JAMAICA CONSTABULARY FORCE
SmartCheck Vehicle Use, Care and Maintenance Procedure

1.0. Purpose

To assist the police in carrying out their duties in a more effective and efficient manner by utilizing special equipment and software skillfully retrofitted in SmartCheck Units. This equipment will assist the Police with current timely on-spot information about motorists selected at random whilst on tour.

2.0. Scope

This SOP shall apply to all Force Drivers and designated members of the JCF who will be required to operate, supervise and manage the SmartCheck vehicle. This will include: all stakeholders who will interact with the SmartCheck vehicle, in relation to the use, care and proper maintenance of the unit.

3.0. Definitions

ALPR	Automatic License Plate Reader
RFID	Radio-frequency identification. It uses electromagnetic fields to automatically identify and track tags attached to object

4.0. Responsibility

FD	Force Drivers
DM	Designated Members Assigned to Operate, Supervise and Manage Vehicle
SO	Sub-Officer

5.0. Description of Activities for Accountability Procedures

SmartCheck Vehicle – Handing and Taking Over Checklist Process

- | | | |
|------------|-----------|--|
| 5.1 | FD | Check fuel gauge. The fuel level must be at the three quarters (3/4) tank level or higher before handing over. If fuel level is below the three quarters (3/4) tank level, the vehicle must be refueled by the FD. |
| 5.2 | FD | Check the oil level of the vehicle. The oil level must be above the lowest point on the dipstick. If the oil level is at, or below the l |

lowest level on the dipstick, the FD must either inform the SO or take the vehicle to have oil coolant added.

- | | | |
|------------|-----------|--|
| 5.3 | FD | Check the coolant of the vehicle. The coolant level must be above the lowest point on the coolant bottle. If the coolant level is at, or below the lowest level on the coolant bottle, the FD must either inform the SO or take the vehicle to have coolant added to the reach the top level. |
| 5.3 | FD | Check to ensure that a spare tire on the vehicle, then check the pressure of the spare tire. If there is no spare tire in the vehicle, do not drive the vehicle. Report this finding to the SO. If there is a spare tire in the vehicle, and the pressure is low or too high, arrange to have the tire inflated or deflated to the correct pressure. |
| 5.4 | FD | Check to ensure that the lug tool and jack are both in the vehicle. If there is no lug tool or jack in the vehicle, do not drive the vehicle. Report this finding to the SO. |
| 5.5 | FD | Check all lights on the vehicle (left and right indicators, break lights, park lights and headlamps. If any of the lights are not working, report the matter to the SO. |
| 5.6 | FD | Check the vehicle for physical signs of damage. If the vehicle has any physical damage, report the matter to the CO. |
| 5.7 | FD | Check the vehicle technological devices (i.e., Cameras, tablet, router, network switch & UPS) for defects. If any of the devices is found defective, report the matter to the SO immediately. |
| 5.8 | FD | Complete entry in the transportation logbook outlining all the results from each step in the Accountability Procedures at the start and conclusion of each tour of duty. |

6.0. Guidelines for Use of SmartCheck Vehicles

- | | | |
|------------|-----------|--|
| 6.1 | FD | Inspect the tablet and other devices inside the vehicle. |
|------------|-----------|--|
