include cleaning of the storerooms, packing of shelves and retrieving of goods for issuing

6.4.5 Ensure that the items are placed at the appropriate bin locations and that all items issued in the delivery books reflect their respective bin locations

6.4.6 He must ensure that all persons leaving the main store rooms are searched before leaving

6.4.7 He must ensure that no unauthorized persons enter the store rooms

6.5 Responsibilities of the sub Officer at delivery Area (receiving of parts etc.)

- 6.5.1 All deliveries must be supervised by a senior sub-officer not below the rank of a sergeant.
- 6.5.2 All items must be checked to ascertain quality, quantity and the brand especially of vehicle spare parts, tyres and batteries.
- 6.5.3 All pertinent information is to be noted to include company name, description of items whether genuine or otherwise as also the correct price of items being delivered.
- 6.5.4 All items delivered must be posted on the inventory system as well as enter in the related books which serve as a backup system within the same day but not more than in twenty-four hours.
- 6.5.5 All goods received in the reception area must be taken to the respective store room area as soon as they have been checked off by the appropriate officer.
- 6.5.6 Using a printed list of items received, the store room supervisor will double check the quantity and quality of items received, placed them in the appropriate bin location and forward the checked list to the Sub-Officer in charge TMMD stores for items to be updated on inventory system.

NB: Until these items above are updated by the Sub Officer i/c TMMD Stores, no subsequent adjustment can be made to the stock after an item is issued; hence, after data is entered by the receiving clerk, the items must be updated by the sub-officer or his designate.

7.0 Storage of inventory

- 7.1 All items received at the store must be placed in the appropriate storage area once they have been duly recorded. (Main storage area, oil house or tyre room)
- 7.2 The items are placed on shelves that are properly labeled with the description of each item and given a part number. These information are logged into the inventory section of the Vehicle Management System(VMS)
- 7.3 Batteries must not be kept in the main store and should be packed on board pallets.
- 7.4 Bulk oils and lubricants are stored in the oil room. Other cleaning chemicals are kept in an uncovered but enclosed area that adjoins the oil room.

- 7.5 Any infrastructural damages noted that need repairs must be immediately reported to the Senior Superintendent for the appropriate redress. This include broken shelves, leaking roof, infestation of termites, rodents etc.
- 7.6 The store men are required to keep the items neatly packed and to keep the store rooms clean.
- 7.7 The principle of first in first out must be applied to all stock
- 7.8 Liquid chemicals received must be properly labeled with the company name and date of receipt noted in bold on the drums with coloured spray paint.
- 8.0 Requests for Parts etc. *(Parts are requested by various means)***
- 8.1 Items are issued on application made by a Division, Section, Area or Branch or any other formation, to the SSP in-charge of TMMD.
- 8.2 The application is recorded, assigned a B8 number at the General Office and forwarded to the Sub-Officer in-charge of Stores authorizing the issuing of the items stated.
- 8.3 Request via an assessment done by section supervisors forms part of the feature; in this instance, the supervisor assess the need of the respective vehicle for servicing or for replacement of parts and makes an order in the prescribe order book. The order is then approved by SSP i/c TMMD or his designate and then taken to the stores. Goods are then supplied based on the availability.
- 8.4 Job cards obtained at the check point which indicate the purpose of visit to TMMD and intended repairs to be done, must accompany order books from the respective sections for examination by the sub-officer in-charge or his designate.
- 8.5 In addition, the Vehicle Management System (VMS) must be used to verify correctness of registration number and chassis number of the respective vehicle prior to the issuing of any parts. *(This is to ensure accurate update of the inventory system. The parts are then issued under the signature of the sub-officer in charge of dispatch/operations or his designate and received by the respective section supervisor or his designate.)*
- 8.6 If the parts requested are not readily available at TMMD stores, an assessment form is written up by the section supervisor and or the DSP in-charge operations outlining the repairs required or part needed and taken to the Sub-officer in-charge of the stores.

- 8.7** The information is then entered on the Vehicle Management System and the pink copy filed.
- 8.8** Supplier is contacted who will submit a quotation for the items required.
- 8.9** Upon receipt of the quote, a commitment requisition is prepared at the stores and submitted along with the completed assessment form and quote to the Finance and Compliance Officer and transitioned to the Ministry of National Security (Finance department) for a Purchase Order to be obtained. *NB all quotes are to be signed by the Sub-Officer in-charge of the Stores or his designate before submission.*
- 8.10** A purchase order is obtained from the Ministry of National Security; the respective supplier is given a copy who will in turn deliver the goods stated therein. He will afterwards submit his invoice (bill) for payment along with his purchase order. The delivery receipts are also attached after being certified by the sub-officer in-charge of the Stores.

9.0 Issuing of Stock

- 9.1** The sub-officer in-charge of operations and the dispatch counter will first examine the request/application for any items and do the necessary checks and balance using the inventory system.
- 9.2** Being satisfied that request is authentic and the item is available, the store men will be given the instruction to bring to the issuing clerk the item requested.
- 9.3** The issuing clerk will then record in the appropriate delivery receipt book in triplicates the items that are available.
- 9.4** The dispatch sub-officer will examine the correctness of the items and sign as the authorizing officer after the issuing clerk would have first signed.
- 9.5** The recipient of the items would then examine the goods to ascertain its correctness and write out his name, rank and number.
- 9.6** The white copy of the receipt booklet is removed and given to the data entry clerk to remove the quantity issued from the stock on the inventory system. The copy is then filed away.
- 9.7** On no occasion are items to be issued without the knowledge and authorization of the dispatch sub-officer.

- 9.8** All items must be issued from the dispatch counter except bulk chemicals.
- 9.9** A supervisor must be present when issuing chemicals from the storage area.
- 9.10** Items that are required to be stocked at the Area Garages must be issued to the transport sub-officers in-charge of the respective Area Garage.

10.0 Removals of Stock Items Issued From Inventory

- 10.1** A senior data entry clerk is charged with the responsibility of supervising the process of removing issued stock items from the inventory system on a daily basis. The persons assign this task are not assigned duties to issue or receive goods.
- 10.2** In an effort to ensure a real time update of the inventory system, these data entry clerks will remove from the stock all items that have been issued.
- 10.3** The senior data entry clerk will take all the delivery receipts that have been removed from delivery books after the issuing of items and divide them among the other clerks in the department.
- 10.4** Each item removed is given a reference number created by the system. This number is written on the delivery receipt beside each item issued. The number is used to obtain information readily on the respective transaction.
- 10.5** The receipts are then filed away by date and month for easy retrieval.
- 10.6** The senior data entry clerk will report to the Sub-officer in-charge of TMMD stores all challenges that require attention.
