1.0 Introduction

Policies and standard operating procedures (SOPs) are important components in the Jamaica Constabulary Force's (JCF's) tool box. They provide guidelines on the organization's standards and communicate directions and protocols in keeping with laws, regulations and best known practices. Members are required to read, understand and apply policies and SOPs in order to optimize synergy between individual performance and the organization's mandate.

This *Policy on the Management of Policies and Standard Operating Procedures* represents a revised structure of how policies and SOPs will be managed in the JCF. More specifically, this policy is designed to ensure consistency in the structure of policies and SOPs, as well as how they are to be managed throughout their lifecycle.

It covers the agreed structure and lifecycle management of policies and SOPs to include their development, review, amendment, identification, publication, distribution, protection, storage, archiving, retrieval, and disposition. It does not apply to policies and SOPs used in the administration and operation of the JCF Intelligence Formations.

APPENDIX 'B' (CONT'D) TO FORCE ORDERS NO. 3901 DATED 2022-03-10

1.0 Introduction

As a critical component of the National Surveillance (Jamaica Eye) Program, the Jamaica Constabulary Force (JCF) manages the Closed Circuit Television Monitoring Centres (hereinafter referred to as the JCF CCTV Monitoring Centre) at the Police Emergency Communications Centre (PECC) and other locations. The JCF CCTV Monitoring Centres which incorporate feeds from public and privately owned cameras play a critical role in the national surveillance infrastructure of Jamaica and provide visual coverage (an eye) of imageries across various townships. This technology is a welcome tool in advancing the capabilities of the JCF to prevent, detect and respond to incidents of crime and public disorder using real-time telemetry, multi-agency coordination and efficient resource management.

The management of CCTV Monitoring Centre is aimed at supporting 'on the ground' operations, which in turn, aid in the creation of a safer and more secured environment. Management of the centres will aid in:

1. increased focus on public safety and security
2. prevention and detection of crimes and public disorder; and

APPENDIX 'C' (CONT'D) TO FORCE ORDERS NO. 3901 DATED 2022-03-10

1.0 Introduction

Increasingly, law enforcement entities in contemporary liberal democracies rely heavily on sound empirical data/information for decision-making at the strategic, operational and tactical levels. The Jamaica Constabulary Force (JCF) is no exception. As the agency with the mandate for crime and disorder prevention, detection and solution, data/information has become the major linchpin on which the organization's priorities, strategies, policies and standard operating procedures are contemplated, developed, executed and monitored.

Social research plays a critical role in providing empirical data/information for knowledge management within the JCF. For its part, research transcends and mitigates errors in ordinary human enquiry, and has guided the discovery of a plethora of law enforcement theories, models, approaches, apparatuses etcetera, all of which aided members' understanding of the social world in which they operate.

Akin to increasing the understanding of the policing landscape, social research provides a framework for more insights of what works and by extension, what does not work across time, in different jurisdictions and within particular context. In this regard, the JCF through social research is positioned to adopt and adapt proven strategies, policies and approaches to address contemporary policing challenges to effectively fulfil its mandate.

2.0 Purpose

The purpose of this policy and standard operating procedures is to provide a framework for the management of social research within the JCF.

3.0 Scope

This policy and standard operating procedures apply to members engaged in social research as components of their duties as well as in cases where the organization collaborates with individuals or entities in joint research projects.

4.0 Abbreviations and Acronyms

JCF	Jamaica Constabulary Force
PRDB	Planning, Research and Development Branch
FDLP	Force Development and Logistics Portfolio

5.0 Policy Statements

The Jamaica Constabulary Force (JCF) recognises that its continued relevance and ability to satisfy stakeholders rest heavily on the extent to which it is able to make decisions derived from sound, objective and empirical information and up-to-date research. Against this background, the organization will conduct or collaborate with individuals or institutions that conduct studies designed to contribute to the discourse and knowledge of law enforcement or the wider security sector. It is therefore the policy that:

- 5.1 during the annual planning session, the Director, Planning, Research and Development Branch (PRDB) will develop an Annual Research Schedule of studies that will be undertaken for the successive year;

APPENDIX 'C' (CONT'D) TO FORCE ORDERS NO. 3901 DATED 2022-03-10

- 5.2 the Deputy Commissioner of Police, Force Development and Logistics Portfolio (FDLP) will review and approve the Annual Research Schedule;
- 5.3 the PRDB will conduct social research designed to contribute to the discourse and knowledge of the JCF, law enforcement or to the wider security sector;

The research team shall then conduct a review of related literature. The review should examine, *inter alia* how the study relates to a larger on-going dialogue surrounding the topic, and provide an overview of specific theoretical/conceptual/analytical frameworks. Depending on the nature of the study, the review may be; contextual, historical, integrative, methodological, self-study, or theoretical.

6.3 Research Design

6.3.1 Once the research team has completed the review of literature, the next step is to design the study by creating a framework or plan which will guide the research. The research design should indicate the type of study that will be undertaken. These include:

6.5 Findings and Analysis

Once the fieldwork is completed, the team must collate the findings via a combination of appropriate narration, tables, charts and graphs. The findings component includes extraction of the questions or elements that guided the enquiry, and the corresponding results unearthed during fieldwork. The analysis component includes making sense of the data. This involves moving from descriptive to inferential analysis in respect to quantitative data. In relation to qualitative data, the approach is to transform huge volume of raw data via; i) data reduction, ii) data display and iii) conclusions and verification.

6.6 Conclusion and Recommendations

6.6.1 The conclusion and recommendations sections may be combined or, in extensive studies, presented in separate sections. In extensive studies, the conclusion and recommendations may be presented in point form. The conclusion must relate directly to the research questions or hypothesis, highlight the significant features of the research design, summarise the key findings of the discussions, and detail the dominant outcomes of the research. It may also outline the extent to which the study's aim was achieved while acknowledging the limitations.
