SERIAL NO. 3715

Sub. No. 1 ADJUSTMENT TO DATES OF THE SERGEANT AND INSPECTOR QUALIFYING EXAMINATIONS - STAGE ONE

This is to advise that due to unforeseen challenges; Stage 1 Multiple Choice Questions (MCQs) of the Selection Procedure for promotion to the ranks of Sergeant and Inspector has been re-scheduled as under:

- Inspector Qualifying – from August 23, 2018 to August 24, 2018
- Sergeant Qualifying – from August 22, 2018 to August 30, 2018

The changes are reflected in [Appendix 'A'](#) to these Orders.

The Police Promotion Selection Board sincerely apologizes for the inconvenience and craves your understanding.

Sub. No. 2 GUIDELINES TO CANDIDATES PARTICIPATING IN STAGE ONE OF THE 2018 SELECTION PROCEDURE FOR PROMOTION

Set out below are guidelines to direct candidates participating in this phase.

Timing	• The examinations will commence at 9:00 a.m. • Candidates may be admitted up to fifteen (15) minutes after the start of the examination.
Seating	• Candidates should be seated at least thirty (30) minutes before the commencement of the examination. During this period, all administrative matters will be dealt with to ensure a prompt start.
Late arrivals	• A candidate may not be allowed to participate in the written examination if he arrives fifteen (15) minutes after the commencement of the examination. • Candidates arriving late shall not be allowed extra time.
Conduct of examination	• The examination will be under strict supervision which will seek to avert any conduct which may bring the examination into disrepute. • Candidates are required to comply with the instructions of the Chief Invigilator and/or Assistant Invigilators. Failure to comply may result in the candidate's disqualification from the examination. • Disorderly behaviour may result in the candidate's expulsion from the examination room.
Examination materials	• Candidates are required to take pens, pencils (HB2 only), and erasers, to the examination centre.

Deputy Superintendent Qualifying Syllabus 2018

APPENDIX 'B' (CONT'D) TO FORCE ORDERS NO. 3715 DATED 2018-08-16

INTRODUCTION

The **Deputy Superintendent Qualifying Syllabus** is intended to support the aim of the *Selection Procedure for Promotion Policy*. It is envisioned that the assimilation of the material outlined in the syllabus will enable those aspiring to the job of **Deputy Superintendent** the opportunity to demonstrate that they possess the necessary competencies to fulfil their obligations in the role. This syllabus is a tool for professional development that all aspirants to **Deputy Superintendent** should use as a personal guide in accessing information critical to this managerial position.

For efficiency in your preparation to be successful in the examination, it is important to understand how the syllabus is arranged. The three (3) areas below are presented with sub-categories that are supported by specific reference material. This is followed by a description of the assessment process and a guide to abbreviations used in the references.

The syllabus is designed to test the candidate's application of laws, policies and procedures based on the responsibilities of the Deputy Superintendent of Police.

The **examination syllabus** covers the following three (3) themes:

1. **Crime & Intelligence Management**
2. **Public Safety & Operations Management**
3. **Administration Management**

The **selection process** will therefore assess the span of knowledge of law and policing functions, with a focus on the competencies required for the role, the authority attached to the job, as well as specific tasks and duties thereof.

APPENDIX 'C' MEDICAL ARTICLE - "HYPERTENSION - A SILENT KILLER"
TO FORCE ORDERS NO. 3715 DATED 2018-08-16

Hypertension - "A Silent Killer"

Case

A 55 years old policeman, Carl presents to the Medical Services Branch, reporting symptoms of light-headedness, giddiness and headache since the last three (3) days. He is obese and is a heavy drinker. His blood pressure measured by the nurse is 190/100. He explains that he always has high blood pressure readings and is not a fan of medications. Due to his dislike for medications, he does not take his prescribed blood pressure tablets.

What is Hypertension?

Hypertension is a medical condition characterized by persistently elevated blood pressure above the normal range 120/80. Blood pressure refers to the force exerted by the flowing blood, on the walls of the blood vessels in the body. The pressure exerted on the vessel walls has two components a systolic and diastolic pressure.

What do the top number and bottom number in a blood pressure measurement of 140/90 mean?

The top number is called the **SYSTOLIC** blood pressure. This is the pressure in the blood vessels when the heart contracts (systole) and pumps the blood throughout the body. The systolic pressure is more than the diastolic pressure. In this example the systolic pressure is 140.

What does the bottom number in a blood pressure measurement of 140/90 mean?

The bottom number is called the **DIASTOLIC** blood pressure. This is the pressure in the blood vessels when the heart is in a relaxed state (diastole) and is not contracting. The diastolic pressure is less than the systolic pressure. In this case the diastolic pressure is 90.

How is Hypertension diagnosed?

Hypertension is diagnosed by checking blood pressure on at least two separate days and confirming that the blood pressure readings are greater than or equal to 140/90 for patients less than 60 yrs. For patients 60 and over, the diagnosis is made with blood pressure readings greater than or equal to 150/90.

What are the risk factors for developing hypertension?

Risk factors include smoking, heavy alcohol use, sedentary lifestyle, and obesity, a family history of hypertension, kidney disease and hormonal diseases.

What are the symptoms of Hypertension?

Hypertension is called the "silent killer" because it usually does not cause any symptoms even though the high pressures in the body are damaging the organs. Some patients may report feeling dizzy, lightheaded, headaches, neck pain, and neck tension. Sometimes hypertension may only be discovered, when a patient develops a heart attack or stroke.

APPENDIX 'C' (CONT'D) TO FORCE ORDERS NO. 3715 DATED 2018-08-16

What are the effects of uncontrolled hypertension?

Hypertension affects the heart, brain, eyes and kidneys commonly. It leads to heart attack, stroke, blindness, kidney failure and poor circulation.

How can Hypertension be controlled?

Controlling blood pressure requires lifestyle changes and regular medical monitoring.

Diet- It requires lowering salt intake and increasing consumption of vegetables, fruits and fibre.

Exercise- 30 minutes of exercise for at least 5 days per week helps to control blood pressure.

Medications- Persons should try to be compliant on their medications.

Smoking and Alcohol- Limit heavy alcohol consumption and avoid smoking.

How is Hypertension monitored?

Regular health checkups every 1-6 months depending on level of control.

Electrocardiogram (ECG) at least once per year to monitor for damage to the heart.

Blood tests at least 1-2 times per year to monitor organ function and to rule out possible side effects of medication.

Eye specialist examination at least once per year to monitor eyes.

Regular monitoring with a nutritionist.

What should be done if you notice a bad effect from the medication?

Discontinue use of medication temporarily and contact your health-care provider for medical advice. Just stopping medications alone leaves one at risk for some of the complications of uncontrolled hypertension.

Case continued

Carl's blood pressure repeated one hour later, after he is given some medications to lower his blood pressure. He notices some improvement of his symptoms. He is educated on the effects of Hypertension, and the importance of taking his medication. He is sent to do an ECG and some blood tests to be reviewed in one week. He is referred to an Eye specialist and an appointment for a Nutritionist consultation was made. He is referred to the Psychologist for support with alcohol and smoking reduction plans and stress management. On review two months later Carl's blood pressure is on target at 138/85 and he is steadily losing weight. He has purchased a blood pressure machine and has learned how to check and monitor his blood pressure at home. He is enthusiastic about his progress, and is sharing his knowledge with his colleagues and family. He is empowered both mentally and physically.
