Rescinds: : 2021-Nov-30	
Authors: ICTD	Owner: JCF
Publication: 2021-Nov-30	Review: Biennially

Information Communication Technology Division Website Development Procedure

JCF/TECB-ICTD/PR/SSs/0008/2021

1.0. Purpose

The purpose of this is to provide administrative and technical support in ensuring optimal functionality & security associated with web pages created internally for the Jamaica Constabulary Force (JCF). This process is also geared towards providing information to the public at large, both locally & internationally, who wish to engage directly with the JCF.

2.0. Scope

This procedure includes all processes surrounding the management and maintenance of the website. This procedure does not include the management and maintenance of websites developed independently of the ICTD.

3.0. Definitions

CMS	Content Management Software
GUI	Graphical User Interface
UX	User Experience
RGS	Requirements Gathering Session
SRS	Software Requirements Specification
SSL	Secure Socket Layer
Internal Stakeholders	JCF web page owners and users
External Stakeholders	The public at large who interacts with the JCF website

4.0. Responsibility

WA	Website Administrator
SMDM	System Maintenance & Development Manager
SM	Security Manager

5.0. Description of Activities [Procedures]

- | | | |
|-------------|------|---|
| 5.1. | SMDM | Conducts an interim software needs assessment to determine if modification is need for the site. |
| 5.2. | WA | Contact stakeholders and set an appointment for a Requirements Gathering Session. |
| 5.3. | WA | Meet with Internal Stakeholders to develop draft software requirements specification document based on notes captured at the RGS. |
| 5.4. | WA | Complete a draft SRS document & email same to the stakeholder for their review and feedback and approval. This process is iterated until final draft has been approved for development. |

Information Communication Technology Division Website Development Procedure

- | | | |
|-------|-------|---|
| 5.5. | WA | Establish template formats & logical structure for web & Intranet pages based on approval of final draft. |
| 5.6. | WA | Complete a mock-up of the design. Meet with Internal Stakeholders to confirm design acceptance and verification of information on page. This process is iterated until accepted by Internal Stakeholder. |
| 5.7. | WA&SM | Conduct testing, troubleshooting and patches for the Website/webpages and update the CMS as deemed necessary. |
| 5.8. | WA | Ensure that the SSL certificate is current. |
| 5.9. | WA | Establish a standard for the design, use & management of websites & implement quality mechanism to mitigate risks. |
| 5.10. | WA | Implement, update, upgrade & add patches in as soon as they become available, to minimize down time. |
| 5.11. | SM | Monitor for intrusions or denial of service attacks & report security breaches to the Director ICTD, System Development Manager & Commanding Officer ICTD. |
| 5.12. | SM | Identify the breach and inform the WA of said breach (if its related to the CMS). Otherwise inform the appropriate personnel of said breach or take the appropriate action to address breach as well as inform the appropriate personnel. |
| 5.13. | WA | Conduct maintenance activities for the websites and repeat treatment actions as necessary. |
- 6.0. Records**
 Emails
 Draft SRS
 Recorded Zoom meetings
 Meeting minutes
 Meeting Agenda
