1.0 Introduction

The policing landscape in Jamaica creates increasing demands for law enforcement services. As a result, members are required at times to work beyond forty (40) hours per week. The Jamaica Constabulary Force (JCF) recognizes this need and as a consequence, has implemented a Workforce Management Solution (WMS).

The WMS is an automated system that manages the hours worked by members. Besides ensuring that members are appropriately remunerated for work beyond 40 hours per week, the solution allows for; improved deployment planning and automated real-time attendance tracking and management. It provides for better insight into the number of hours and employees required to execute specific assignments and tasks, geared towards achieving established goals and objectives.

This policy therefore, establishes the framework necessary to manage hours worked by members while optimizing human resources requirements.
